Sheffrin,2010-06-15 America s government intervenes in almost every aspect of its citizens daily lives From the air we breathe to our health wealth and security Americans wade through a vast political ocean Unfortunately we do so blindly few Americans understand how or why our government regulates the market mechanisms that surround us In Markets and

Majorities Steven Sheffrin addresses essential yet overlooked questions about political intervention in economic spheres Why should we trust the government to clean our air How do we know what to define as clean What kind of health insurance business will the government run What are the dangers of publicly financed doctors Sheffrin first explains traditional theories of market failure used to justify intervention He then combines the crucial question of political viability with the fascinating particulars of policy histories Sheffrin applies such analysis to the areas of health care social security environmental policy product liability trade policy and fiscal and budgetary policy He argues that beneath each area lies a unique calculus of market failure and political pressures and convincingly demonstrates that no single policy can be understood out of economic and political context In short the fact that markets may fail does not guarantee that politics will succeed By examining both sides of each policy area Sheffrin s careful review of our national policy making reveals a minefield where in many cases politics cannot help but fail as badly as markets However he shows that all is not lost citing among other examples political intervention in the medical industry as the only hope of stopping hospitals from competitive purchases of useless technology Markets and Majorities is must reading for anyone who has ever wondered why government just can t seem to get things done as well as anyone who has asked why it should try in the first place The Publishers' Trade List Annual ,1985
