Foucault and Family Relations Malcolm Voyce, 2019-05-14 Foucault and Family Relations Governing from a Distance in Australia analyzes how notions of property ownership were instrumental in maintaining family stability and continuity in rural Australia outlining how inheritance and divorce laws functioned to govern the internal relationships of families to assist the state to rule from a distance Using a selection of Foucault s ideas on the family sexuality race space and economics this books shows how property operated as a disciplinary device which was underpinned by technical ideas such as surveying and cartography This book uses legal judgments as a form of ethnography to show how property as a socio technical device allowed a degree of local freedom for owners This aspect of property allowed the state to stimulate ideas of local freedom to assist in ruling from a distance demonstrating how the rural family as a domestic unit became a key field of intervention for the state as the family represented a bridge to larger relationships of power

Markku Sotarauta, Ina Horlings, Joyce Liddle, 2012-09-10 This book shows first of all that leadership plays a crucial role in reinventing regions and branching out from an old path to something new in order to create more balanced and sustainable regional development Second it maintains that leadership is not a solo but a multi agent and level activity and that it needs to be discussed and studied as such Third as the book argues leadership is shaped differently in various institutional and cultural contexts and on different scales This book explores the ways leadership plays out in regional development context contributing to economically socially and ecologically balanced sustainable future **Steel Town** Eklund, Erik, 2013-05-24

The sun moves across the narrow coastal plain that borders the range to the north It shows once separate places now merged into one suburban entity a ribbon of residential commercial and industrial development There is a commercial centre whose tall metallic and glass structures reflect the light and celebrate an industrial heritage And to the south an area where a mass of industrial buildings converge around a large harbour This area stands as a telling symbol of the region's golden industrial age To most Australians Port Kembla is a grimy polluted industrial wasteland located down the coast from Sydney Such images were formed over fifty years ago when industrial development in the town was at its height and when the expanse of breathtaking coast had been colonised by the stacks and furnaces of heavy industry Yet the vision of stacks and pollution from furnaces was never the whole story there was always more to Port Kembla Although these ideas persist even today they obscure the real experiences of the people of the port Steel Town illuminates our understanding of the processes of industrial and social change Port Kembla was unique in Australian terms an urban environment where industrial society shaped local life and politics like nowhere else This book explores the advent and implications of industrial society and the impact of economic decline and deindustrialisation In his comprehensive and persuasive account of local life Erik Eklund draws together themes of migration gender class and identity Using archival records oral history interviews and company documents Steel Town charts the relationship between economic change and the human experience of that change The story of Port Kembla is the story of the big issues of Australian history writ small on the lives of three generations of local people The legacy of industrial society is a mixed one its experiences and consequences are full of contradictions And that of course

Botterill, Donald A. Wilhite, 2005-06-15 In 1992 Australia's Commonwealth and State governments announced the introduction of a National Drought Policy adopting an innovative risk management approach which received broad support from Australia's major political parties and the policy community This trail blazing attempt and the experiences with the development and implementation of this policy over the past decade have intrigued the international scientific and policy communities The present book comprises an academically focused collection of papers which the Editors hope will provide others moving in a

similar direction with the benefit of experience The work highlights the successes and challenges of a move from disaster to risk management in responding to drought As such it will be a valuable and useful addition to the international literature on drought preparedness and response

**Governing Rural Development** Lynda Cheshire, 2012-11-28 In recent decades the responsibility for initiating regeneration programmes has been placed firmly in the hands of rural communities with the rationale being that local people are best placed to know their own problems and consequently to develop their own solutions Despite the popularity of this approach the self help approach has its own problems and can be seen as an attempt by governments to reduce public spending This book provides a critical account of the discourses and practices of self help in contemporary rural development policies of Australia and other western nations Although it examines the problems of the self help approach it moves beyond a straightforward exposition of the impediments to self help Instead taking a Foucauldian governmentality perspective it puts forward a theoretical analysis of the self help concept assessing it as a means of governing rural development in an advanced liberal manner It argues that self help should not be regarded as either the empowerment or the abandonment of rural citizens by a shrinking state but rather the application of new ways of thinking about and acting upon rural development
