Politics In The Age Of Cobden:

Politics in the Age of Cobden John Prest, 1977-06-17 **Government and Community in the English Provinces, 1700-1870** David Eastwood, 1997-06-09 In this bold and original study David Eastwood offers a reinterpretation of politics and public life in provincial England He explores the ways in which power was exercised and reconstructs the social and cultural foundations of political authority in provincial England Professor Eastwood demonstrates the crucial role played by local elites in policy making and shows how English public institutions and political culture can only be understood in terms of the long run development of the English state **Identifying the English** Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security The Political Worlds of Women Sarah Richardson, 2013 This volume examines female engagement in both traditional and unconventional political arenas in nineteenth century Britain including female sociability salons child rearing and education health consumption religious reform and nationalism Richardson focuses on middle class women s social cultural intellectual and political authority as implemented by a range of public figures and lesser known campaigners **Gladstone: God and Politics** Richard Shannon, 2008-10-15 W E Gladstone was four times Prime Minister and an MP for sixty three years This is a major biography of the most famous Victorian statesman *Studies in the English Social and Political Thinkers of the Nineteenth Century* Robert Henry Murray, 1929 **Richard Cobden's German Diaries** John R. Davis, 2012-02-13 The series Prinz Albert Forschungen Prince Albert Research Publications publishes sources and studies concerning Anglo German history It includes outstanding works in German and English which significantly enhance or modify our understanding of Anglo German relations These are supplemented by critically edited sources designed to offer access to previously unknown documents of crucial importance to the Anglo German relationship The 1848 Revolutions and European Political Thought Douglas Moggach, Gareth Stedman Jones, 2018-02-22 The revolutions that swept across Europe in 1848 marked a turning point in the history of political and social thought They raised questions of democracy nationhood freedom and social cohesion that have remained among the key issues of modern politics and still help to define the major ideological currents liberalism socialism

republicanism anarchism conservatism in which these questions continue to be debated today This collection of essays by internationally prominent historians of political thought examines the 1848 Revolutions in a pan European perspective and offers research on questions of state power nationality religion the economy poverty labour and freedom Even where the revolutionary movements failed to achieve their explicit objectives of transforming the state and social relations they set the agenda for subsequent regimes and contributed to the shaping of modern European thought and institutions *Politics and Trade in Britain, 1776-1914* Gordon Bannerman, 2023-07-27 The period between 1880 and 1914 the subject of this volume sees increasing questioning of free trade especially in those sectors impacted adversely by foreign competition and within political circles where the notion of protecting native industries shifted from an agricultural to an industrial base There was a greater willingness especially in the Conservative party to consider it as a viable policy The constituencies or interest groups created by free trade however defended it fiercely among the Liberal party and in manufacturing industries primarily those highly dependent on export markets Debates on commercial policy in this period had another dimension which had been subsidiary in earlier periods the colonial empire and the economic political and cultural ties with it promoted The period between 1880 and 1914 was one where the language of empire was at its height and the economic relationship between the Mother Country and the colonies entered political debate in a forceful way The sources include several petitions from parliamentary papers attacking the system of commercial treaties pursued by the British government Towards this end extracts from the journal Fair Trade and a body of newspaper material detailing extra parliamentary movements against free trade from the Leeds Mercury Glasgow Herald Pall Mall Gazette and Daily Mail are also included Making the transition to the early twentieth century and the rise of the labour movement printed sources such as Fabian tracts on tariff reform as well as material from the International Free Trade Congress are incorporated *Rethinking Nineteenth-Century Liberalism* Simon Morgan, 2017-05-15 Richard Cobden 1804-65 rose from humble beginnings to become the leading advocate of nineteenth century free trade and liberalism As a fierce opponent of the Corn Laws and promoter of international trade he rapidly became an influential figure on the national stage whose name became a byword for political and economic reform Yet despite the familiarity with which contemporaries and historians refer to Cobdenism his ideals and beliefs are not always easy to identify and classify in a coherent way Indeed as this volume makes clear the variety diversity and malleability of the Cobdenite project attest to the lack of a strict dogma and highlight Cobden's underlying pragmatism Divided into five sections this collection of essays offers a timely reassessment of Cobden's career its impact and legacy in the two hundred years since his birth Beginning with an investigation into the intellectual and cultural background to his emergence as a national political figure the volume then looks at Cobden's impact on the making of Victorian liberal politics The third section examines Cobden's wider influence in Europe particularly the impact of his tour of 1846-47 which was in many ways a defining moment not only in the making of Cobden's liberalism but in the making of liberal Europe Section four broadens the

theme of Cobden's contemporary impact including his contribution to the debate on peace internationalism and the American Civil War whilst the final section opens up the theme of Cobden's contested legacy the variety of interpretations of Cobden's ideas and their influence on late nineteenth and twentieth century politics Offering a broad yet coherent investigation of the Cobdenite project by leading international scholars this volume provides a fascinating insight into one of the nineteenth century's most important figures whose ideas still resonate today **The Living Age**, 1882 **John, Viscount Morley** John Hartman Morgan, 1924 **The Saturday Review of Politics, Literature, Science and Art**, 1862 Reader's Guide to British History D. M. Loades, 2003 A masterful attempt to describe the historical secondary literature of the British Isles from prehistory to the present day the set is comprised of substantial essays of 1 000 to 3 000 words each on a wide array of subjects all written by pre eminent scholars in language accessible to beginning students and advanced researchers Each listed essay title is given a thorough annotation The Top 20 Reference Titles of the Year American Libraries May 2004

Free Trade and Liberal England, 1846-1946 Anthony Howe, 1997 The argument about the limits of Free Trade or Protectionism rages throughout the world to this day Following the Repeal of the Corn Laws in 1846 free trade became one of the most distinctive defining features of the British state and of British economic social and political life While the United States much of the British Empire and the leading European Powers turned towards protectionism before 1914 Britain alone held to a policy which had seemingly guaranteed power and prosperity This book seeks to explain the political history of this tenacious loyalty While the Tariff Reform opponents of free trade have been much studied this is the first substantial account based on a wide range of printed and archival sources which explains the primacy of free trade in nineteenth and early twentieth century Britain It also shows that by the centenary of the Repeal of the Corn Laws in 1946 although British free traders lamented the death of Liberal England they heralded under American leadership the rebirth of the liberal international order **The Dictionary of National Biography, Supplement** Sir Sidney Lee, 1901 Making News Richard R. John, Jonathan Silberstein-Loeb, 2015 This book charts the rise and fall of the newspaper as the primary medium for the conveyance of news The book focuses on two of the most influential media markets in the modern world Great Britain and the United States between 1688 and 1995 In 1688 Parliament created institutional arrangements that would hasten the rise of the newspaper as the dominant medium for the circulation of news In 1995 the National Science Foundation commercialized the Internet encouraging an astonishing proliferation of information on all manner of topics including the news Per capita newspaper circulation had been declining for decades partly due to shifting social norms and partly due to the rise of broadcast news The Internet exacerbated this trend partly because it provided a cheaper news source and partly because it quickly became a superior vehicle for advertising a major source of revenue for newspaper publishers for over two hundred years However only rarely has advertising revenue and direct sales covered costs Almost never has the demand for news generated the revenue necessary for its supply Non market institutional arrangements have ranged from direct

government subsidies to organizational forms that enabled news organizations to cooperate From a historical perspective the large profits reaped by a handful of newspaper publishers in the post Second World War era were anomalous and in no sense a baseline for public policy Never again will the newspaper be the dominant news medium To guarantee an informed citizenry in the future it is necessary to understand how the news business worked in the past This book is organized around eight essays each written by a distinguished specialist and each explicitly comparative Its theme is the indispensability in both Great Britain and the United States of non market institutional arrangements in the provisioning of news *That Noble Science of Politics* Stefan Collini,Donald Winch,John Burrow,1983-11-24 In this work three historians of ideas examine the forms taken in nineteenth century Britain to develop a science of politics **Saturday Review of Politics, Literature, Science and Art** ,1866 Dictionary of National Biography Leslie Stephen,Sir Sidney Lee,1901
