Politics Is A Way Of Helping People:

Believe in People Charles Koch, Brian Hooks, 2020-11-17 A surprising take on how you can help tackle the really big problems in society from one of America's most successful entrepreneurs People are looking for a better way Towering barriers are holding millions of people back and the institutions that should help everyone rise are not doing the job Crumbling communities One size fits all education Businesses that rig the economy Public policy that stifles opportunity and emboldens the extremes As a result this country is quickly heading toward a two tiered society Today's challenges call for nothing short of a paradigm shift away from a top down approach that sees people as problems to be managed toward bottom up solutions that empower everyone to realize their potential and foster a more inclusive society Such a shift starts by asking What would it mean to truly believe in people Businessman and philanthropist Charles Koch has devoted his life to answering that question Learn what he's discovered during his 60 year career to help you apply the principles of empowerment in your life in your business and in society By learning from the social movements and applying the principles that have enabled social progress throughout history Koch has achieved more than he dreamed possible building one of the world's most successful companies and founding Stand Together one of America's most innovative philanthropic communities Stand Together CEO Brian Hooks and Koch show how the only way to solve the really big problems from poverty and addiction to harmful business practices and destructive public policy is for each and every one of us to find and take action in our unique role as part of the solution Full of compelling examples of what works including several first person accounts from individuals whose lives have been transformed Koch and Hooks refreshing approach promotes partnership instead of partisanship and speaks to people from different perspectives and all walks of life They show that no injustice is too tough to overcome if you share a deep belief in people are willing to unite with anyone to do right and work to empower others from the bottom up

The Political Logic of Experience Neal DeRoo, 2022-06-07 The Political Logic of Experience argues that experience and phenomenology are essentially political with profound implications for our understanding of subjectivity epistemology experience the phenomenological method and politics Drawing on work from across the phenomenological tradition it develops an account of expression as the internal relationship uniting knowing being and doing with both transcendental conditions and empirical phenomena This expressive unification generates subjectivity as an expression of particular communities and subjects as an expression of subjectivity Subjectivity and experience are therefore both revealed to be inherently political prior to their expression in particular subjects In clarifying the political nature of experience and the constitution of subjectivity the book puts the work of critical phenomenology in dialogue with transcendental phenomenology to reveal the need for a phenomenological politics a field tasked with explaining the expressive co constitutive and necessarily political relationships between subjects and their communities It is only through such a phenomenological politics that we can properly make sense of the epistemological ontological and practical significance of issues like racism and sexism problems that concern our very experience of the world The book reveals phenomenology to be both essentially political and politically essential as it emerges within particular communities and shapes and transforms how individuals within those communities experience the world Touching on issues of transcendental phenomenology political strategy historical interpretation and inter disciplinary phenomenological method the book argues for foundational claims pertaining to phenomenology politics and social criticism that will be of interest to those working in philosophy gender studies race queer theory transcendental and applied phenomenology and beyond

Political Development and Democratic Theory Steven J. Hood, 2015 Most comparativists have assumed that democratization is best understood by looking at regimes in the transition and consolidation phases of democracy without really considering the essence of democracy liberal rights and democratic virtues Democracy is seen as a mechanistic process without considering the ideas that build democratic regimes This book begins afresh by proposing that comparativists need to consider democracy to be a combination of rights and virtues and that the difficulties of democratic transitions consolidation and maintenance are essentially problems relating to balancing rights and virtues in the regime How do we reemphasize these aspects of democracy at a time when comparative literature focuses almost solely on democratic procedure By combining the best elements of comparative theory and liberal democratic philosophy Hood argues that comparativists can sharpen the scholarly tools we need to understand both the problems of democratization and maintaining democracy He provides the reader with a valuable overview of comparative theory and how our abandonment of political philosophy has led to our acceptance of social science methods

The Cultural Logic of Politics in Mainland China and Taiwan Tianjian Shi, 2014-12-15 Tianjian Shi shows how cultural norms affect political attitudes and behavior through two causal pathways one at the individual level and one at the community level Focusing on two key norms definition of self interest and orientation to authority he tests the theory with multiple surveys conducted in mainland China and Taiwan Shi employs multi level statistical analysis to show how in these two very different political systems similar norms exert similar kinds of influence on political trust understanding of democracy forms of political participation and tolerance for protest The approach helps to explain the resilience of authoritarian politics in China and the dissatisfaction of many Taiwan residents with democratic institutions Aiming to place the study of political culture on a new theoretical and methodological foundation Shi argues that a truly comparative social science must understand how culturally embedded norms influence decision making *New York Magazine*, 1978-06-05

Mediated Politics of Europe Mats Ekström, Julie Firmstone, 2017-10-30 This edited collection makes a unique contribution to analyses of the changing nature and challenges of mediated political communication through a distinctive comparative discourse analytical approach. The book explores how politics is performed and discursively constructed in television news and current affairs in five countries: France, Greece, Italy, Sweden, and the UK, and focuses on a moment in time in European politics characterized by challenging tensions: increased Euroscepticism, questioning of mainstream politics, accentuated gaps between the elite and the citizens, and polarizations between member states. Emphasising the performative and discursive dimensions of political communication, the chapters provide a detailed comparative analysis that is centred around three themes: how symbolic representations of politics are shaped by journalistic practices, genres, and styles of news reporting; the language and performances of mainstream and populist political leaders; and the participation and representation of citizens' voices.
