**The Politics of Ballistic Missile Nonproliferation** W. Bowen, 2000-01-20 During the presidency of George Bush 1989-93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime The Politics of Ballistic Missile Nonproliferation examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts *The Politics of Ballistic Missile Nonproliferation* Wyn Q. Bowen, 1997 *Non-Proliferation Export Controls* Daniel Joyner, 2017-03-02 This volume provides a comprehensive and interdisciplinary examination of the Multilateral Non Proliferation Export Control system and the national and international context within which it functions Key features *The Politics of Nuclear Non-Proliferation* Ursula Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism The Politics of Nuclear Non Proliferation provides a theoretically innovative and practically useful framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory International Nuclear Export Controls and Non-Proliferation Ian J. Stewart, 2021-09-27 This book examines the evolution of international nuclear non proliferation trade controls over time The book argues that the international nuclear export controls have developed in a sub optimal way as a result of a non proliferation collective action problem This has resulted in competition among suppliers owing to the absence of an overarching effective system of control While efforts have been undertaken to address this collective action problem and strengthen controls over time these measures have been inherently limited it is argued here because of the same structural factors and vested interests that led to the creation of the problem in the first place This study examines international controls from the beginning of the nuclear age and early efforts to control the atom up to more recent times and the challenge posed by Iranian and North Korean nuclear ambitions Drawing on a rich body of

original archival research and interviews the book demonstrates that the collective action problem has restrained cooperation in preventing nuclear proliferation and that gaps persist in the international nuclear trade control regime This book will be of much interest to students of nuclear proliferation and arms control security studies and International Relations

Tuning Priorities in Nuclear Arms Control and Non-Proliferation A. Nikitin, M.B. Mærli, 2008-02-28 This publication contributes to the discussion about better understanding and mutual tuning of Russian and Western approaches to strengthening the nuclear non proliferation regime responding to situations like those in Iran and North Korea synchronizing priorities in the elimination of excessive fissile materials and most of all in the preservation of existing and the development of new agreements in nuclear arms control and nuclear disarmament An important aspect of this is raising awareness of the current crisis in nuclear arms control Such international inter agency and cross cultural dialogue provides an opportunity for maintaining the wide ranging dialogue required for strengthening arms control arrangements and for establishing new ones with clearly defined and measurable scopes and verification systems

Containing Missile Proliferation Dinshaw Mistry, 2011-12-01 The proliferation of ballistic missiles that can deliver weapons of mass destruction halfway across the world is a matter of growing urgency and concern as is the fate of agreements limiting the development of such deadly weapons The Bush administration s scrapping of the ABM Treaty and pursuit of a huge National Missile Defense initiative are dramatic evidence of this concern Yet there remains much uncertainty about the viability of missile defense If defenses fall short strong security regimes will be necessary to contain missile proliferation Since 1987 more than thirty states have agreed to restrict their transfer of missiles and related technologies under the Missile Technology Control Regime MTCR During the MTCR s first decade several regional powers were thwarted from advancing their missile ambitions Subsequently however states such as North Korea Iran Pakistan India and Israel have tested medium range missiles and others have expanded their missile arsenals Dinshaw Mistry critically examines the successes and limitations of the MTCR and suggests five practical ways to strengthen the regime The author s exhaustive research offers new and detailed insights on the technology and politics of missile programs in Iran Iraq North Korea Pakistan India Israel Egypt South Korea Taiwan and other countries Mistry also shows how international cooperation security regimes and U S foreign policies of engagement and containment with these states can halt their missile programs Mistry s book is the first comprehensive study of the MTCR and of international efforts to contain missile proliferation Policymakers scholars and the general reader will find this book a valuable contribution to the subjects of arms control ballistic missile proliferation multilateral cooperation and international security regimes For the author s update go to <http://www.washington.edu/uwpress/books/UpdateApril2009.pdf>

China, Arms Control, and Non-Proliferation Wendy Frieman, 2014-04-08 China Arms Control and Non Proliferation is an empirically and conceptually path breaking book that documents China s participation in international arms control and non proliferation regimes from 1985 to 2001 The book focuses on the distinction between US

expectations of Chinese compliance which China has not always met and international standards against which Chinese performance is acceptable This will be the standard staple work dealing with China and international arms control and will be invaluable to those dealing with Chinese security studies foreign policy international relations and arms control and disarmament

**Avoiding the Abyss** Barry R. Schneider, Jim A. Davis, 2006-05-30 In December 1993 Secretary of Defense Les Aspin announced the Counterproliferation Initiative a response to President Clinton's assertion that if we do not stem the proliferation of the world's deadliest weapons no democracy can feel secure This timely book brings together contributions from a wide range of experts to help readers understand how far the nation has come since then and what still needs to happen Insightful essays examine arms control treaty programs export control regimes interdiction diplomatic economic political persuasion and sanctions deterrence counterforce active and passive defense and consequence management Many positive changes have occurred since 1993 Regime changes in Iraq and South Africa have removed some WMD proliferation threats Saddam Hussein has been overthrown and a new Iraq is beginning to emerge South Africa's clandestine WMD program has apparently ended Libya announced it has given up its efforts to have active WMD programs The Taliban and al Qaeda have been routed in Afghanistan probably delaying efforts to develop or buy WMD Yet states continue to develop and export WMD and or their delivery systems As many as 30 states are still believed to have either a nuclear biological or chemical weapons program Some have all three India and Pakistan have acknowledged programs Abdul Qadeer Khan the scientist who directed the Pakistani A bomb program has admitted selling nuclear weapons designs and nuclear enrichment equipment to Libya Iran and North Korea His colleagues have held discussions with al Qaeda representatives Ayman Al Zawahiri number two in the al Qaeda chain of command claims that the terrorist organization has several suitcase A bombs from the Former Soviet Union It appears clear to many that Iran has a desire to develop nuclear weapons Syria still has a chemical weapons program North Korea's WMD profile has escalated As *Avoiding the Abyss* so convincingly demonstrates much has been accomplished since the Counterproliferation Initiative was launched but much work still lies ahead It is an important story for every American

*Asian Space Race: Rhetoric or Reality?* Ajey Lele, 2012-10-20 This book explores the character and contours of the Asian Space Powers At present Asian states like China Japan and India are found investing in space technologies with analogous social and scientific and probably with divergent military intents Other Asian states like Israel South Korea and Malaysia are also making investments in the space arena States like Iran and North Korea are faulted for using space launches as a demonstrative tool to achieve strategic objectives This work examines this entire maze of activities to unearth where these states are making these investments to accomplish their state specific goal or are they also trying to surpass each other by engaging in competition Explaining why and how these states are making investments towards achieving their socio economic and strategic mandate this book infers that the possibility of Asian Space Race exists but is presently fairly diminutive

**Globalization of Political Violence** Richard Devetak, Christopher W. Hughes, 2007-12-18 The events of the 11th of September 2001 revealed most dramatically that globalization has a shadow While large sections of the world's population enjoy the perceived benefits of globalization others seek to utilize globalization for their own politically violent purposes If 9 11 demonstrated anything it is that globalization can as readily facilitate violence and insecurity as it can produce stability prosperity and political order This edited volume offers important new methodological and multi disciplinary insights into the study of globalization and political violence It brings together studies from various disciplines in order to address the precise nature of the relationship between globalization and political violence as it seeks to offer new theoretical and empirical understandings of the types of actors involved in political violence either as perpetrators or victims Examples of the studies include the changing character of state militaries and state to state conflict under globalization the emergence of new wars fuelled by globalization the role of state militaries in intervention new forms of violence directed by states against refugees and anti globalization protesters the role of terrorist actors post 9 11 networks for the proliferation of weapons of mass destruction and the rise of private military firms amongst others The Globalization of Political Violence will be of interest to students and researchers of politics international relations security studies and international political economy Historical Dictionary of Arms Control and Disarmament Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers Jeffrey A Larsen and James M Smith present a context for the broader range of international relations at a given point in time extending the utility of the dictionary beyond just a narrow examination of arms control **BOOK JACKET** *Nuclear Disarmament and Non-Proliferation* Sverre Lodgaard, 2010-10-18 Pt 1 Power shifts and nuclear weapons pt 2 The legacies of nuclear history and the requirements of a new consensus on non proliferation and disarmament pt 3 Proliferation problems and the role of nuclear disarmament pt 4 Towards a nuclear weapon free world The Formulation of Effective Nonproliferation Policy United States. Committee on Foreign Relations, 2000 **Russia Today Atlas: Strategic Information for Business and Political Decision Makers** IBP, Inc, 1998-01-01 Defense Conversion Strategies Robert E. Dundervill, Jr., Peter F. Gerity, Anthony K. Hyder, Lawrence H. Luessen, 2013-03-09 A North Atlantic Treaty Organization NATO Advanced Studies Institute ASI on Defense Conversion Strategies was held at the Atholl Palace Hotel Pitlochry Perthshire Scotland from July 2 through July 14 1995 This publication is the proceedings of the Institute The NATO Advanced Studies Institute program of the NATO Science Committee is a unique and valuable forum under whose auspices over one thousand international tutorial meetings have been held since the inception of the program in 1959 The ASI is intended to be primarily a high level teaching activity at which a carefully defined subject is presented in a systematic and coherently structured program The subject is treated in considerable depth by lecturers eminent in their fields and of international standing The subject is presented to other experts or practitioners who will already have specialized in the field or possess an advanced

general background appropriate to the topic The ASI is aimed at an audience at the post doctoral level This does not exclude advanced graduate students or other senior participants with qualifications and achievements in the subject of the ASI or related areas This ASI was prompted by several events in the defense environment      **Nonproliferation** United States. Congress. House. Committee on Government Reform. Subcommittee on National Security, Emerging Threats, and International Relations,2004      **Global Engagement** Janne Nolan,2010-12-01 Worldwide political changes have presented a unique opportunity for forging a new basis of international security relations The end of the cold war the dissolution of the Soviet Union and the ascending role of the United Nations in regional security affairs have transformed the driving issues of international security These changes both heighten the demand and offer the potential for global cooperation on an unprecedented scale Traditional security preoccupations and the foundations of past strategy based on preparation for massive military confrontation are no longer appropriate Now world leaders must find alternative strategies to ensure international safety This book brings together a prominent group of experts including several recently appointed government officials to examine an alternative form of security one that emphasizes collaborative rather than confrontational relationships among national military establishment Global Engagement offers a complete analysis of the concept of cooperative security which seeks to establish international agreements to regulate the size technical composition investment patterns and operational practices of all military forces for mutual benefit It explains how cooperative security also aims to create mechanisms to prevent the proliferation of weapons of mass destruction and regional conflict The contributors identify the trends motivating the movement toward cooperative security and analyze the implications for practical policy action They examine the problem of controlling advanced conventional munitions analyze an integrated control arraignment discuss international principles of equity and their relationship to problems of security and offer regional political perspectives while considering social regional security problems With the altered security environment cooperation has clearly become the new strategic imperative Policymakers are challenged to dispose of large arsenals of conventional and nuclear weapons and redirect their efforts to support preventative management of security conditions Leading the discussion of the security challenges ahead the authors of this volume debate the utility of cooperative engagement for future strategy
