Froese,2018-03-20 How ought scholars and students to approach the rapidly expanding and highly multidisciplinary study of international economic law Academics in the field of international political economy used to take for granted that they worked with the overarching concepts of rules and governance while legal scholars analyzed treaties and doctrines However

over the past twenty years formerly disparate fields of study have converged in a complex terrain where academic researchers and governmental policy analysts use a pluralistic set of theoretical and methodological tools to study the ongoing development of international economic law This volume argues that the extensive development of international economic law makes it impossible to discuss international political economy and international law as if they were mutually exclusive processes or even as if they were separate and mutually reinforcing Rather we must think of them as a deeply interconnected set of rapidly evolving activities This is a paradigm shift in which we cease to think about an international system in which politics and law interact and begin to think about an international system in which politics take place in a legal frame Froese terms this a shift from politics and law to the politics of international economic law This book does for political economy what others have already done for law introduces political scientists economists and other practitioners of IPE to the potential of engaging with legal theory and method it will be of great interest to scholars in a range of areas including IPE global governance IR and international law

Critical Theories in International Relations Tayyar Ari, 2023-04-04 This edited book focuses primarily on contemporary debates and the critical and postmodern theories

to be considered a significant contribution to the field This book shows that critical international relations theories which are incomprehensible and challenging are easy and understandable The book analyzes the Frankfurt School constructivism post colonialism feminism critical geopolitics political economy Copenhagen School Aberystwyth School Paris School and Ontological security Critical Theories in International Relations argues that neither identity nor security can be considered a fixed and objective issue can change according to time and space and depend on historical and sociological factors Nothing is given for critical approaches and they are produced and reproduced in ever changing conditions that lead to new truths and meanings These are the results of reflexive and non linear interactions In this context it is made pedagogically

The Politics of International Economic Law Tomer Broude,Marc Lawrence Busch,Amelia Porges,2011 How do politics and international economic law interact with each other Financial crises and shifts in global economic patterns have refocused our attention on how the fingerprints of the visible hand can be seen all over the institutions that underpin the rules of globalization From trade and investment to finance governments are under pressure to enforce resist and re write international economic law Lawyers have seldom given enough attention to the influence of politics on law whereas political scientists have had an on again off again fascination with how the law influences relations among states This book leads the way toward filling this interdisciplinary gap through a series of important studies written by leaders in the field on specific problems in international economic relations The book demonstrates a variety of ways in which the international political economic nexus may be researched and understood
