- Along with political parties, pressure groups are essential to democratic politics. They differ from political parties in these ways:
  - Pressure groups try influence the government but do not want to be government. They focus on one issue or a related group of issues, such as animal rights
  - Political parties try to get their candidates elected in order to win political power and have policies on a wide range of issues

*POLITICS, PARTIES, & PRESSURE GROUPS* V.O. KEY, 1964      **Political Parties, Pressure Groups and Social Movements** Dr. Ram Ayodhya Singh, 2021-09-15 A political party is a political organization that typically seeks to influence government policy usually by nominating their own candidates and trying to seat them in political office Parties participate in electoral campaigns and educational outreach or protest actions Parties often espouse an expressed ideology or vision bolstered by a written platform with specific goals forming a coalition among disparate interests An advocacy group is a group or an organization which tries to influence the government but does not hold power in the government A single issue group may form in response to a particular issue area sometimes in response to a single event or threat Some have developed into important social political institutions or social movements Some powerful Lobby groups have been accused of manipulating the democratic system for narrow commercial gain and in some instances have been found guilty of corruption fraud bribery and other serious crimes lobbying has become increasingly regulated as a result Some groups generally ones with less financial resources may use direct action and civil disobedience and in some cases are accused of being a threat to the social order or domestic extremists Research is beginning to explore how advocacy groups use social media to facilitate civic engagement and collective action Contents Political Parties The Role of Political Parties in Constitutionalising Governance The Systemic Role of Parties and Interest Groups Functions of Pressure Groups Growth of Pressure Groups Legal Representation of Interests Social Movement Social Movement in India      *Politics in the United States* Henry A. Mack,2010-08-11 This book presents a theory of political disalignment and a revised theory of party realignment using four case studies from the United States Canada Great Britain and Italy to illustrate these concepts Why do major political parties die The shelf life of minor parties in democracies tends to be short but major parties tend to be highly durable The Democratic Party of the United States and the Conservative Party of the United Kingdom have been going strong for two centuries Major parties perpetuate themselves by maintaining a consistent ideology on major national issues even at the cost of periodic defeats at the polls In American politics ideological polarization maintains the vitality of the two major parties and renders them almost immune to threats from new parties even as it impedes consensus and compromise on public issues Spectacular instances of sudden death in major parties have nevertheless occurred in the United States the United Kingdom Canada and Italy and they all exhibit similar characteristics The fatal event which author Charles S Mack calls disalignment occurs when a schism opens between party leaders and traditional core base voters on an issue of overriding national importance Major parties survive periodic defeats but they cannot survive disalignment
