Generating Social Capital M. Hooghe, D. Stolle, 2003-05-15 Social capital networks of civic engagements norms of reciprocity and attitudes of trust is widely seen as playing a key role for the health of democracy While many authors have examined the consequences of social capital there is a pressing need to explore its sources This collection brings together leading American and European scholars in the first comparative analysis of how social trust and other civic attitudes are generated The contributors to this volume examine the generation of social capital from two directions society based approaches that emphasize voluntary associations and institutional approaches that emphasize policy **Varieties of Political Consumerism** Carolin V. Zorell, 2018-10-02 This book provides an analysis of the politics of consumption and how the educated consumer plays a vital role in advancing responsible market practices and consumption Based on a comprehensive interdisciplinary perspective it explores the extent drives and links of boycotting buycotting labelling schemes and Corporate Social Responsibility CSR in 20 European countries A central question addressed is whether macro societal patterns of orientation concerning the roles of the state companies and citizens can explain individual and cross national differences in boycotting and buycotting As the book shows there is not one type of political consumer but several and their occurrence is directly connected to national variations of labelling schemes and Corporate Social Responsibility Consumers need reference points and information on the political backgrounds of purchases and policy makers must address that need through political measures which fit to the national patterns in views about cooperation and market relationships Ethics and Morality in Consumption Deirdre Shaw, Michal Carrington, Andreas Chatzidakis, 2016-04-14 Ethical consumerism is on the rise No longer bound to the counter cultural fringes ethical concerns and practices are reaching into the mainstream of society and being adopted by everyday consumers from considering carbon miles to purchasing free range eggs to making renewable energy choices The wide reach and magnitude of ethical issues in society across individual and collective consumption has given rise to a series of important questions that are inspiring scholars from a range of disciplinary areas These differing disciplinary lenses however tend to be contained in separate streams of research literature that are developing in parallel and in relative isolation Ethics in Morality and Consumption takes an interdisciplinary perspective to provide multiple vantage points in creating a more holistic and integrated view of ethics in consumption In this sense interdisciplinary presupposes the consideration of multiple and distinct disciplines which in this book are considered in delineated chapters In addition the Editors make an editorial contribution in the final chapter of the book by combining these separate disciplinary perspectives to develop a nascent interdisciplinary perspective that integrates these perspectives and presents platforms for further research Trust in Food U. Kjaernes, M. Harvey, A. Warde, 2007-01-30 The BSE epidemic GM foods avian flu the growth of supermarkets and the crisis in obesity have shaken consumer trust in food Uncovering surprising differences between countries Trust in Food examines this and challenges the idea of the consumer as a sovereign

individual demonstrating how consumption is institutionalized within society **Culture, Catastrophe, and Rhetoric**

Robert Hariman, Ralph Cintron, 2015-10-01 This volume explores political culture especially the catastrophic elements of the global social order emerging in the twenty first century By emphasizing the texture of political action the book theorizes how social context becomes evident on the surface of events and analyzes the performative dimensions of political experience The attention to catastrophe allows for an understanding of how ordinary people contend with normal system operation once it is indistinguishable from system breakdown Through an array of case studies the book provides an account of change as it is experienced negotiated and resisted in specific settings that define a society's capacity for political action *The*

Moralization of the Markets Nico Stehr, Christoph Henning, Bernd Weiler, 2009-10-01 Nothing affects the modern economy and society more than decisions made in the marketplace especially but not only decisions made by consumers Although it is not startling to suggest that decisions made in production are affected by choices consumers make consumers have long been viewed not only by academic economists as individual isolated rational actors that make or refrain from purchases purely on the basis of narrow financial considerations Markets are not and never were morally neutral Market relations have always had an often taken for granted moral underpinning The moralization of the markets refers to the dissolution and replacement of the conventional moral underpinnings of market conduct for example in the music market financial markets and corporate governance It further implies not only the heightened importance of new ethical precepts but the significant change in the role of moral ideals in market behavior These profound transformations of economic conduct are accompanied and co determined by societal conflicts The moralization of markets represents thus a new stage in the social evolution of markets The book is divided into four parts in which the twelve chapters written by contributors from different social science disciplines deal with the context of the moralization of the markets the major social institutions and present case studies that examine European and American attitudes and behavior towards tobacco and GMO expansion of the private and ethics in business and how workers respond to the new corporate norms This new paperback edition will be of interest to sociologists economists social scientists and the general consumer alike Rethinking Consumer Behaviour for the Well-being of All

Council of Europe, 2008-01-01 This guide invites the reader to think about consumption as one factor in the difficult task of building cohesive sustainable societies based on the principle of universal well being The Council of Europe hopes that this reassessment will prompt people to question their choices as consumers taking account of human rights decent working conditions the sustainable use of resources and our legacy to future generations Surely consumption should be a responsible socially committed act An eclectic mix of academic articles examples and illustrations makes this guide an unusual informative work which can be readily used as the basis for discussions on this pressing social issue This book inspired by a contribution from the European Inter Network of Ethical and Solidarity Based Initiatives IRIS is intended as a prototype readers are free to adapt its contents to their own circumstances to add relevant examples and to bring the ideas presented

to life **Promoting Solidarity in the European Union** Malcolm G. Ross, Yuri Borgmann-Prebil, 2010 The EU claims that solidarity is a fundamental value underlying the European social model yet often stands accused of undermining solidarity by advancing market freedoms This book provides the first extended study of the idea of solidarity in the EU context from interdisciplinary perspectives analyzing its impact on law and policy
