Asian history politics sociology literary studies and social exclusion Re-orientalism and South Asian Identity Politics Lisa Lau, Ana Cristina Mendes, 2011 Orientalism refers to the imitation of aspects of Eastern cultures in the West and was devised in order to have authority over the Orient. The concept of Re Orientalism maintains the divide between the Orient and the West. However, where Orientalism is based on how the West constructs the East, Re Orientalism is grounded on how the cultural East comes to terms with an orientalist East. This book explores various new forms, objects and modes of circulation that sustain this renovated form of Orientalism in South Asian culture. The contributors identify and engage with recent debates about postcolonial South Asian identity politics, discussing a range of different texts and films such as *The White Tiger*, *Bride Prejudice* and *Kama Sutra: A Tale of Love*. Providing new theoretical insights from the areas of literature, film studies and cultural and discourse analysis, this book is an stimulating read for students and scholars interested in South Asian culture, postcolonial studies and identity politics The Politics of Personal Law in South Asia Partha S. Ghosh, 2018-05-11 The viability of the Uniform Civil Code (UCC) has always been a bone of contention in socially and politically plural South Asia. It is entangled within the polemics of identity politics, minority rights, women's rights, national integration, uniform citizenry and of late global Islamic politics and universal human rights. While champions of each category view the issue from their own perspectives, making the debate extremely complex, this book takes up the challenge of providing a holistic political analysis. As most of the South Asian states today subscribe to a decentralised view and share a common history, this study is an excellent comparative analysis of the applicability of the UCC. In this work, India figures prominently, being the most plural and vibrant democracy as well as accounting for almost three fourths of the region's population. This provides the backdrop for an analysis of the other states in the region. India in South Asia Sinderpal Singh, 2013-09-02 South Asia is one of the most volatile regions of the world and India s complex democratic political system impinges on its relations with its South Asian neighbours Focusing on this relationship this book explores the extent to which domestic politics affect a country s foreign policy The book argues that particular continuities and disjunctures in Indian foreign policy are linked to the way in which Indian elites articulated Indian identity in response to the needs of domestic politics The manner in which these state elites conceive India s region and regional role depends on their need to stay in tune with domestic identity politics Such exigencies have important implications for Indian foreign policy in South Asia Analysing India s foreign policy through the lens of competing domestic visions at three different historical eras in India s independent history the book provides a framework for studying India s developing nationhood on the basis of these idea s of India This approach allows for a deeper and a more nuanced interpretation of the motives for India s foreign policy choices than the traditional realist or neo liberal framework and provides a useful contribution to South Asian Studies Politics and International Studies Order and Security in Southeast Asia Ralf Emmers, Joseph
