Carmen, 2004 Ira Carmen seeks a fusion of experimental biological research and political science research as he explores the important and controversial realm of human genomics Politics in the Laboratory takes a close look at the ethical legal social constitutional and political implications of modern biological research It addresses both biopolicy issues and basic science including cloning embryonic stem cell investigations and experimentation involving the human germline from the perspective of a political scientist *The British National Bibliography* Arthur James Wells, 2005 Race and Ethnicity Kathleen Odell

Korgen, Maxine P. Atkinson, 2024-12-11 Race and Ethnicity Sociology in Action is an innovative text that combines comprehensive coverage of race and ethnicity content with active learning exercises seamlessly integrated into the chapters The book is written by a team of experienced instructors who use active learning techniques in their own classrooms These contributors expertly weave together content material active learning exercises discussion questions real world examples of sociologists in action and information on careers that use sociology The Second Edition includes updated data figures and examples as well as new information on many topics including interracial relationships immigrant groups diversity among Asian Americans racial discrimination in housing and building coalitions for racial justice **Chemical Heritage**, 2001

Cloning Stephen D. Fairbanks, 2004 The terms recombinant DNA technology DNA cloning molecular cloning or gene cloning all refer to the same process the transfer of a DNA fragment of interest from one organism to a self replicating genetic element such as a bacterial plasmid The DNA of interest can then be propagated in a foreign host cell This technology has been around since the 1970s and it has become a common practice in molecular biology labs today Reproductive cloning is a technology used to generate an animal that has the same nuclear DNA as another currently or previously existing animal Dolly was created by reproductive cloning technology In a process called somatic cell nuclear transfer SCNT scientists transfer genetic material from the nucleus of a donor adult cell to an egg whose nucleus and thus its genetic material has been removed The reconstructed egg containing the DNA from a donor cell must be treated with chemicals or electric current in order to stimulate cell division Once the cloned embryo reaches a suitable stage it is transferred to the uterus of a female host where it continues to develop until birth Therapeutic cloning also called embryo cloning is the production of human embryos for use in research The goal of this process is not to create cloned human beings but rather to harvest stem cells that can be used to study human development and to treat disease Stem cells are important

to biomedical researchers because they can be used to generate virtually any type of specialised cell in the human body This new book presents an up to date Chronology of Cloning along with current and selected abstracts dealing with cloning as well as a guide to books on the topic Access to the abstract and books sections is provided by title subject and author indexes
