Politics Markets And Americas Schools:

Politics, Markets, and America's Schools John E. Chubb, Terry M. Moe, 2011-09-01 During the 1980s widespread dissatisfaction with America's schools gave rise to a powerful movement for educational change and the nation's political institutions responded with aggressive reforms Chubb and Moe argue that these reforms are destined to fail because they do not get to the root of the problem The fundamental causes of poor academic performance they claim are not to be found in the schools but rather in the institutions of direct democratic control by which the schools have traditionally been governed Reformers fail to solve the problem when the institutions ARE the problem The authors recommend a new system of public education built around parent student choice and school competition that would promote school autonomy thus providing a firm foundation for genuine school improvement and superior student achievement Politics, Markets, and America's

Really Good Schools James Tooley, 2021-04-12 Almost overnight a virus has brought into question America's nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley's Really Good Schools A distinguished scholar of education and the world's foremost expert on private low cost innovative education Tooley takes readers to some of the world's most impoverished communities located in some of the world's most dangerous places including India and such war torn countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices

within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way

Learning from School Choice Paul E. Peterson, Bryan C. Hassel, 1998-07-01 While educators parents and policymakers are still debating the pros and cons of school choice it is now possible to learn from choice experiments in public private and charter schools across the country This book examines the evidence from these early school choice programs and looks at the larger implications of choice and competition in education Paul Peterson makes a strong case for school choice in central cities and coeditor Bryan Hassel offers the case for charter schools John E Brandl offers his vision of school governance in the next century The book's other contributors economists political scientists and education specialists provide case studies of the experience with voucher programs in Indianapolis San Antonio Cleveland and Milwaukee survey charter schools analyze public school choice discuss constitutional issues and study the effects of private education on democratic values Contributors include David J Armor George Mason University Chester E Finn Jr and Bruno V Manno Hudson Institute Caroline M Hoxby Harvard University Brett M Peiser Partnerships in Learning and Joseph P Viteritti New York University

A Primer on America's Schools Terry M. Moe, 2013-09-01 In this volume the eleven members of the Koret Task Force on K 12 Education provide a broad overview of the American education system pulling together basic facts about its structure and operation identifying key problems that hinder its performance and offering perspectives on the requirements of genuine reform

Political Spectacle and the Fate of American Schools Mary Lee Smith, Linda Miller-Kahn, Walter Heinecke, Patricia F. Jarvis, 2004-02-02 The authors argue that the most influential and well known educational policy programs in the past 30 years are not based on democratic consensus but are instead formulated by the political community as symbolic efforts meant to generate personal partisan gain

The Education Myth Jon

Shelton,2023-03-15 The Education Myth questions the idea that education represents the best if not the only way for Americans to access economic opportunity As Jon Shelton shows linking education to economic well being was not politically inevitable In the eighteenth and nineteenth centuries for instance public education was championed as a way to help citizens learn how to participate in a democracy By the 1930s public education along with union rights and social security formed an important component of a broad based fight for social democracy Shelton demonstrates that beginning in the 1960s the political power of the education myth choked off powerful social democratic alternatives like A Philip Randolph and Bayard Rustin s Freedom Budget The nation s political center was bereft of any realistic ideas to guarantee economic security and social dignity for the majority of Americans particularly those without college degrees Embraced first by Democrats like Lyndon Johnson Jimmy Carter and Bill Clinton Republicans like George W Bush also pushed the education myth The result over the past four decades has been the emergence of a deeply inequitable economy and a drastically divided political system

Losing America's Schools Nancy E. Bailey,2016-06-14 *Losing America s Schools The Fight to Reclaim Public Education* is a call to save one of the last great democratic institutions in America Corporatization charter schools misleading claims of skill gaps the loss of Separation of Church and State deprofessionalization and the over use of technology all threaten the existence of the schools that belong to all Americans This book addresses the problems surrounding those issues and is a tribute to the groups and individuals who are fighting draconian reforms in order to save our public schools It is the sequel to *Misguided Education Reform Debating the Impact on Students*

Politics in the American States Virginia Gray,Russell L. Hanson,Thad Kousser,2017-03-10 Winner of the 2017 Mac Jewell Enduring Contribution Award of the APSA s State Politics and Policy Section *Politics in the American States Eleventh Edition* brings together the high caliber research you expect from this trusted text with comprehensive and comparative analysis of the 50 states Fully updated for all major developments in the study of state level politics including capturing the results of the 2016 elections editors Virginia Gray Russell L Hanson and Thad Kousser bring insight and uncover the impact of key similarities and differences on the operation of the same basic political systems Students will appreciate the book s glossary the fully up to date tables and figures and the maps showcasing comparative data

People & Politics in Urban America Robert W. Kweit,2013-10-31 This revised textbook for courses on urban politics challenges the notion that the field is dominated by political economy showing that despite the undeniable importance of economic issues citizens do play a significant part in urban politics

School Choice and Social Controversy Stephen D. Sugarman, Frank R. Kemerer,2011-12-01 In this important new volume distinguished legal and public policy scholars address issues that are critical to the successful drafting and implementation of school choice programs yet are usually overlooked in the choice debate They explore whether school choice is a threat or an opportunity to the many children who are largely deprived of choice today and they offer a variety of perspectives with some authors enthusiastic others more skeptical The book begins with a discussion of the types and extent of school choice what is known

about its consequences and how politics has influenced its development. It then focuses on three important public policy issues: how school choice can revolutionize the way schools are financed; what policy interventions are necessary to increase the supply of choice schools; and how choice programs can be held accountable to parents and the state without undermining institutional autonomy. The book addresses legal issues including whether public and private choice schools will be required to observe student and teacher rights generally recognized in traditional public schools; how the religion and speech clauses of the First Amendment may affect the participation of religious schools in school choice programs; whether school choice will enhance or aggravate opportunities for racial justice; what the implications of school choice are for teacher unions and collective bargaining; and whether children with disabilities will be accommodated in school choice programs under federal disability law. Throughout the book, the authors offer recommendations for public policy development. The contributors are Jeffrey Henig, Robert Bulman, and David L. Kirp; Paul T. Hill, Robert M. O'Neil, Jesse H. Choper, Betsy Levin, William G. Buss, and Laura F. Rothstein; Stephen D. Sugarman is Agnes Roddy Robb Professor of Law at the University of California, Berkeley; Frank R. Kemerer is Regents Professor and director of the Center for
