Decision to Release Nuclear Weapons over Hiroshima and Nagasaki: A Historical Case Study Joe

Majerus,2015-01-01 The question of whether states pursue absolute or relative gains has divided neo realism and neo liberalism for quite some time now Thus whereas neo realists contend that states seek comparative advantages relative to others neo liberal scholars argue that they are primarily interested in absolute individual gains In applying social constructivist ideas however this book will demonstrate that such a preference for relative or absolute gains is not naturally predetermined but inextricably linked to the continual re construction of states national identities and interests By analyzing the Truman Administration s decision for using nuclear weapons against Hiroshima and Nagasaki this case study will show that American leaders were much more preoccupied with achieving absolute rather than relative gains Such absolute considerations were influenced by the pressures of an anarchic self help system specific domestic imperatives and the personal views of individual policy makers who believed that only swift socio economic recovery and the creation of a more peaceful security environment would ultimately ensure their country s long term international position **Congress and**

Political Psychology And Foreign Policy Eric Singer,Valerie M Hudson,2020-02-24 First published in 1992 One of the issues of particular interest to political psychologists centers around how foreign policy decisions are made The psychological phenomena that political psychologists examine have to do with how individuals perceive interpret feel about and react to their environment The political factors have to do with the activities involved in governing or the making of public policy that is with how the material and human resources of a collectivity are allocated The research presented in this volume addresses

6 key questions that link psychological and political processes and the chapters are organized around three conceptual clusters: perception studies, personality studies and studies of group dynamics. *Party Systems and Foreign Policy Change in Liberal Democracies* Angelos Chrysosgelos, 2020-12-22 How do political parties affect foreign policy? This book answers this question by exploring the role of party politics as source of foreign policy change in liberal democracies. The book shifts the focus from individual political parties to party systems as the context in which parties' ideologies receive precise content and their preferences are formed. The central claim is that foreign policy change arises from within transformed discursive contexts of party competition when a new language of politics that constitutes a new party's self-understanding of what they stand for and compete over emerges in a party system. By comparing cases of contested foreign policy change, the book shows how such transformations in party competition determine whether and when international pressures on a state will translate into decisions to institute foreign policy change and what degree of change will be ultimately implemented. With a novel framework which bridges concepts of international relations and comparative politics, the book will be of interest to researchers and students in the areas of international relations theory, foreign policy analysis and comparative politics and generally to anyone wanting to understand how and when parties, elections and voters contribute to international change.

Kyrgyzstan - Regime Security and Foreign Policy Kemel Toktomushev, 2016-10-04 Kyrgyzstan is an interesting example of a relatively weak state which for its brief period of independence has already ousted two presidents, experienced two revolutions, survived two interethnic conflicts and yet remained intact. This book explores this apparent paradox and argues that the schism between domestic and international dimensions of state and regime security is key to understanding the nature of Kyrgyz politics. The book shows how the foreign policy links to the Manas Air Base used by the US military and essential for supplying their forces in Afghanistan, the economic arrangements necessary for sustaining the base both inside and outside Kyrgyzstan and the myriad of different actors involved in all this combined to overshadow points of friction to ensure stable continuance of the status quo. Overall, the book shows how broad geopolitical forces and complex local factors together have a huge impact on the formation of Kyrgyz foreign policy. **Charting the Range of Black Politics** Michael Mitchell, 2017-07-05 The election of 2008 brought onto the national stage complexities arising when the member of a minority group assumes power over national political institutions. It also underlined the limits placed on that power by the double accountability such a figure faces. The question posed in this volume of the NPSR is: Might the ascendancy of President Obama lead to a deracialization of American politics or its opposite? The contributions to this volume examine this question in a variety of ways. David Wilson and Khalilah Brown Dean analyze black attitudes towards the candidates for the Democratic Party nomination in the presidential race of 2008. Lorenzo Morris asks how perceptions of race have defined expectations of the African American ambassadors to the United Nations. Horace Bartilow and Kihong Eom use a game theoretic approach to examine US drug strategies in the Caribbean. A works in progress section follows with personal reflections by Michael C.

Dawson and Andra Gillespe They relate how personal concerns and curiosities guide their research A book review section provides a discussion about works of interest to scholars studying black politics **State**, 1988 **Vital Statistics on American Politics** Jeffrey L.
