Religious Imagination John H.A. Dyck, Paul S. Rowe, Jens Zimmermann, 2010-06-10 *Politics and the Religious Imagination* is the product of a group of interdisciplinary scholars each analyzing the connections between religious narratives and the construction of regional and global politics combining a set of theoretical and philosophic insights with several case studies that represent varied geographies and religious customs The past decade has seen increasing interest in the links between religion and politics and this edited volume seeks to take religion seriously as a motivator of action Few studies have attempted to bring together the multi disciplinary work in this burgeoning field of study and this work takes a global perspective using a variety of contexts including East West relations to analyze the following key themes the constructive and destructive hermeneutics of religious stories the relevance and importance of religion as a dominant political narrative the rise of new stories among groups as agents of change the way that religious narratives help to define and constrain the Other the manipulation of religious stories for political benefit This work argues that it is insufficient to judge the relationship of religion and politics through mere institutional or quantitative lenses and this collection proves that while this promise of the

narrative part of the social imaginary has been recognized in political theory to a certain extent its influence in the realm of empirical political science has yet to be fully considered Combining the work of a wide range of experts this collection will be of great interests to scholars of politics philosophy religious studies and the literary influence of religion *The Permanence of the Political* Joseph M. Schwartz, 1995-11-13 Why have radical political theorists whose thinking inspired mass movements for democracy been so suspicious of political plurality According to Joseph Schwartz their doubts were involved with an effort to transcend politics Mistakenly equating all social difference with the harmful way in which particular interests dominated marketplace societies radical thinkers sought a comprehensive set of true human interests that would completely abolish political strife In extensive analyses of Rousseau Hegel Marx Lenin and Arendt Schwartz seeks to mediate the radical critique of democratic capitalist societies with the concern for pluralism evidenced in both liberal and postmodern thought He thus escapes the authoritarian potential of the radical position while appropriating its more democratic implications In Schwartz's view a reconstructed radical democratic theory of politics must sustain liberalism's defense of individual rights and social pluralism while redressing the liberal failure to question structural inequalities In proposing such a theory he criticizes communitarianism for its premodern longing for a monolithic virtuous society and challenges the politics of difference for its failure to question the undemocratic terrain of power on which difference is constructed In conclusion he maintains that an equitable distribution of power and resources among social groups necessitates not the transcendence of politics but its democratic expansion
