The book analyses how Turkish freshwater management is socially constructed as both an engineering discourse and a paternalistic bureaucratic transaction Such a construction stands in stark contrast to the water management discourse of the European Water Framework Directive WFD the European Union's common water policy Of all the issues faced in Turkish water management none are as important and problematic as the issue of complying with European Union EU accession criteria Not only is water socially economically and environmentally important its water management is a useful prism through which the EU accession process can be viewed as a whole It showcases the complementarities and divergences between Turkish and EU bureaucratic constructs and value systems Tourism Recreation Research, 2006 The Oxford Handbook of Symbolic Interactionism Wayne H. Integrating and Articulating Environments: A Challenge for Northern and Southern Europe F. Adaman, F. Goksen, J. Grolin, M. O'Brien, O. Seippel, E.U. Zenginobuz, 2015-03-14 A critical comparative exploration of the framing of environmental problems in Northern and Southern Europe The book addresses theoretical and empirical questions about environmental attitudes and behaviours politics and protest cultures and contexts **Chaos of Disciplines** Andrew Abbott, 2010-07-15 In this vital new study Andrew Abbott presents a fresh and daring analysis of the evolution and development of the social sciences Chaos of Disciplines reconsiders how knowledge actually changes and advances Challenging the accepted belief that social sciences are in a perpetual state of progress Abbott contends that disciplines instead cycle around an inevitable pattern of core principles New schools of thought then are less a reaction to an established order than they are a reinvention of fundamental concepts Chaos of Disciplines uses fractals to explain the patterns of disciplines and then applies them to key debates that surround the social sciences Abbott argues that knowledge in different disciplines is organized by common oppositions that function at any level of theoretical or methodological scale Opposing perspectives of thought and method then in fields ranging from history sociology and literature are to the contrary radically similar much like fractals they are each mutual reflections of their own distinctions Transgender Politics Jan Wickman, 2001 The Politics of Problem Definition David A. Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research New
