Politics Of Evaluation:

The Politics of Program Evaluation Dennis J. Palumbo, 1987 Evaluation and politics are related in a number of ways While programme evaluators have traditionally tried to be neutral objective and scientific in their assessment of programmes the results of evaluation are inherently political and are used by politicians programme administrators special interest groups and other stakeholders for political purposes The contributors argue that since evaluation cannot be divorced from its political context the political dimension must be understood in order to conduct effective evaluations *The Politics of Evaluation in International Organizations* Vytautas Jankauskas, Steffen Eckhard, 2023 This book explores the internal machinery of evaluation systems in international organizations and challenges the conventional understanding of evaluation as a value free activity The authors propose new ways of better reconciling evaluation politics with the need to gather reliable evidence to improve the functioning of the United Nations

The Politics of Evaluation David Taylor, Susan Balloch, 2005 Evaluation has become a central tool in the development of contemporary social policy Its widespread popularity is based on the need to provide evidence of the effectiveness of policies and programmes This book sees evaluation as an inherently political activity as much about forms of governance as scientific practice Using a wide range of examples from neighbourhood renewal health and social care and other aspects of social policy it relates practical issues in evaluation design to their political contexts *The Politics of Evaluation in International Organizations* Vytautas Jankauskas, Steffen Eckhard, 2023-04-26 Evaluation has become a key tool in assessing the performance of international organizations in fostering learning and in demonstrating accountability Within the United Nations UN system thousands of evaluators and consultants produce hundreds of evaluation reports worth millions of dollars every year But does evaluation really deliver on its promise of objective evidence and functional use By unravelling the internal machinery of evaluation systems in international organizations this book challenges the conventional understanding of evaluation as a value free activity Vytautas Jankauskas and Steffen Eckhard show how a seemingly neutral technocratic tool can serve as an instrument for power in global governance they demonstrate and explain how deeply politics are entrenched in the interests of evaluation stakeholders in the control and design of IO evaluation systems and to a lesser extent also in the content of evaluation reports The analysis draws on 120 research interviews with evaluators member state representatives and IO secretariat officials as well as on textual analysis of over 200 evaluation reports The investigation covers 21 UN system organizations including detailed case studies of the ILO IMF UNDP UN WOMEN IOM UNHCR FAO WHO and UNESCO Shedding light on the in effectiveness of evidence based policymaking the authors propose possible ways of better reconciling the observed evaluation politics with the need to gather reliable evidence that is used to improve the functioning of the United Nations The answer to evaluation politics is not to abandon evaluation or isolate it from the stakeholders but to acknowledge surrounding political interests and design evaluation systems accordingly Core Concepts in Evaluation Lori

Palumbo, 1987

Evaluation and politics are related in a number of ways While programme evaluators have traditionally tried to be neutral objective and scientific in their assessment of programmes the results of evaluation are inherently political and are used by politicians programme administrators special interest groups and other stakeholders for political purposes The effectiveness of evaluation depends upon incorporating political reality into evaluation This book takes the first steps to help evaluators do this The contributors distinguished evaluation researchers and policy analysts argue that since evaluation cannot be divorced from its political context the political dimension must be understood in order to conduct effective evaluations They provide diverse perspectives on the political nature of evaluation and the role of the evaluator in politics and policy

Evaluation for the Real World Colin Palfrey,Paul Thomas,Ceri Phillips,2012-06-13 Evaluation research findings should be a key element of the policy making process yet in reality they are often disregarded This valuable book examines the development of evaluation and its impact on public policy by analysing evaluation frameworks and criteria which are available when evaluating public policies and services It further examines the nature of evidence and its use and non use by decision makers and assesses the work of influential academics in the USA and UK in the context of evaluation and policy making The book emphasises the real world of decision makers in the public sector and recognises how political demands and economic pressures can affect the decisions of those who commission evaluation research while providing recommendations for policymakers on adopting a different approach to evaluation This is essential reading for under graduate and post graduate students of policy analysis and public sector management and those who are involved in the planning and evaluation of public policies and services **Public Policy and Program Evaluation** Evert

Vedung,2017-07-12 Evaluation is a controversial and little understood strategy of public governance control and decision making As early as classical antiquity scholars were summoned to court to counsel kings Public policy and program evaluation is a recent addition to the great chain of attempts to use the brainpower of scholars and scientists to further the interests of the state Evaluation scholars are asked to provide retrospective assessments of the implementation output and outcome of government measures in order to effect deeper understanding and well grounded decisions on the part of those in charge of government operations Evaluation is the process of distinguishing the worthwhile from the worthless the precious from the useless evaluation implies looking backward in order to be able to steer forward better Written from a political science perspective Public Policy and Program Evaluation provides an overview of the possibilities and limits of public sector evaluation Evert Vedung examines evaluation as a mechanism for monitoring systematizing and grading government activities and their results so that public officials in their future oriented work will be able to act as responsibly creatively and efficiently as possible Topics discussed include Evaluation Rationality and Theories of Public Management Models of Evaluation Internal or External Evaluation Impact Assessment as Tryout and Social Experimentation Process Evaluation and

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
