*The Social Politics of Research Collaboration* Gabriele Griffin, Katarina Hamberg, Britta Lundgren, 2013-06-07 The past two decades have seen an increasing emphasis on large and interdisciplinary research configurations such as research networks and centers of excellence including those in Social Sciences and Humanities research Little research has been undertaken however to understand how these new large research structures that are being called forth by research funders and research higher education institutions alike function socially and what the impact of operating within such structures is on those working within and those working with them Past writers have discussed the intra agentic operations of human researchers and the material laboratory environment in its broadest sense This volume is concerned with the social politics of research collaboration in relation to six key positions leaders of large research formations leaders of sub projects within large collaborations participant researchers junior and early career researchers advisory board members and those who look in from the outside such as researchers who are unfunded It explores the mostly unacknowledged but critical aspect of social structures in research discussing issues such as struggles over leadership styles the marginalization of researchers working cross disciplinarily power hierarchies and intellectual ownership and the silencing of dissent in research

**The Emotional Politics of Research Collaboration** Gabriele Griffin, Annelie Bränström-Öhman, Hildur Kalman, 2013-07-18 Research collaboration in the form of networks projects and centers has become one of the dominant modes of engaging in research especially funded research across all academic domains However there has been little research on the processes of such collaborations particularly their affective dimensions These as this volume demonstrates and as researchers know well are highly important yet mostly not directly engaged with when scientists work together even though they are experienced by everybody involved This volume is the first to consider questions such as how the naming of projects impacts on their accompanying affect scapes the policing or disciplining of emotions in research collaborations their accompanying tensions and how these might be managed and the challenges to trust between scientists that such collaborations present Drawing on theories of affect and literature on collaboration as well as on the contributors experiences of being involved in large scale research projects the volume also importantly deals directly with some of the key emotions that occur during research collaborations such as blame elation frustration alienation and belonging and suggests some ways in which one might engage productively with the affective dimensions of research collaboration

*The Politics of Academic Research* Matthew C. Ringgenberg,Chong Shu,Ingrid M. Werner,2023 We develop a novel measure of political slant in research to examine whether political ideology influences the content and use of academic research Our measure examines the frequency of citations from think tanks with different political ideologies and allows us to examine both the supply and demand for research We find that research in Economics and Political Science displays a liberal slant while Finance and Accounting research exhibits a conservative slant and these differences cannot be accounted for by variations in research topics We also find that the ideological slant of researchers is positively correlated with that of their Ph D institution and research conducted outside universities appears to cater more to the political party of the current President Finally political donations data confirms that the ideological slant we measure based on think tank citations aligns with the political values of researchers Our findings have important implications for the structure of research funding

**Peace** Charles Emanuel Martin,1929      **Handbook of Research on Curriculum** Philip Wesley Jackson,American Educational Research Association,1992 Provides information about a wide range of curricular issues affecting elementary and high school education exploring methodological and conceptual issues looking at the forces that shape the curriculum studying the impact of the curriculum on special groups of students and discussing conventional subjects like reading and math      Black Social Capital Marion Orr,1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore s African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn t necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore s decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide

school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change

**The Politics of Urban Development** Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories The Politics of Urban Development argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to

assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
