Politics Of Sierra Leone 1947 67:

Politics in Sierra Leone 1947-1967 John R. Cartwright, 1970-12-15 Sierra Leone is unique among African states in the extent of its commitment to competition between individuals and parties for political office. Until 1967 it maintained a political system marked by vigorous competition between parties and by numerous opportunities for the expression of diverse and discordant views despite the fact that the pressures working against open politics were no less severe than those found in neighbouring states. The dominant group in Sierra Leone politics from the start of decolonization in 1947 until the military coup of 1967 was the Sierra Leone Peoples Party, a loose coalition based on the common interests of the traditional rulers and the emerging bourgeoisie. Under the first Prime Minister Sir Milton Margai, this coalition maintained itself against electoral challenges by absorbing leaders of the opposition. However, growing dissatisfaction with the dominant Mende tribe and class discontent with the traditional rulers gradually eroded the position of these groups. In 1967, Sierra Leone passed the critical test of a competitive political system when the opposition party, the All Peoples Congress, defeated the SLPP and was called upon to form a government. This was the first time an opposition party in an independent tropical African state had come to power through the ballot box. Although the peaceful transfer of power was rudely shattered by a military coup, Sierra Leone had already demonstrated how firmly a competitive pattern of politics had been established and just over a year later an uprising of enlisted men against their officers restored the lawfully elected government, setting Sierra Leone once again on the path of a peaceful competition under constitutional rules. In this thorough and well-documented study, Dr Cartwright explains how Sierra Leone maintained this pattern of political competition. He concludes that the traditionally oriented political leadership was able to maintain its position because of the relatively slow rate of social change outside the political sphere and because of its own ability to adapt traditional patterns of behaviour to its new needs. He suggests that this traditional orientation played an important role in moderating the use of power by the new leaders and in making their position legitimate in the eyes of the people. Although primarily aimed at political scientists and particularly those with an interest in African politics, this study is also important to scholars in related disciplines who are interested in the social structures and forces that bear on political activity. Written in a simple, direct style, it can be read and appreciated by anyone who wishes an account of what happened in the politics of one of the most interesting of the English-speaking African states.

The Paradoxes of History and Memory in Post-Colonial Sierra Leone Sylvia Ojukutu-Macauley, Ismail Rashid, 2013-10-10 This anthology reflects the complex processes in the production of historical knowledge and memory about Sierra Leone and its diaspora since the 1960s The processes while emblematic of experiences in other parts of Africa contain their own distinctive features The fragments of these memories are etched in the psyche bodies and practices of Africans in Africa and other global landscapes and on the other

hand are embedded in the various discourses and historical narratives about the continent and its peoples. Even though Africans have reframed these discourses and narratives to reclaim and re-center their own worldviews, agency and experiences since independence, they remained until recently heavily sedimented with Western colonialist and racist ideas and frameworks. This anthology engages and interrogates the differing frameworks that have informed the different practices, professional as well as popular, of retelling the Sierra Leonean past. In a sense, therefore, it is concerned with the familiar outline of the story of the making and unmaking of an African nation and its constituent race, ethnic class and cultural fragments from colonialism to the present. Yet Sierra Leone, the oldest and quintessential British colony and most Pan African country in the continent, provides interesting twists to this familiar outline. The contributors to this volume, who consist of different generations of very accomplished and prominent scholars of Sierra Leone in Africa, the United States and Europe, provide their own distinctive reflections on these twists based on their research interests, which cover ethnicity, class, gender, identity, formation, nation building, resistance and social conflict. Their contributions engage various paradoxes and transformative moments in Sierra Leone and West African history. They also reflect the changing modes of historical practice and perspectives over the last fifty years of independence.

Human Rights in Sierra Leone, 1787-2016 John Idriss Lahai, 2018-10-16. This book offers an up-to-date comprehensive interdisciplinary analysis of the multifaceted and evolving experiences of human rights in Sierra Leone between the years 1787 and 2016. It provides a balanced coverage of the local and international conditions that frame the socio-cultural, political and economic context of human rights, its rise and fall, and concerns for the broader engendered issues of the transatlantic slave trade, colonialism, women's struggle for recognition, constitutional development, political independence, war and transitional justice, as well as contributive justice, which the author introduces to explain the consequences of the problems of the temporal nature of transitional justice and the crisis of donor fatigue towards peacebuilding activities, local government, democracy and constitutional reforms within Sierra Leone. While acknowledging the profound challenges associated with the promotion of human rights in an environment of uncertainty, political fragility, lawlessness and deprivation, John Idriss Lahai sheds light on the often constructive engagement of the people of Sierra Leone.

with a variety of societal conditions adverse or otherwise to influence constitutional change the emergent post conflict discourse on contributive justice and acceptable human rights practice This book will be of interest to scholars in West African history legal history African studies peace and conflict studies human rights and transitional justice Post-Conflict Governance in Sierra Leone Abubakar Hassan Kargbo, 2015 This book contains ten chapters and constitutes an attempt to discuss some of the key areas of governance in the country This text posits three main arguments First that promoting democratic good governance in Sierra Leone is an imperative that should be embarked upon by any government if it is to ensure socioeconomic and political development on the one hand and peace and security on the other Second that the process of promoting democratic good governance will not be an easy task and this is why any government should strive to be vigilant and extricate the country from dependence the fact remains that a successful good governance environment in Sierra Leone will depend on economic development Third that governance should be not only enhanced through ensuring adequate capacity but also constantly monitored and it should be a permanent phenomenon The need to strengthen links between and among the government civil society and the private sector cannot be overemphasized this is necessary to ensure the dynamism that should characterize a good governance environment This environment should include a new Sierra Leonean psyche that of the interests of the state first anchored in attitudinal and behavioral change In this book the author also attempts to determine how far Sierra Leone has gone in its practice of democratic good governance and the challenges it is facing in trying to do so He also makes recommendations on how these challenges could be surmounted
