Politics Of Weapons Innovation The Thor Jupiter Controversy:

The Politics of Weapons Innovation Michael H. Armacost, 1969 **The Dynamics of Foreign Policy Analysis** Vincent A. Auger, 1996 In this significant new book Vincent Auger uses the case of the neutron bomb to examine the development of a dynamic theory of foreign policy analysis during the Carter Administration The neutron bomb episode Auger argues provides a unique opportunity for an analysis of the evolution of internal executive branch decision making Because the author uses interviews and declassified documents from the Carter Presidential Library which were previously unavailable this book fills an important gap in the scholarship on the Carter Administration s foreign policy As an illustration of how political science theory can be tested in a case study this book will be invaluable for students and scholars of foreign policy analysis international relations and U S policy history *The State, Society, and Limited Nuclear War* Eric Mlyn, 1995-02-01 Drawing on theories of the state archives and interviews with top defense policymakers this book tells an important story of interest to any reader concerned with how security policy is fashioned in the United States *Global Security Cultures* Mary Kaldor, 2018-05-21 Why do politicians think that war is the answer to terror when military intervention in Iraq Afghanistan Pakistan Syria Mali Somalia and elsewhere has made things worse Why do some conflicts never end And how is it that practices like beheadings extra judicial killings the bombing of hospitals and schools and sexual slavery are becoming increasingly common In this book renowned scholar of war and human security Mary Kaldor introduces the concept of global security cultures in order to explain why we get stuck in particular pathways to security A global security culture she explains involves different combinations of ideas narratives rules people tools practices and infrastructure embedded in a specific form of political authority a set of power relations that come together to address or engage in large scale violence In contrast to the Cold War period when there was one dominant culture based on military forces and nation states nowadays there are competing global security cultures Defining four main types geo politics new wars the liberal peace and the war on terror she investigates how we might identify contradictions dilemmas and experiments in contemporary security cultures that might ultimately open up new pathways to rescue and safeguard civility in the future **March to Armageddon** Ronald E. Powaski, 1987 Ronald E Powaski offers the first complete accessible history of the events forces and factors that have brought the world to the brink of a nuclear holocaust He traces the evolution of the nuclear arms race from FDR s decision to develop an atomic bomb to Reagan s decision to continue its expansion in the 1980 s Focusing on the forces that have propelled the arms race and the reasons behind the repeated failures to check the proliferation of nuclear weapons Powaski discusses such topics as the Manhattan Project the decision to drop the bomb on Hiroshima the debate over whether to share atomic information the effect of nuclear weapons on U S military and foreign policy and the role of these weapons in arms control negotiations in the last five presidential administrations **Nato--the Next Thirty Years** Kenneth A. Myers, 2019-03-04 The survival of NATO as a viable alliance is currently challenged by a shift in the strategic balance of

power as well as by global events and contingencies that extend far beyond NATO's boundaries. In the face of these challenges, existing institutional mechanisms are proving inadequate to respond effectively. The distinguished contributors to this volume draw on their vast political and diplomatic experience to identify and analyze the problems confronting NATO for the remainder of the twentieth century. They make clear the need for a trans-Atlantic communication network among policymakers, scholars, and others, a network that will allow an ongoing process of analysis and assessment of NATO's strategic, economic, and political problems along with the identification of appropriate reactions.

Strategic Studies and Public Policy Colin S. Gray, 2021-09-15 Strategic studies as a field of civilian scholarship has developed along distinctive lines in the United States since World War II. The rapid proliferation and increasing sophistication of weapons technology have required constant revision of strategic theory, while the shifting political climate both internationally and in the United States has had an equally powerful impact. One of the field's leading theorists now examines the history and development of American strategic studies, the varied roles assumed by civilian strategists, and their relationship with those charged with developing and carrying out American military and diplomatic policy. This provocative book clearly demonstrates the importance of a sound strategic theory if America is to survive in an age of high arms technology and increased world tensions.

Technology and War Martin Van Creveld, 2010-05-11 In this impressive work, van Creveld considers man's use of technology over the past 4,000 years and its impact on military organization, weaponry, logistics, intelligence, communications, transportation, and command. This revised paperback edition has been updated to include an account of the range of technology in the recent Gulf War.

Ambiguity and Deterrence John Baylis, 1995 This text focuses on the disagreements which existed in British political and military circles over nuclear strategy directly after World War II. Based on recently released documents, it argues that British policy in this important area was much more ambiguous than is commonly supposed.

National and International Security Michael Sheehan, 2018-01-18 This title was first published in 2000. This series brings together significant journal articles appearing in the field of comparative politics over the past 30 years. The aim is to render accessible to teachers, researchers, and students an extensive range of essays to provide a basis for understanding the established terrain and new ground. This volume introduces the undergraduate to a significant body of the periodical literature on the subject of national and international security.

Redundancy in Public Transit: Structure, competition, and reliability in planning and operations, 1980

Analyzing Soviet Strategic Arms Decisions Karl F. Spielfmann, 2019-03-13 The importance to Western policymakers of determining the significance of Soviet strategic arms decisions is matched by the difficulty of doing so. The high stakes involved and in many cases the inadequacy of evidence can all too easily lead to generalizations that rest more on passionate conviction than on accepted principles of scholarly inquiry.

Parallel Systems Jonathan Bendor, 2023-11-10 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and

cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1985 *The Transformation of Italian Armed Forces in Comparative Perspective* Fabrizio Coticchia, Francesco N. Moro, 2016-03-09 European armed forces have undergone deep changes in the past two decades Given the breadth of the debate and the size of transformations that took place it is somewhat surprising that relatively few academic studies have directly dealt with changes in force structure of European militaries and the Italian armed forces in particular The focus of this book is the organizational dimension of the restructuring of armed forces through 3 different lenses doctrine and strategic framework budget and resource allocation and force structure and deployment The key issues addressed relate to how these factors interact in shaping transformation Of particular interest is the theme of learning which is how armed forces endogenize change in the short and long run This study provides valuable insights into the extent to which armed forces manage to adapt to the emerging strategic and operational challenges they have to face and to illustrate the weight of institutional legacies resource constraints and inter organizational learning in shaping transformation Focusing on the Italian case in comparative perspective and based on a large variety of military operations from airstrikes to peacekeeping and counterinsurgency the book provides an innovative viewpoint on military transformation and significantly contributes to our understanding of contemporary security that is deeply shaped by the lessons learnt in Afghanistan Lebanon Iraq and Libya The Sputnik Challenge Robert A. Divine, 1993-03-25 On October 4 1957 the Soviet Union launched a 184 pound metal ball called Sputnik into orbit around the Earth and America plummeted into a panic Nuclear weapon designer Edward Teller claimed that the United States had lost a battle more important and greater than Pearl Harbor and magazine articles appeared with such headlines as Are We Americans Going Soft In the White House President Eisenhower seemed to do nothing leading Kennedy in 1960 to proclaim a missile gap in the Soviet s favor Rarely has public perception been so dramatically at odds with reality In The Sputnik Challenge Robert Divine provides a fascinating look at Eisenhower s handling of the early space race a story of public uproar secret U 2 flights bungled missile tests the first spy satellite political maneuvering and scientific triumph He recreates the national hysteria over the first two Sputnik launches illustrating the anxious handwringing that the Democrats led by Senate Majority Leader Lyndon Johnson aggressively played for political gain Divine takes us to private White House meetings showing how Eisenhower worked closely with science adviser James Killian allowing him to take the lead in creating a civilian agency NASA which provided intelligent and forceful leadership for American space programs But the President also knew from priceless intelligence from U 2 flights over the U S S R that he had little to fear from the touted missile gap and he fought to limit the growth and multiplication of military missile programs Eisenhower s assurance however rested on classified information and he did little to instill his confidence in the public Nor could he boast of his early support for the secret spy satellite program which quickly replaced the U 2 plane

after Gary Powers was shot down in 1960 So the public continued to worry feeding the national movement for educational reform as well as congressional maneuvering over funding for numerous strategic projects Eisenhower Divine writes possessed keen strategic vision and a sure sense of budgetary priorities but ultimately he flunked a crucial test of leadership when he failed to reassure the frightened public that their fears were groundless As a result he ultimately failed in his goal to limit military spending as well which led to a real missile gap in reverse Incisively written and deeply researched *The Sputnik Challenge* provides a briskly paced history of the origins of NASA the space race and the age of the ICBM **Robotics, Autonomous Systems and Contemporary International Security** Ash Rossiter, 2020-12-17 Rapid technological advances in the field of robotics and autonomous systems RAS are transforming the international security environment and the conduct of contemporary conflict Bringing together leading experts from across the globe this book provides timely analysis on the current and future challenges associated with greater utilization of RAS by states their militaries and a host of non state actors Technologically driven change in the international security environment can come about through the development of one significant technology such as the atomic bomb At other times it results from several technologies maturing at roughly the same pace This second image better reflects the rapid technological change that is taking us into the robotics age Many of the chapters in this edited volume explore unresolved ethical legal and operational challenges that are only likely to become more complex as RAS technology matures Though the precise ways in which the impact of autonomous systems both physical and non physical will be felt in the long run is hidden from us attempting to anticipate the direction of travel remains an important undertaking and one that this book makes a critical effort to contend with The chapters in this book were originally published as a special issue of the journal *Small Wars Insurgencies* *History of the Office of the Secretary of Defense* Alfred Goldberg, Steven L. Rearden, 1984 Strategic Power Carl G. Jacobsen, 1990-02-23 This book highlights the impact and relevance of strategic culture Each section contains essays contrasting United States and Soviet perceptions on specific topics Each section closes with a synthesizing commentary to help readers to get a better sense of differences and similarities One Hundred Years of Sea Power George W. Baer, 1996-07-01 A navy is a state's main instrument of maritime force What it should do what doctrine it holds what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs Choices are made according to the state's goals perceived threat maritime opportunity technological capabilities practical experience and not the least the way the sea service defines itself and its way of war This book is a history of the modern U S Navy It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine
