## **Polymers In Medicine Biomedical And Pharmaceutical Applications:**

**Polymers in Medicine II** E. Chiellini, 2012-12-06 Polymers and polymer based composites have gained increasingly larger applications in medicine and surgery Presently most biomaterials applications rely on industrial substances that were initially developed by industry for non medical purposes Moreover polymers have been often used regardless of their peculiar characteristics which can be viceversa and very attractive for some specific applications In the past years we have assisted to a significative and faster development of polymer science as well as of medicine and surgery The assistance of computer aided apparatus the use of always more advanced instruments the larger interest of the academic and industrial world bring continuously new contributions to the research on biomedical and pharmaceutical use of polymers The need of a forum where these specific researchs can be presented and discussed and the success of the 1st Conference on Polymers in Medicine held in Porto Cervo in 1982 have encouraged the Editors to plan a periodical meeting focused on polymers and composites to be held every odd year This book contains papers selected by an International Scientific Committee among those presented at the 2nd International Conference on Polymers in Medicine Biomedical and Pharmaceutical Applications held in Capri Italy 3-7 June 1985 In addition to contributed papers several Authors were invited to present the state of the art as well as their personal contribution on specific key arguments The level of all contributions was high the participation well qualified and the meeting interesting and hopefully pleasant

Polymers in Medicine Emo Chiellini, Paolo Giusti, 2013-03-09 This book contains the collected papers presented at the International Symposium on Polymers in Medicine Biomedical and Pharmaceutical Applications which was held at Porto Cervo Italy May 24-28 1982 To the best of our knowledge this symposium was the first to be organized in Italy entirely devoted to the several aspects of the use of synthetic and semisynthetic macromolecular materials in the field of biomedical and pharmacological applications The intention of the Organizing Committee of the symposium was the promotion of a scientific and cultural initiative to gain the attention of various experts in line research of the potential of suitably designed man made polymeric materials in biomedical applications With highly qualified and worldwide attendance the above goal was fully satisfied Indeed the opportunity of meeting together in a well conceived and discreet corner of the world scientists with different cultural backgrounds and objectives helped extend the meaning of the symposium far beyond the Italian borders and the perspectives of the National Research Council of Italy CNR the major sponsor of the meeting

Cosmetic and Pharmaceutical Applications of Polymers T. Cheng,C.G. Gebelein,Victor C. Yang,2012-12-06 Polymers continue to show almost amazing versatility We have always known that polymers could be used for trinkets toys and dishes Now however we are no longer surprised to encounter these adaptable materials in almost every place we look We find them in our cars tools electronic devices building materials etc The use of polymeric materials in medicine is also well documented in previous books by one of the Editors Gebelein and by others Likewise the use of polymeric materials in pharmaceutical applications especially in controlled release systems is also well established Nevertheless the use of these ubiquitous chemicals is far less obvious in the field of cosmetics although modern cosmetic preparations rely heavily on polymers and this trend is certain to increase This book brings together much of the basic information on polymers in cosmetics and compares this usage with similar applications in pharmaceutical and medical applications Cosmetics like medicine and pharmacy dates back to antiquity We can find uses of perfumes balms and ointments in various old books such as the Bible For example the use of ointments and balms is noted more than thirty eight times and perfumes and related materials are cited at least twenty nine times in the Bible
