A photograph of a Polynesian person, likely a woman, with dark hair, shirtless, and kneeling on the ground. She is using a knife to cut or grate a piece of light-colored, fibrous material (possibly a root or tuber) into a shallow, light-colored bowl. The background is a blurred natural setting with green foliage and a tree trunk on the left.

Polynesian Herbal Medicine:

Polynesian Herbal Medicine W. Arthur Whistler, 1992 The aim of this book is to present a picture of past and present Polynesian medicinal plants Although several books have been published on herbal medicine in Polynesia these are either limited in geographic scope mostly to Hawai i or are unscientific in basis Restricting the study of herbal medicine to a single Polynesian island or archipelago is a disadvantage because the early accounts of medicinal practices are so sketchy A more comprehensive approach is rewarding because so much can be learned from the similarities among the various Polynesian cultures A scientific approach is necessary because of the nature of the subject medicine and plants To establish a comprehensive and scientific basis for this book three types of research were conducted 1 an extensive review of the literature on Polynesia 2 interviews with scores of Polynesian healers in Hawai i Samoa Tonga Tahiti the Cook Islands and Tokelau and 3 botanical collecting work in Polynesia over a twenty year period involving over forty research trips to the South Pacific from the Preface

Samoan Herbal Medicine W. Arthur Whistler, 1996 Two systems of health care exist side by side in Samoa Samoan medicine and Western medicine Western medicine is centered in three hospitals Moto otua Hospital near Apia Tuasivi Hospital on Savai i and the Lyndon B Johnson Tropical Medical Center in American Samoa There are also a series of rural clinics especially on Savai i that are staffed by district nurses The doctors foma i at the Western Samoan hospitals have either a Diploma of Medicine from the Fiji School of Medicine or an M D from New Zealand or elsewhere and there are usually a few P lagi Western M D s and interns from overseas who work along with them The doctors in American Samoa are M D s from the U S or elsewhere and serve on contract for two or more years In most of the world Western medicine has demonstrated its superiority over indigenous medical practices but this is not the case in Samoa at least not for all ailments The first line of defense for many Samoans particularly for infants is Samoan medicine This is not due to isolation because most districts have a clinic and the majority of the population is less than an hour s bus or car ride from one of the three hospitals noted above However a clinic staffed by a nurse is not the same as a hospital staffed by doctors and medical equipment Savai i is particularly weak in this area since the one hospital is now 1994 being rebuilt and often there are no more than two doctors for the entire island The two systems are in direct competition but there is very little conflict or tension The doctors may think of the fof the traditional healers as witch doctors and the fof may confidently believe that the Western doctors just do not have the power to heal Samoan ailments but there is little friction Fof recognize a dichotomy in ailments with some classified as Samoan illnesses ma i S moa and others as Western illnesses ma i P lagi They usually treat only the former type which they consider indigenous if the fof determine that the illness of a prospective patient belongs to the latter type which is considered to be introduced by Westerners and they do not have a medicine to treat it the patient will

be directed to a hospital or clinic Likewise some Western doctors may send patients to fof if they believe that the ailment is not readily treatable with Western medicines or is psychological and is best treated by traditional Samoan means However referral from doctor to fof is less common than the reverse Instead of open friction there is mutual tolerance and even some cooperation between the two systems In its village public health programs the Western Samoan Health Department has sought out village women women s committee members some of them being established fof The health department representatives the district nurses living and working in the village may even believe in Samoan medicine even if they do not they may refrain from condemning the practice in order to maintain harmony with their patients and village The Health Department has even officially recognized some of the fof and supplies them with items such as gauze for use in the preparation of Samoan medicine

Biodiversity, Access and Benefit-Sharing Daniel F. Robinson, 2014-11-13 The Nagoya Protocol to the Convention on Biological Diversity CBD is rapidly receiving signatures and ratifications Many countries are preparing to implement the protocol through national research permit systems and or biodiversity laws Yet there is still considerable confusion about how to implement the Protocol regarding access and benefit sharing ABS procedures and minimal experience in many countries This book

seeks to remedy this gap in understanding by analysing a number of ABS case studies in light of the Nagoya Protocol. The case studies are wide ranging with examples of plants for medicinal, cosmetic, biotech and food products from or for development in Australia, North Africa, Madagascar, Switzerland, Thailand, USA and Oceania. These will encourage countries to develop national systems which maximise their benefits both monetary and non monetary towards conservation and support for local communities that hold traditional knowledge. In addition, the author analyses new expectations raised by the Nagoya Protocol such as the encouragement of the development of community protocols by indigenous and local communities. As a result, stakeholders and policy makers will be able to learn the steps involved in establishing ABS agreements, issues that arise between stakeholders and the types of benefits that might be realistic.
