Ponape Alfred Louis Kroeber, Eugene A. Hammel, William Russell Bascom, 1960 Ethnobotany of Pohnpei Michael J. Balick, 2009-02-26 Ethnobotany of Pohnpei examines the relationship between plants people and traditional culture on Pohnpei one of the four island members of the Federated States of Micronesia Traditional culture is still very strong on Pohnpei and is biodiversity dependent relying on both its pristine habitats and managed landscapes native and introduced plants and animals and extraordinary marine life This book is the result of a decade of research by a team of local people and international specialists carried out under the direction of the Mwoalen Wahu Ileilehn Pohnpei Pohnpei Council of Traditional Leaders It discusses the uses of the native and introduced plant species that have sustained human life on the island and its outlying atolls for generations including Piper methysticum locally known as sakau and recognized throughout the Pacific as kava which is essential in defining cultural identity for Pohnpeians The work also focuses on ethnomedicine the traditional medical system used to address health conditions and its associated beliefs Pohnpei and indeed the Micronesian region is one of the world's great centers of botanical endemism it is home to many plant species found nowhere else on earth The ultimate goal of this volume is to give readers a sense of the traditional ethnobotanical knowledge that still exists in the area to make them aware of its vulnerability to modernization and to encourage local people to respect this ancient knowledge and keep such practices alive It presents the findings of the most comprehensive ethnobotanical study undertaken to date in this part of Micronesia and sets a new standard for transdisciplinary research and collaboration **Pacific Islanders**

Under German Rule Peter J. Hempenstall, 2016-06-01 This is an important book It is a reprint of the first detailed study of how Pacific Islanders responded politically and economically to their rulers across the German empire of the Pacific Under one cover it captures the variety of interactions between the various German colonial administrations with their separate approaches and the leaders and people of Samoa in Polynesia the major island centre of Pohnpei in Micronesia and the indigenes of New Guinea Drawing on anthropology new Pacific history insights and a range of theoretical works on African and Asian resistance from the 1960s and 1970s it reveals the complexities of Islander reactions and the nature of protests against German imperial rule It casts aside old assumptions that colonised peoples always resisted European colonisers Instead this book argues convincingly that Islander responses were often intelligent and subtle manipulations of their rulers agendas their societies dynamic enough to make their own adjustments to the demands of empire It does not shy away from major blunders by German colonial administrators nor from the strategic and tactical mistakes of Islander leaders At the same time it raises the profile of several large personalities on both sides of the colonial frontier including Lauaki Namulau ulu Mamoe and Wilhelm Solf in Samoa Henry Nanpei Georg Fritz and Karl Boeder in Pohnpei or Governor Albert Hahl and Po Minis from Manus Island in New Guinea **War in the American Pacific and East Asia, 1941-1972** Hal M.

Friedman,2019-02-22 Before 1940 the Japanese empire stood as the greatest single threat to the American presence in the Pacific and East Asia To a lesser degree the formerly hegemonic colonial powers of Britain France and the Netherlands still controlled portions of the region At the same time subjugated peoples in East Asia and Southeast Asia struggled to throw off colonialism By the late 1930s the competition exploded into armed conflict Japan looked like the early victor but the United States eventually established itself as the hegemonic power in the Pacific Basin by 1945 Yet when it comes to the American movement out into the Pacific there is more to the story that has yet to be revealed In War in the American Pacific and East Asia 1941 1972 editor Hal Friedman brings together nine essays that explore lesser known aspects and consequences of America s military expansion into the Pacific during and after World War II This study explores how the United States won the Pacific War against Japan and how it sought to secure that victory in the decades that followed ensure it never endured another Pearl Harbor style defeat and saw the Pacific fulfill a Manifest Destiny like role as an American frontier projected toward East Asia The collection explores the role of the US military in the Pacific Basin in different ways by presenting essays on interservice rivalry and military advising as well as unique topics that are new to military history such as the investigations of strategic communications military public relations institutional cultures of elite forces foodways and the military s interaction with the press Together these essays provide a path for historians to pursue groundbreaking areas of research about the Pacific and establish the Pacific War as the pivotal point in the twentieth century in the Pacific Basin

The Oxford Handbook of Prehistoric Oceania Ethan E. Cochrane,Terry L. Hunt,2018 Oceania was the last region on earth to be permanently inhabited with the final settlers reaching Aotearoa New Zealand approximately AD 1300 This is about the same time that related Polynesian populations began erecting Easter Island s gigantic statues farming the valley slopes of Tahiti and similar islands and moving finely made basalt tools over several thousand kilometers of open ocean between Hawai i the Marquesas the Cook Islands and archipelagos in between The remarkable prehistory of Polynesia is one chapter of Oceania s human story Almost 50 000 years prior people entered Oceania for the first time arriving in New Guinea and its northern offshore islands shortly thereafter a biogeographic region labelled Near Oceania and including parts of Melanesia Near Oceania saw the independent development of agriculture and has a complex history resulting in the greatest linguistic diversity in the world Beginning 1000 BC after millennia of gradually accelerating cultural change in Near Oceania some groups sailed east from this space of inter visible islands and entered Remote Oceania rapidly colonizing the widely separated separated archipelagos from Vanuatu to S moa with purposeful return voyages and carrying an intricately decorated pottery called Lapita From this common cultural foundation these populations developed separate but occasionally connected cultural traditions over the next 3000 years Western Micronesia the archipelagos of Palau Guam and the Marianas was also colonized around 1500 BC by canoes arriving from the west beginning equally long sequences of increasingly complex social formations exchange relationships and monumental constructions All of these topics and others are presented

in The Oxford Handbook of Prehistoric Oceania written by Oceania's leading archaeologists and allied researchers. Chapters describe the cultural sequences of the region's major island groups, provide the most recent explanations for diversity and change in Oceanic prehistory, and lay the foundation for the next generation of research. *General Technical Report PSW.*

,1978 Measuring Soil and Tree Temperatures During Prescribed Fires with Thermocouple Probes Stephen S.

Sackett,1992 Soil and cambium temperatures must be known to ascertain certain effects of prescribed fires on trees

Thermocouple based systems were devised for measuring soil and cambium temperatures during prescribed fires. The systems, which incorporate both commercially available and custom components, perform three basic functions: data collection, data retrieval, and data translation. Although the systems and procedures for using them were designed for research purposes, they could be adapted for monitoring operational prescribed fires. **History of Soybeans and Soyfoods in Australia,**

Edited by America's best known folklore authority. **Bountiful Island** David Damas,2006-01-01 In Bountiful Island, a major Arctic scholar turns his eye on

Micronesia. The small and isolated atoll of Pingelap in Micronesia lies in a moist climatic belt which encourages abundant plant life, including such food plants as coconuts, breadfruit, and taro. In this detailed examination of land tenure practices in the atoll, David Damas argues that the resulting high level of subsistence has brought an expansion of the population, which has put great pressures on land. Under these pressures, land tenure has moved from communal usage to lineage control to individual ownership and transmission rights. Comparative material from neighbouring Mwaekil atoll indicates the same general succession from larger to smaller units of tenure with increasing population. While control of land by kin groups is usual in the Pacific, other atoll societies show examples of individual tenure, which also relate to changes in population densities. Subsequent depopulation and emigration have not altered the fundamentals of the land tenure system, but have led to the emergence of a pattern of land stewardship. This has resulted in imbalances between the holdings of resident cultivators and those of absentee landowners. Comparative material from neighbouring Mwaekil atoll indicates the same general succession from larger to smaller units of tenure with increasing population. While control of land by kin groups is usual in the Pacific, other atoll societies show examples of individual tenure, which also relate to changes in population.
