Pre-Columbian Foodways John Staller,Michael Carrasco,2009-11-24 The significance of food and feasting to Pre Columbian Mesoamerican cultures has been extensively studied by archaeologists anthropologists and art historians Foodways studies have been critical to our understanding of early agriculture political economies and the domestication and management of plants and animals Scholars from diverse fields have explored the symbolic complexity of food and its preparation as well as the social importance of feasting in contemporary and historical societies This book unites these disciplinary perspectives from the social and biological sciences to art history and epigraphy creating a work comprehensive in scope which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures The volume is organized thematically into three sections Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica Part 2 details ethnographic epigraphic and isotopic evidence of these practices Finally Part 3 presents the metaphoric value of food in Mesoamerican symbolism ritual and mythology The resulting volume provides a thorough interdisciplinary resource for understanding food feasting and cultural practices in Mesoamerica

The American Southwest and Mesoamerica Jonathon E. Ericson,Timothy G. Baugh,2013-11-11 Regional approaches to the study of prehistoric exchange have generated much new knowledge about intergroup and regional interaction The American South west and Mesoamerica Systems of Prehistoric Exchange is the first of two volumes that seek to provide current information regarding regional exchange on a conti nental basis From a theoretical perspective these volumes provide important data for the comparative analysis of regional systems relative to sociopolitical organization from simple hunter gatherers to those of complex sociopolitical entities like the state Although individual regional exchange systems are unique for each region and time period general patterns emerge relative to sOciopolitical organization Of significant interest to us are the dynamic processes of change stability rate of growth and collapse of regional exchange systems relative to sociopolitical complexity These volumes provide basic data to further our under standing of prehistoric exchange systems The volume presents our current state of knowledge about regional exchange systems in the American Southwest and Mesoamerica Each chapter synthesizes the research findings of a number of other researchers in order to provide a synchronic view of regional interaction for a specific chronological period A

diachronic view is also provided for regional interaction in the context of the developments in regional Sociopolitical organization Most authors go beyond description by proposing alternative models within which to understand regional interaction The book is organized by geographical and chronological divisions to provide units of the broader mosaic of prehistoric exchange systems

Energy at the Surface of the Earth David H. Miller, 2016-06-03 Energy at the Surface of the Earth An Introduction to the Energetics of Ecosystems presents way of looking at the manner in which the biological physical and cultural systems that mantle the landmasses of our planet receive transform and give off energy which is an essential condition of existence that takes many forms Energy conversions establish the climate in which these systems operate The principal forms of energy that are converted at the ecosystem scale include radiant latent mechanical chemical and fossil and thermal The book begins with radiant energy absorbed by ecosystems a phenomenon that is independent of their surface temperature and that can be looked on as a burden or a gift depending on circumstances An increase in such absorption raises surface temperature as described in the fulcrum chapter of the book Chapter VIII This increase in turn sets into action outflows of energy that by the first law of thermodynamics are equal in energy units although not necessarily equal in quality to the inflows The final chapters deal with vertical stratification and areal contrasts in energy budgets the augmented energy budget of the city and the responses that serve to keep the budget balanced

The Earth as Transformed by Human Action B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 The Earth as Transformed by Human Action is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to

document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere

The Oxford Handbook of Historical Ecology and Applied Archaeology Christian Isendahl, Daryl Stump, 2019-01-10 The Oxford Handbook of Historical Ecology and Applied Archaeology presents theoretical discussions methodological outlines and case studies describing the field of overlap between historical ecology and the emerging sub discipline of applied archaeology to highlight how modern environments and landscapes have been shaped by humans Historical ecology is based on the recognition that humans are not only capable of modifying their environments but that all environments on earth have already been directly or indirectly modified This includes anthropogenic climate change widespread deforestations and species extinctions but also very local alterations the effects of which may last a few years or may have legacies lasting centuries or more With contributions from anthropologists archaeologists human geographers and historians this volume focuses not just on defining human impacts in the past but on the ways that understanding these changes can help inform contemporary practices and development policies Some chapters present examples of how ancient or current societies have modified their environments in sustainable ways while others highlight practices that had unintended long term consequences The possibilities of learning from these practices are discussed as is the potential of using the long history of human resource exploitation as a method for building or testing models of future change The volume offers overviews for students researchers and professionals with an interest in conservation or development projects who want to understand what practical insights can be drawn from history and who seek to apply their work to contemporary issues

The Archaeology of Caribbean and Circum-Caribbean Farmers (6000 BC - AD 1500) Basil Reid, 2018-05-16 Comprising 17 chapters and with a wide geographic reach stretching from the Florida Keys in the north to the Guianas in the south this volume places a well needed academic spotlight on what is generally considered an integral topic in Caribbean and circum Caribbean archaeology The book explores a variety of issues including the introduction and dispersal of early cultivars plant manipulation animal domestication dietary profiles and landscape modifications Tried and true and novel analytical techniques are used to tease out aspects of the Caribbean and circum Caribbean database that inform the complex and often subtle processes of domestication under varying socio environmental conditions Contributors discuss their findings within multiple constructs such as neolithisation social interaction trade mobility social complexity migration colonisation and historical ecology Multiple data sources are used which include but are not restricted to rock art cooking pits and pots stable isotopes dental calculus and pathologies starch grains and proxies for past environmental conditions Given its multi disciplinary approaches this volume should be of immense value to both
