Precedents in Architecture Roger H. Clark, Michael Pause, 2015-08-24 **Virtual Vernacular** Sarah Bonser, 2020-03-26 Learn to see the patterns and relationships in visual mediums and buildings as you push the boundaries of design Sarah Bonser s Virtual Vernacular breaks the barriers between architectural theory and game design The text explores the way in which architecture can convey history culture and emotion to occupants audience members and players Divided into three sections the text guides the reader on how to tackle creative problem solving and development strategy Key Features Architectural theory is hard to navigate and this approach is an accessible way to start learning it Learn more specifically how pop culture parodies these design theories Find ways to solve abstract design problems by using the built environment as a case study Learn about technical limitations on the built environment that visually impact the look and feel of spaces Each piece of architectural theory comes with abstracts and applications which is a more organized and network style way to teach an otherwise long winded subject *Handbook of Research on Methodologies for Design and Production*

Practices in Interior Architecture Garip, Ervin, Garip, S. Banu, 2020-11-20 Studio environments can be defined as multi dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological political phenomenological and other dimensions are discussed Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means While there are many resources available on the present approaches of aesthetics and visuality of interior spaces there is not much research available on new design methodologies related design processes and new applied methods in interior architecture Based on different contexts these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture The chapters deal with four major sections the design process and interdisciplinary approaches then scenario development and content followed by material texture and atmosphere and concluding with new approaches to design While highlighting topics such as spatial perception design strategies architectural atmosphere and design thinking this book is of interest to architects interior designers practitioners stakeholders researchers academicians and students looking for advanced research on the new design methodologies and processes for interior architecture

Pedagogy for Conceptual Thinking and Meaning Equivalence: Emerging Research and Opportunities Etkind, Masha, Shafir, Uri, 2019-11-08 Research in neuroscience and brain imaging show that exposure of learners to multi semiotic problems enhance cognitive control of inter hemispheric attentional processing in the lateral brain and increase higher order thinking Multi semiotic representations of conceptual meaning are found in most knowledge domains where issues of quantity structure space and change play important roles including applied sciences and social science Teaching courses in History and Theory of Architecture to young architecture students with pedagogy for conceptual thinking allows them to connect analysis of historic artifact identify pattern of design ideas extracted from the precedent and transfer concepts of good design into their creative design process Pedagogy for Conceptual Thinking and Meaning Equivalence Emerging Research and Opportunities is a critical scholarly resource that demonstrates an instructional and assessment methodology that enhances higher order thinking deepens comprehension of conceptual content and improves learning outcomes Based on the rich literature on word meaning and concept formation in linguistics and semiotics and in developmental and cognitive psychology it shows how independent studies in these disciplines converge on the necessary clues for constructing a procedure for the demonstration of mastery of knowledge with equivalence of meaning across multiple representations
