Commentaries on European Contract Laws Nils Jansen,Reinhard Zimmermann,2018-07-13 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission s plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law

Reforming the French Law of Obligations John Cartwright, Stefan Vogenauer, Simon Whittaker, 2009-04-17. The 2005 Avant projet de reforme du droit des obligations et de la prescription, also dubbed the Avant projet Catala, suggests the most far-reaching reform of the French Civil code since it came into force in 1804. It reviews central aspects of contract law, the law of delict and the law of unjustified enrichment. There is currently a very lively debate in France as to the merits or the demerits of both the particular draft provisions and the general idea of recodification as such. This volume is the first publication to introduce the reform proposals to an English-speaking audience. It contains the official English translation of the text and distinguished private lawyers from both England and France analyse and assess particularly interesting aspects of the substantive draft provisions in a comparative perspective. Topics covered include negotiation and renegotiation of contracts, the enforcement of contractual obligations, termination of contract and its consequences, the effects of contracts on third parties, the definition of la faute, the quantification of damages and the law of prescription. The volume also contains an overall assessment of the draft provisions by one of the most senior French judges who chaired the Working Party on the Avant projet established by the French Supreme Court, the Cour de cassation. The book is indispensable for comparative private lawyers and lawyers with a particular interest in French law. It is also of use to all private lawyers, both academics and practitioners, looking for information on recent international and European trends in contract and tort.

Comparative Law in Practice Duncan Fairgrieve, 2016-10-20. This book provides a comparative study of contract law, examining the interaction of common law and civil law approaches to contract law. Drawing extensively upon English, French and European law, the book explores how the law of contract of Jersey, Channel Islands, has been influenced by both civil law and common law sources. It is argued that this jurisdiction is a striking example of comparative law in action, given that Jersey contract law is made up of a blend of common law and civil law approaches. Jersey law is premised upon a subjective approach to contracts in which civil law concepts such as cause rather than consideration and vices de consentement are the foundational aspects, but is nonetheless highly influenced by the common law in areas such as remedies, damages, termination etc. The book analyses a series of key issues from a comparative and European perspective, including the principles underlying contract law, comparing and contrasting civil and common law approaches, the formation of contract, requirements of reciprocity, cause vs consideration, the structure and approach of precontractual liability, the role of good faith in a mixed system, the architecture of remedies and more.
