## **Predicting Recidivism Using Survival Models Research In Criminology:**

*Predicting Recidivism Using Survival Models* Peter Schmidt, Ann D. Witte, 2012-12-06 Our interest in the statistical modeling of data on the timing of recidivism began in the mid 1970s when we were both junior members of the economics department at the University of North Carolina At that time methods of analyzing qualitative and limited variables were being developed rapidly in the econometric literature and we became interested in finding a suitable application for these new methods Data on the timing of recidivism offered unique and interesting statistical challenges such as skewness of the distribution and the presence of censoring Being young and foolish we decided it would be fun to try something really difficult And being young and ignorant we were blissfully unaware of the concurrent developments in the statistical modeling of survival times that were then appearing in the biostatistics operations research and criminological literatures In the course of some earlier research we had learned that the North Carolina Department of Correction had an unusually well developed data base on their inmates We approached the Department and asked if they would be interested in working with us to develop models that would predict when their former charges would return to their custody They agreed because they were interested in using such models to evaluate rehabilitative programs and alternative prison management systems and to help project future prison populations

Developmental and Life-course Criminological Theories Tara Renae McGee, Paul Mazerolle, 2017-07-05 The developmental and life course perspective in criminology came to prominence during the late 1980s and throughout the 1990s a number of theories were developed to explain offending behavior over the life course This volume brings together theoretical statements empirical tests and debates of these major theories within the developmental and life course criminology perspective In the first section of the book original theoretical statements are provided and this is followed by a section which includes empirical tests of each of these theories conducted by researchers other than the original theorists The final section of the book provides a summary of the major debates both within the developmental and life course perspective and also between this perspective and others within criminology This comprehensive volume provides an informative overview of the developmental and life course perspective in criminology

The Oxford Handbook of Developmental and Life-course Criminology David P. Farrington, Lila Kazemian, Alexis Russell Piquero, 2019 The Oxford Handbook on Developmental and Life Course Criminology offers the first comprehensive look at these two approaches Edited by noted authorities in the field the Handbook aims to be the most authoritative resource on all issues germane to developmental and life course criminologists from the world's leading scholars

Home Free David S. Kirk, 2020-03-23 Each year in the United States more than 625 000 individuals are released from prison Half will be back in prison within just three years Many former prisoners who reoffend return home to their old communities where the same family friends drugs and criminal opportunities await them In Home Free David S Kirk uses Hurricane Katrina as a natural experiment to examine whether

residential relocation away from an old neighborhood can lead to desistance from crime Drawing upon both quantitative and qualitative evidence and data from an experimental housing mobility program he focuses on the lives of individuals released from Louisiana prisons soon after the hurricane some who moved away from New Orleans and some who did not Kirk further explores the impact of the Katrina induced residential change which provides a unique opportunity to investigate what happens when individuals move not just a short distance away from home but to entirely different cities counties and social worlds In a series of analyses Kirk shows the impact that changes in structured daily activities and peer relationships as well as opportunities for cognitive transformation can have to substantially reduce the likelihood of recidivism Addressing one of the biggest challenges now facing the criminal justice system Home Free offers a story of redemption In light of the devastation of Hurricane Katrina Kirk provides important insights into how the power of a fresh start can have considerable policy implications for reducing recidivism **Federal Probation** ,2003 **Preventing and Reducing Juvenile**

**Delinquency** James C. Howell,2003-02-24 This book aims to inform students about the latest research and the most promising and effective programs and for understanding preventing and controlling juvenile delinquency The book is geared to preparing students for a career in juvenile justice or related social service systems and becoming research or program development specialists The history of current juvenile justice system policies and practices are examined including the juvenile violence epidemic Key myths about juvenile violence and the ability of the juvenile justice system to handle modern day juvenile delinquents are critically examined Developmental theories of juvenile delinquency are applied to understanding how juvenile offender careers evolve Effective prevention and rehabilitation programs and what does not work are reviewed A comprehensive framework for building a continuum of effective programs is presented in Part III **Measuring Crime**

**and Criminality** John MacDonald,2017-09-08 Measuring Crime and Criminality focuses on how different approaches to measuring crime and criminality are used to test existing criminological theories Each chapter reviews a key approach for measuring criminal behaviour and discusses its strengths or weaknesses for explaining the facts of crime or answers to central issues of criminological inquiry The book describes the state of the field on different approaches for measuring crime and criminality as seen by prominent scholars in the field Among the featured contributions are The Use of Official Reports and Victimization Data for Testing Criminological Theories The Design and Analysis of Experiments in Criminology and Growth Curve Mixture Models for Measuring Criminal Careers Also included are papers titled Counterfactual Methods of Causal Inference and Their Application to Criminology Measuring Gene Environment Interactions in the Cause of Antisocial Behaviour and What Has Been Gained and Lost through Longitudinal Research and Advanced Statistical Models This volume of Advances in Criminological Theory illustrates how understanding the various ways criminal behaviour is measured is useful for developing theoretical insights on the causes of crime **Correctional Boot Camps** Doris L. MacKenzie,Gaylene

S. Armstrong,2004-02-20 Boot camps have developed over the past two decades into a program that incorporates a military

regimen to create a structured environment While some critics of this method of corrections suggest that the confrontational nature of the program is antithetical to treatment authors Doris Layton MacKenzie and Gaylene Styve Armstrong present research knowledge and personal discussions with community leaders that offer insight into both the strengths and weaknesses of this controversial form of corrections Correctional Boot Camps Military Basic Training or a Model for Corrections provides the most up to date assessment of the major perspectives and issues related to the current state of boot camps The book goes beyond cursory examinations of the effectiveness of boot camps presenting an in depth view of a greater variety of issues Correctional Boot Camps examines empirical evidence on boot camps drawn from diverse sources including male female juvenile and adult programs from across the nation The book explores empirical research on both the punitive and rehabilitative components of the boot camp model and the effectiveness of the tough on crime aspects of the programs that are often thought of as punishment or retribution in lieu of a longer sentence in a traditional facility Thus offenders earn their way back to the general public more quickly because they have paid their debt to society by being punished in a short term but strict boot camp Correctional Boot Camps is a comprehensive textbook for undergraduate and graduate students studying corrections and juvenile justice The book is also a valuable resource for correctional professionals interacting with offenders

**Envisioning Criminology** Michael D. Maltz, Stephen K. Rice, 2015-06-09 This book covers research design and methodology from a unique and engaging point of view based on accounts from influential researchers across the field of Criminology and Criminal Justice Most books and articles about research in criminology and criminal justice focus on how the research was carried out the data that were used the methods that were applied the results that were achieved While these are all important they do not present a complete picture Envisioning Criminology Researchers on Research as a Process of Discovery aims to fill that gap by providing nuance the back story of why researchers selected particular problems how they approached those problems and how their background training and experience affected the approaches they took As the contributions in this book demonstrate research is not a cut and dried process as all too many methods books imply but a living breathing and in some ways quirky process that is influenced by non scientific factors The path taken by a researcher is important and an appreciation of his or her background experience knowledge and the setbacks and triumphs of performing the research provides a much more complete picture of how research is done The twenty eight chapters in this book describe the back stories of their authors which serve to enlighten readers about the interplay between the personal and the methodological While primarily aimed as a textbook this work will also be of interest to researchers in Criminology and Criminal Justice and related Social and Behavioral Science fields as an account of how seminal researchers in the field developed their key contributions

**A Plan for Estimating the Number of "hardcore" Drug Users in the United States** Ronald Simeone, 1997 **Handbook of Life-Course Criminology** Chris L. Gibson, Marvin D. Krohn, 2012-11-06 The wide ranging scope of the Handbook of Life Course Criminology covers genetics and

environment child offenders and late bloomers the impact of school and peers lifelong and time limited criminal careers and qualitative and quantitative methodologies This unique Handbook is further set apart by its dual coverage of the leading edge of current research and innovative directions for future work in the field Pathways to crime have been a central concept of criminology from its inception Accordingly a lifespan approach to the field has replaced earlier biological and sociological perspectives with a more nuanced understanding of offender behavior and a wider lens of study The contributions to this Handbook break down issues of criminal and antisocial behavior from early childhood to late adulthood examining developmentally targeted prevention and intervention strategies and reviewing emerging trends in research Among the topics Childhood including physical aggression in childhood pre and peri natal development and environment Adolescence the impact of schooling unstructured time with peers gang membership and peer networks Adulthood Adult onset crime unemployment in emerging adulthood crime and adult outcomes Prevention and Intervention community programs lifetime intervention strategies re entry This volume will be a valuable piece for researchers in Criminology and Criminal Justice as well as related disciplines such as Sociology Developmental Psychology and Social Policy It will serve as an important reference for the current state of research as well as a roadmap for future scholars This impressive Handbook provides comprehensive coverage of key developmental and life course issues in criminology from birth to adulthood including biology genetics gangs schools neighborhoods adult onset desistance and interventions The research recommendations in each chapter are especially important and they should stimulate advances in knowledge for many years to come This Handbook should be required reading for all criminologists David P Farrington Professor of Psychological Criminology Cambridge University Cambridge UK In just a few decades developmental criminology has become the dominant intellectual force in criminology This volume demonstrates why It provides incisive reviews of important themes in developmental criminology More importantly it lays out rich agendas for future research that should inspire the next generation of developmental criminologists Daniel S Nagin Teresa and H John Heinz III University Professor of Public Policy and Statistics Carnegie Mellon University Pittsburgh PA USA     **Against Prediction** Bernard E. Harcourt, 2008-09-15 From random security checks at airports to the use of risk assessment in sentencing actuarial methods are being used more than ever to determine whom law enforcement officials target and punish And with the exception of racial profiling on our highways and streets most people favor these methods because they believe they re a more cost effective way to fight crime In *Against Prediction* Bernard E Harcourt challenges this growing reliance on actuarial methods These prediction tools he demonstrates may in fact increase the overall amount of crime in society depending on the relative responsiveness of the profiled populations to heightened security They may also aggravate the difficulties that minorities already have obtaining work education and a better quality of life thus perpetuating the pattern of criminal behavior Ultimately Harcourt shows how the perceived success of actuarial methods has begun to distort our very conception of just punishment and to obscure alternate visions of social

order In place of the actuarial he proposes instead a turn to randomization in punishment and policing The presumption Harcourt concludes should be against prediction      *Encyclopedia of Criminology* J. Mitchell Miller,Richard A.

**Record Complex** Melissa Burch, 2025-11-11 How a convergence of policy law and profit drives the use of criminal background checks in hiring Most employers in the United States routinely conduct criminal background checks on job applicants weeding out those with criminal convictions and thus denying opportunities to those who need them most In this powerful analysis Melissa Burch sheds light on one of the most significant forces of social and economic marginalization of our time discrimination on the basis of criminal records Chronicling the daily interactions of hiring managers workforce development professionals and job seekers with felony convictions in Southern California Burch shows that this discrimination is not simply a matter of employer bias Hiring is shaped by a set of institutions organizations and industries that promote the erroneous idea that people with criminal records are dangerous to employ This criminal record complex as Burch names it encourages exclusion and undermines employers common sense ways of assessing candidates In vivid and intimate detail Burch reveals both the futility and devastating human consequences of discriminatory policies Burch places today s routine practice of background screening within racialized notions of risk originating in early capitalist development tracing how over decades criminal background checks became a convenient catch all leveraged by entities with a direct interest in growing the practice Despite this reach however Burch discovers that small business owners tend to put less value

on background checks trusting their own judgment Approaching the issue from both personal and policy perspectives The Criminal Record Complex upends what we thought we knew about the causes of criminal record discrimination It suggests that our best hope for creating safe workplaces lies not in the false promise of background screening but in building the kinds of economies and communities that support true safety Sex Offenders Arjan A.
