Preferences And Situations:

Preferences and Situations Ira Katznelson, Barry R. Weingast, 2005-09-08 A scholarly gulf has tended to divide historians political scientists and social movement theorists on how people develop and act on their preferences Rational choice scholars assumed that people regardless of the time and place in which they live try to achieve certain goals like maximizing their personal wealth or power In contrast comparative historical scholars have emphasized historical context in explaining people s behavior Recently a common emphasis on how institutions such as unions or governments influence people s preferences in particular situations has emerged promising to narrow the divide between the two intellectual camps In *Preferences and Situations* editors Ira Katnelson and Barry Weingast seek to expand that common ground by bringing together an esteemed group of contributors to address the ways in which institutions in their wider historical setting induce people to behave in certain ways and steer the course of history The contributors examine a diverse group of topics to assess the role that institutions play in shaping people s preferences and decision making For example Margaret Levi studies two labor unions to determine how organizational preferences are established She discusses how the individual preferences of leaders crystallize and become cemented into an institutional culture through formal rules and informal communication To explore how preferences alter with time David Brady John Ferejohn and Jeremy Pope examine why civil rights legislation that failed to garner sufficient support in previous decades came to pass Congress in 1964 Ira Katznelson reaches back to the 13th century to discuss how the institutional development of Parliament after the signing of the Magna Carta led King Edward I to reframe the view of the British crown toward Jews and expel them in 1290 The essays in this book focus on preference formation and change revealing a great deal of overlap between two schools of thought that were previously considered mutually exclusive Though the scholarly debate over the merits of historical versus rational choice institutionalism will surely rage on *Preferences and Situations* reveals how each field can be enriched by the other

divided into four Parts Part I covers the full range of methodologies for evaluating governmental policy and assessing societal condition including both the leading approaches in current use by policymakers and academics such as GDP cost benefit analysis cost effectiveness analysis inequality and poverty metrics and the concept of the social welfare function and emerging techniques Part II focuses on the nature of well being What most fundamentally determines whether an individual life is better or worse for the person living it Her happiness Her preference satisfaction Her attainment of various objective goods Part III addresses the measurement of well being and the thorny topic of interpersonal comparisons How can we construct a meaningful scale of individual welfare which allows for comparisons of well being levels and differences both within one individual's life and across lives Finally Part IV reviews the major challenges to designing governmental policy around individual well being

Consentability Nancy S. Kim, 2019-02-14 Problems regarding the nature of consent are at the heart of many of today's most pressing issues For example the MeToo movement has underscored the need to move beyond viewing consent as a simple matter of yes or no Consent is complex because humans and their relationships are complicated Humans as a result of cognitive limitations and emotional and physical vulnerabilities are susceptible to manipulation and mistakes Given the potential for regret are there some things to which one should not be permitted to consent The consentability quandary becomes more urgent with technological advances Should we allow body hacking Cryonics Consumer travel to Mars Assisted suicide In *Consentability: Consent and Its Limits* Nancy S Kim proposes a bold original framework for evaluating consentability which considers the complexities surrounding consent

Preference Change Till Grüne-Yanoff, Sven Ove Hansson, 2009-06-11 Changing preferences is a phenomenon often invoked but rarely properly accounted for Throughout the history of the social sciences researchers have come against the possibility that their subjects' preferences were affected by the phenomenon to be explained or by other factors not taken into account in the explanation Sporadically attempts have been made to systematically investigate these influences but none of these seems to have had a lasting impact Today we are still not much further with respect to preference change than we were at the middle of the last century This anthology hopes to provide a new impulse for research into this important subject In particular we have chosen two routes to amplify this impulse First we stress the use of modelling techniques familiar from economics and decision theory Instead of constructing complex all encompassing theories of preference change the authors of this volume start with very simple formal accounts of some possible and hopefully plausible mechanism of preference change Eventually these models may find their way into larger empirically adequate theories but at this stage we think that the most important work lies in building structure Secondly we stress the importance of interdisciplinary exchange Only by drawing together experts from different fields can the complex empirical and theoretical issues in the modelling of preference change be adequately investigated

Handbook of Behavioural Economics and Smart Decision-Making Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and

addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy
