## **Pregnant Men Practice Theory And Law:**

*Pregnant Men* Ruth Colker,1994-10-22 An important contribution to the fields of feminist jurisprudence and feminist theory Mary Anne Bobinski University of Houston Law Center *Pregnant Men* shows how to implement anti essentialist and equality perspectives in teaching writing and the practice of law Because there are no pregnant men equality theory is difficult to formulate in a reproductive health context Instead Colker examines cases involving men who are similarly situated to pregnant women and shows that pregnant women are in fact treated far worse than almost pregnant men The individual stories she tells are themselves fascinating and they demonstrate Colker s model of a more practical feminist theory **New**

**Reproductive Technologies and Disembodiment** Carla Lam,2016-04-22 With attention to the ways in which new reproductive technologies facilitate the gradual disembodiment of reproduction this book reveals the paradox of women s reproductive experience in patriarchal cultures as being both and often simultaneously empowering and disempowering A rich exploration of birth appropriation in the West *New Reproductive Technologies and Disembodiment* investigates the assimilation of women s embodied power into patriarchal systems of symbolism culture and politics through the inversion of women s and men s reproductive roles Contending that new reproductive technologies represent another world historical moment both in their forging of novel social relations and material processes of reproduction and their manner of disembodiment of women in unprecedented ways a disembodiment evident in recent visual and literary popular and academic texts this volume locates the roots of this disembodiment in western political discourse A call to feminist political theory to remember the material dimensions of bodies and their philosophical significance *New Reproductive Technologies and Disembodiment* will appeal to scholars of sociology gender studies political and social theory and the study of science technology and health

**Women Going Backwards** Sandra Berns,2018-05-08 This title was first published in 2002 Gender has become a culturally laden signifier Sometimes used to differentiate the social from the biological gender itself has become gendered In common parlance gender issues often slide inexorably into women s issues and are in that way designated as marginal and outside the concerns and lives of ordinary men and women In this book signifiers such as gender worker and family are unpacked and suggestions are made as to how common usage of these signifiers reinforce existing practices and act as barriers to change Some of these changes are legal others are social and others are driven by political and policy agendas By looking at five areas equal opportunity law family law industrial relations law social welfare law and taxation law which are all profoundly gendered the author examines ways in which men and women see their roles and choices and how these are related to the state as citizens The author then examines the definition of citizenship and looks in detail at the concept of the unencumbered citizen who is unencumbered by interpersonal obligations responsibilities and beliefs using comparative material from Australia North America and the United Kingdom [Real Choices](#) Beth Kiyoko Jamieson,2001 This book offers a new approach to thinking about liberty in the wake of decades of criticism of liberalism

from feminists communitarians conservatives alike      *Legislating Morality* Lucinda J. Peach, 2002 A recurring issues in American political life is the role that religion plays in public lawmaking In this book Lucinda Peach sheds new light on this discussion by proposing a fresh and pragmatic alternative      *Mothers and Soldiers* Amy Caiazza, 2002-09-27 As the Soviet communist regime gave way to democracy the emergence of an entirely new political and social landscape had the potential to turn Russian society upside down In *Mothers and Soldiers* Organizing Men and Women in 1990s Russia Amy Caiazza looks at the effects of this seismic change on gender roles and specifically the role of women in a newly democratic Russia By observing through a gendered lens institutions like the military and the process of making public policy Caiazza finds that despite the institutional disruption the pattern of gender role ideologies maintained continuity from the former times while at the same time embracing aspects of Western feminism      *The Future of Human Reproduction* John Harris, Søren Holm, 1998

ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Søren Holm University of Copenhagen Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just healthcare trainees and professionals but also social scientists philosophers lawyers social workers and legislators The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the authors lined up for the series It promises to become the leading channel for the best original work in this burgeoning field this volume *The Future of Human Reproduction* brings together new work by an international group of contributors from various fields and perspectives on ethical social and legal issues raised by recent advances in reproductive technology These advances have put us in a position to choose what kinds of children and parents there should be the aim of the essays is to illuminate how we should deal with these possibilities for choice Topics discussed include gender and race selection genetic engineering fertility treatment ovarian tissue transfer and post menopausal pregnancy The central focus of the volume is the interface between reproductive choice and public regulation *The Future of Human Reproduction* is a roadmap for twenty first century reproductive technologies written by leading thinkers in the field for philosophers policy makers and clinicians However it will perhaps be equally useful for parents and other members of our most important social institutions as we struggle to cope with the rapidly changing reproductive horizon Glenn McGee University of Pennsylvania Center for Bioethics      **Feminist Legal Theory: Foundations** D. Kelly Weisberg, 1993

**Current Publications in Legal and Related Fields** , 1994      *Caring for Justice* Robin West, 1999-03 Over the past

decade mainstream feminist theory has repeatedly and urgently cautioned against arguments which assert the existence of fundamental or essential differences between men and women Any biological or natural differences between the sexes are often flatly denied on the grounds that such an acknowledgment will impede women's claims to equal treatment In *Caring for Justice* Robin West turns her sensitive measured eye to the consequences of this widespread refusal to consider how women's lived experiences and perspectives may differ from those of men Her work calls attention to two critical areas in which an inadequate recognition of women's distinctive experiences has failed jurisprudence We are in desperate need she contends both of a theory of justice which incorporates women's distinctive moral voice on the meaning of justice into our discourse and of a theory of harm which better acknowledges compensates and seeks to prevent the various harms which women disproportionately and distinctively suffer Providing a fresh feminist perspective on traditional jurisprudence West examines such issues as the nature of justice the concept of harm economic theories of value and the utility of constitutional discourse She illuminates the adverse repercussions of the anti essentialist position for jurisprudence and offers strategies for correcting them Far from espousing a return to essentialism West argues an anti anti essentialism which greatly refines our understanding of the similarities and differences between women and men

**Sex and Disability** Robert McRuer, Anna Mollow, 2012-01-04 This collection brings together scholars and artists in disability studies sexuality queer theory and feminism to show how much sexuality studies and disability studies have to learn from each other

**Biotechnology, Gestation, and the Law** Elizabeth Chloe Romanis, 2024-12-04 We are all the result of gestation the process of becoming before birth The very nature of human gestation however has shifted and will continue to shift as a result of technology Uterus transplantation and ectogestation and the novel modalities of gestation beyond sex and beyond bodies that they potentially make possible raise unique conceptual problems that have received little attention *Biotechnology Gestation and the Law* presents the first comprehensive ethico legal analysis of the nature of gestation and of technologies enabling gestation offering a concept analysis grounded in ontology phenomenology politics and law The first three chapters develop a transdisciplinary approach for identifying and exploring the ethical issues raised by uterus transplantation and ectogestation This addresses the ontological and legal confusion about what gestation is how we should classify procreative technologies in relation to gestation and why it is important to have precise classification The remaining chapters use this framework to undertake a rigorous examination of pressing socio legal implications of uterus transplantation and ectogestation who has access to technologies enabling gestation and under what circumstances Who is are the parent's when novel forms of gestation are used How do these technologies disrupt our notions of reproductive biosex and are they tools of emancipation from gendered roles This book and the original conceptual lens it sets out forges a new direction for legal and social reform directed at addressing the harms of constructed gendered procreative and parenting roles In speculating about future possibilities Elizabeth Chloe Romanis brings visibility to the oppressive propagation of biological essentialism that underpins

the contemporary regulation of human procreation and considers how to address this issue now and into the future

**Genes and the Bioimaginary** Deborah Lynn Steinberg, 2016-03-03 *Genes and the Bioimaginary* examines the dramatic rise and contemporary cultural apotheosis of the gene. The book traces not only the genetification of modern life but is also a journey through the complex relationship between science and culture. At the heart of this book are three interlinked questions. The first concerns the paradigmatic transformations of the genetics revolution: how can we understand the impact of genes on social arenas as diverse as law and agriculture, politics and medicine, genealogy and jurisprudence? Second, how has the language of genes come to pervade public discourse as much a trope of personal narrative as of the popular imaginary? And third, how can we gain critical purchase not only on the conditions and consequences of a particular science but on its projective seductions, the terms of its persuasion and the dilemmas and anxieties provoked in its wake? Through a series of illuminating case studies ranging from gay genes to Jew genes to genes for crime from CSI to the Innocence Project from genetics post racial imaginary to its phantasies of redemption, the book examines the emergence of the gene as a pre eminent locus of both scientific and social explanation and as a powerful object of spectacle, projective phantasy and attachment. *Genes and the Bioimaginary* makes a distinctive contribution to our understanding of how knowledge comes to be not only powerful but plausible. Book Review Digest, 1997

**Women's Lives, Men's Laws** Catharine A. MacKinnon, 2007-04-30 *Women's Lives, Men's Laws* collects papers by MacKinnon from 1980 to the present in which she discusses the deep gender bias of American law and the changes to legislation on sexual harassment, rape and battering to which she has contributed.

**Making Gaybies** Jaya Keaney, 2023-10-06 In *Making Gaybies* Jaya Keaney explores queer family making as a site of racialized intimacy. Drawing on interviews with queer families in Australia, Keaney traces the lived experiences of choice and constraint as these families seek to craft likeness with their future children and tell stories of chosen family made through love. Queer family building often involves multiracial and multicultural encounters as intending parents take part in the global fertility industry. Keaney follows queer family making through reproductive technologies and highlights the confines of varied transnational reproductive markets and policies as well as changing formations of race, gender, sexuality and kinship. Whether sharing the story of white gay men choosing Indian and Thai egg donors to make their surrogate born children's ethnicities visually distinct from their own or that of an Aboriginal lesbian and her white partner choosing a Cherokee donor from the United States to articulate a global Indigeneity, Keaney foregrounds the entwinement of reproduction, race and affect. By focusing on queer family making, Keaney demonstrates how reproduction fosters a queer multiracial imaginary of kinship.
