Prehistoric Astronomy And Ritual:

Prehistoric Astronomy and Ritual Aubrey Burl, 1983 *Prehistoric Astronomy and Ritual* Aubrey Burl, 1983

Prehistoric Astronomy in the Southwest J. McKim Malville, Claudia Putnam, 1993 Archaeoastronomy is a discipline pioneered at Stonehenge and other megalithic sites in Britain and France. Many sites in the southwestern United States have yielded evidence of the prehistoric Anasazi's intense interest in astronomy similar to that of the megalithic cultures of Europe. Drawing on the archaeological evidence, ethnographical parallels with historic pueblo peoples and mythology from other cultures around the world, the authors present theories about the meaning and function of the mysterious stone alignments and architectural orientations of the prehistoric Southwest. **Astronomy and Ceremony in the Prehistoric Southwest, Revisited**

Gregory E. Munson, Todd W. Bostwick, Tony Hull, Maxwell Museum of Anthropology, 2014. This volume contains selected papers from the 2011 Conference on Archaeoastronomy in the American Southwest held at the University of New Mexico. **Ancient Astronomy** Clive L.N. Ruggles, 2005-10-21. An authoritative introduction to the fascinating topic of archaeoastronomy: ancient peoples' understanding and use of the skies. **Ancient Astronomy: An Encyclopedia of Cosmologies and Myth** draws on archaeological evidence and oral traditions to reveal how prehistoric humans perceived the skies and celestial phenomena. With over 200 entries, it offers a number of ways to approach ancient astronomy from key examples and case studies worldwide: Stonehenge, Mexican and Egyptian pyramids, Chaco Canyon, New Mexico, the Nazca lines in Peru, to general themes: cosmologies, calendars, ancient ideas of space and time, origin myths, to fundamental concepts and methods: how the sky has changed over the centuries, how to survey a site, and to the field's most frequently asked questions: How did ancient peoples navigate the ocean using the stars? How does astrology relate to ancient astronomy? Can ancient sites be dated astronomically? By revealing the astronomical significance of some of the world's most famous ancient landmarks and enduring myths, and by showing how different themes and concepts are connected, **Ancient Astronomy: An Encyclopedia of Cosmologies and Myth** brings a unique authoritative perspective to an area too often left to speculation and sensationalism.

Astronomy and Ceremony in the Prehistoric Southwest John B. Carlson, William James Judge, 1987 **The Cambridge Concise History of Astronomy** Michael Hoskin, 1999-03-18. Astronomy is one of the oldest sciences and one which has repeatedly led to fundamental changes in our view of the world. This book covers the history of our study of the cosmos from prehistory through to a survey of modern astronomy and astrophysics, sure to be of interest to future historians of twentieth-century astronomy. It does not attempt to cover everything but deliberately concentrates on the important themes and topics. These include stellar astronomy in the seventeenth and eighteenth centuries, at the time subordinate to the study of the solar system, but the source of many important concepts in modern astronomy and the Copernican revolution, which led to the challenge of ancient authorities in many areas, not just astronomy. This is an essential text for students of the history of science and for students of astronomy who require a historical background to their studies. **Astronomy in the**

Archaeoastronomy Liz Henty, 2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy s marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory

sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today **The Oxford Handbook of Light in Archaeology** Costas Papadopoulos, Holley Moyes, 2021-12-09

Light has a fundamental role to play in our perception of the world Natural or artificial lightscapes orchestrate uses and experiences of space and in turn influence how people construct and negotiate their identities form social relationships and attribute meaning to im material practices Archaeological practice seeks to analyse the material culture of past societies by examining the interaction between people things and spaces As light is a crucial factor that mediates these relationships understanding its principles and addressing illumination's impact on sensory experience and perception should be a fundamental pursuit in archaeology However in archaeological reasoning studies of lightscapes have remained largely neglected and understudied This volume provides a comprehensive and accessible consideration of light in archaeology and beyond by including dedicated and fully illustrated chapters covering diverse aspects of illumination in different spatial and temporal contexts from prehistory to the present Written by leading international scholars it interrogates the qualities and affordances of light in different contexts and im material environments explores its manipulation and problematises its elusive properties The result is a synthesis of invaluable insights into sensory experience and perception demonstrating illumination's vital impact on social cultural and artistic contexts *Wessex: A Landscape History* Hadrian Cook, 2024-04-04

Wessex is famous for its coasts heaths woodlands chalk downland limestone hills and gorges settlements and farmed vales This book provides an account of the physical form development and operation of its landscape as it was shaped by our ancestors Major themes include the development of agriculture settlements industry and transport **Our Hidden Landscapes** Lucianne Lavin, Elaine Thomas, 2023-10-31 Challenging traditional and long standing understandings this volume provides an important new lens for interpreting stone structures that had previously been attributed to settler colonialism Instead the contributors to this volume argue that these locations are sacred Indigenous sites This volume introduces readers to eastern North America's Indigenous ceremonial stone landscapes CSLs sacred sites whose principal identifying characteristics are built stone structures that cluster within specific physical landscapes Our Hidden Landscapes presents these often unrecognized sites as significant cultural landscapes in need of protection and preservation In this book Native American authors provide perspectives on the cultural meaning and significance of CSLs and their characteristics while professional archaeologists and anthropologists provide a variety of approaches for better understanding protecting and preserving them The chapters present overwhelming evidence in the form of oral tradition historic documentation ethnographies and archaeological research that these important sites created and used by Indigenous peoples are deserving

of protection This work enables archaeologists historians conservationists foresters and members of the general public to recognize these important ritual sites Contributors Nohham Rolf Cachat Schilling Robert DeFosses James Gage Mary Gage Doug Harris Julia A King Lucianne Lavin Johannes Jannie H N Loubser Frederick W Martin Norman Muller Charity Moore Norton Paul A Robinson Laurie W Rush Scott M Strickland Elaine Thomas Kathleen Patricia Thrane Matthew Victor Weiss
