considered in this groundbreaking volume Burl explains for the first time how the outlying Heel Stone long predates Stonehenge itself serving as a trackway marker in the prehistoric Harroway He uncovers new evidence that the Welsh bluestones were brought to Stonehenge by glaciation rather than by man And he reveals just how far the design of Stonehenge was influenced by Breton styles and by Breton cults of the dead Meticulously researched the book sets the record straight on the matter of Stonehenge s astronomical alignments Although the existence of a sightline to the midsummer sunrise is well known the alignment and the viewing position are critically different from popular belief And until now the existence of an earlier alignment to the moon and a later one to the midwinter sunset has been little appreciated One almost unexplained puzzle remains The site of Stonehenge lies at the heart of a vast six mile wide graveyard All around it are groups of earthen long barrows the burial places of Neolithic people many of whom died more than a thousand years before Stonehenge The mystery is that before Stonehenge there was a vacuum two miles across inside that cemetery Nothing was inside Why Burl points to an answer

The Recumbent Stone Circles of Aberdeenshire John Hill, 2021-03-15 Recumbent Stone Circles are a distinctive architectural style of British stone circle Built circa 2500 BC they dominated the Late Neolithic landscape of Aberdeenshire Scotland This book discusses their archaeology and using experimental archaeology explains how the original builders went about building these magnificent stone circles Sharing the results of the author s unique experiments the book demonstrates how measured ropes were used to set out the geometrical design of the stone rings as well as dictate the dimensions of the circle s respective orthostats Moreover given the book s provision of instructions on to repeat these experiments the reader will be able to explore how these circles not only captured their corresponding astronomy but how they were also positioned in the landscape so that they were astronomically aligned towards each other creating a network of inter aligned stone circles that enabled the prehistoric communities to synchronise both time and space across the vast regions of Aberdeenshire

Ancient Stone Circles Kaia Stonebrook, AI, 2025-03-29 Ancient Stone Circles explores the purpose and significance of these ancient monuments in societies worldwide It argues that stone circles were not merely primitive relics but sophisticated centers for astronomical observation social gatherings and ceremonial practices Intriguingly archaeological findings suggest deliberate designs incorporating celestial alignments reflecting advanced knowledge of astronomy and social organization The book delves into the cultural context of stone circles examining the belief systems social structures and technological capabilities of the indigenous societies that built them It challenges previous interpretations by integrating quantitative astronomical data with qualitative cultural interpretations offering a nuanced understanding of these enigmatic structures Case studies from the British Isles Africa and the Americas showcase the astronomical alignments architectural features and associated artifacts revealing potential uses in maintaining social cohesion and transmitting knowledge Structured methodically Ancient Stone Circles introduces archaeoastronomy and social archaeology before exploring specific examples and their social contexts The book uses historical records archaeological

Use and reuse of stone circles Courtney Nimura, Richard Bradley, 2016-09-30 The study of stone circles has long played a major role in British and Irish archaeology and for Scotland most attention has been focused on the large monuments of Orkney and the Western Isles Several decades of fieldwork have shown how these major structures are likely to be of early date and recognized that that smaller settings of monoliths had a more extended history Many of the structures in Northern Britain were reused during the later Bronze Age the Iron Age and the early medieval period A series of problems demand further investigation including when were the last stone circles built How did they differ from earlier constructions How were they related to henge monuments especially those of Bronze Age date How frequently were these places reused and did this secondary activity change the character of those sites This major new assessment first presents the results of fieldwork undertaken at the Scottish recumbent stone circle of Hillhead the stone circles of Waulkmill and Croftmoraig the stone circle and henge at Hill of Tuach at Kintore and the small ring cairn at Laikenbuie in Inverness shire Part 2 brings together the results of these five projects and puts forward a chronology for the construction and primary use of stone circles particularly the Chalcolithic and Bronze Age examples It considers the reuse of stone circles long after they were built and discusses four neighboring stone circles in Aberdeenshire which display both similarities and contrasts in their architecture use of raw materials associated artefacts and structural sequences Finally a reassessment and reinterpretation of Croftmoraig and its sequence is presented the new interpretation drawing attention to ways of thinking about these monuments which have still to fulfill their potential **From Carnac to Callanish** Aubrey Burl, 1993 Lines of standing stones have until now been the

neglected wonders of prehistoric Europe From the multitude of great pillars at Carnac to the elegance of the avenue that leads to the stone circle of Callanish in the Hebrides visitors have stared in awe but departed in ignorance There has been nothing to inform them From Carnac to Callanish the first book on the subject describes the types which range from pairs of isolated stones in the far south west of Ireland to networks of long lines in Scotland Dartmoor and Brittany in a sequence of architectural chapters that stress the increasing social and commercial connections between regions hundreds of miles apart Information about excavations megalithic art astronomical analyses legends all these are used to provide explanations of why the rows were erected when and what was their purpose The book contains a history of research from late mediaeval times to the present day offers a chronology for the development of the lines from Neolithic times around 3500 BC to the middle of the Bronze Age a hundred generations later and reveals how early processional avenues leading to stone circles developed into multiple lines that were added to systematically over many generations before the tradition culminated in simple cult centres for families easy to put up yet containing delicate sightlines to the sun or moon Scholarship and vivid evocation are combined to present a narrative that is as accessible to the enthusiast as the expert and the text is augmented by distribution
