wants to be engulfed inside their world      **Megalodon and Other Prehistoric Sharks** Tammy Gagne,2021-08 Great white bull and tiger sharks are some of today's most talked about sharks But have you met the sharks of yesterday Each prehistoric shark had its own amazing and sometimes strange features The scissor tooth shark had teeth in a spiral shape The giant megalodon was about three times the size of a great white One small prehistoric shark had a big dorsal fin in the shape of an ironing board Readers will gobble up all the facts about these early ocean hunters and learn how they compare to modern sharks      **Sharks** Miriam Forster,2022-05-10 An epic oversize nonfiction picture book in the vein of *Bees A Honeyed History* all about sharks and their prehistoric predecessors Sharks are some of the oldest creatures on the earth or rather in its waters This epic survey follows sharks from their earliest appearance in the Paleozoic era up through the challenges they face today Along the way readers will meet many different sharks from different points in history They will get an up close evolutionary look at what makes a shark a shark like their skin their teeth their fins and more And they will get a crash course in archeological time as the book mostly covers prehistoric sharks or modern day sharks who have been around much longer than humans Like the hammerhead who has been patrolling tropical coastlines for more than 20 million years With lush illustrations from Gordy Wright and meticulous research from author Miriam Forster *Sharks A Mighty Bite y History* is sure to delight shark lovers science fans and any reader who loves to discover new wonders about the world around them

*The Ultimate Book of Sharks* Brian Skerry,Elizabeth Carney,Sarah Wassner Flynn,2018 An illustration heavy exploration of the types and characteristics of sharks      *Great White Shark* Ruth Owen,1900-01-01 Great white sharks have been cruising the world's oceans for over 400 million years With up to 3 000 teeth a mouth that can open up to 4 feet wide and weighing up to 5 000 pounds it's no wonder this shark rests at the top of the ocean's food chain Engaging facts and chilling photography teach readers what makes this shark so great      **Sharks and People** Thomas P. Peschak,2014-02-27 At once feared and revered sharks have captivated people since our earliest human encounters Children and adults alike stand awed before aquarium shark tanks fascinated by the giant teeth and unnerving eyes And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real and very cinematic dangers of shark bites But our interactions with sharks are not entirely one sided the threats we pose to sharks through fisheries organized hunts and gill nets on coastlines are more deadly and far reaching than any bite In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe A contributing photographer to National Geographic Peschak is best known for his unusual photographs of sharks his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world The other images gathered here are no less riveting bringing us as close as possible to sharks in the wild Alongside the photographs *Sharks and People* tells the compelling story of the natural history of sharks Sharks have roamed the oceans for more than four hundred million years and in this time they have never stopped adapting to the ever changing world their

unique cartilage skeletons and array of super senses mark them as one of the most evolved groups of animals Scientists have recently discovered that sharks play an important role in balancing the ocean including maintaining the health of coral reefs Yet tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone Today more than sixty species of sharks including hammerhead mako and oceanic white tip sharks are listed as vulnerable or in danger of extinction The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks They are certain to enthrall and inspire

Sharks Jessica Toyne, 2021-08-13 Sharks have existed on earth for more than 400 million years surviving the extinction event that wiped out the dinosaurs They are highly evolved apex predators that are essential in keeping the balance of the ecosystem they thrive in Sharks are often characterized by their highly distinctive triangular dorsal fin and jaws lined with sharp teeth They vary greatly between species and while some such as the tiger shark and bull shark deserve the reputation for being aggressive hunters there are many species that are docile and peaceful such as the whale shark a gentle giant that feeds on plankton and krill They have keen senses that make them extremely skilled hunters Aside from their acute sense of smell sharks are able to detect electrical signatures in the water through special electroreceptors called the ampullae of Lorenzini Sharks have been a source of fascination for mankind for centuries and despite there only being a handful of fatalities from shark attacks media coverage and movie portrayals have led the public to believe that they are ferocious killing machines Although some species are particularly dangerous the majority of sharks tend to avoid humans in the water and will co exist peacefully However more than 100 million sharks are slaughtered each year for consumption trophy status medicine and out of fear proving that sharks have more to fear from us than we do from them As predators sharks are incredibly important in maintaining the balance of the marine ecosystem and there are an increasing number of conservation initiatives helping to preserve these magnificent creatures in their natural habitats This book explores the anatomical characteristics various habitats and diet as well as the reproductive behavior of nine species including the fearsome great white shark the gregarious leopard shark and the bizarre goblin shark **Blood Shark!** Michael Dahl, 2015-08 Professor Igor proves that prehistoric shark bones can be found anywhere And where there's bones razor sharp teeth aren't far behind
