Prehistoric Thailand:

Prehistoric Thailand Charles Higham, Rachanie Thosarat, 1998 **Ban Chiang, a Prehistoric Village Site in Northeast Thailand, Volume 1** Michael Pietrusewsky, Michele Toomay Douglas, 2002 The inaugural volume in the Thai Archaeology Monograph Series describes in detail the human skeletal remains from Ban Chiang in northeast Thailand. The skeletal material spans a period from 2100 B.C. to A.D. 200 and includes premetal Bronze Age and Iron Age deposits from a series of prehistoric societies. The history of Homo sapiens in Asia has long been a topic of interest among scholars investigating human biology. This study, which is based on one of the larger comprehensively analyzed skeletal series ever excavated in the region, makes fundamental contributions to understanding human settlement in eastern Asia. The volume includes detailed summaries of metric and nonmetric variation recorded in teeth, skulls, and the rest of the skeleton and evidence of disease of the Ban Chiang people. These data are used to examine a number of questions: Where did the people of Ban Chiang come from? Did more intensified agriculture influence the health of the people? How do the people of Ban Chiang compare to the inhabitants of other ancient sites in Thailand and to the modern peoples of Thailand and neighboring regions? Contrary to other groups experiencing similar transitions elsewhere in the world, no clear evidence for a decline in health over time is noted in the Ban Chiang skeletal series, suggesting continuity in a broad-based subsistence strategy even in the face of intensifying agriculture. The skeletal evidence further suggests a rigorous physical lifestyle with little evidence for infectious disease or interpersonal violence. Hamilton, 2019-12-06 This third volume in the series is devoted to presenting and interpreting the metallurgical evidence from Ban Chiang northeast Thailand in the broader regional context Because the production of metal artifacts must engage numerous communities in order to acquire and process the raw materials and then create and distribute products understanding metals in past societies requires a regional perspective This is the first book to compile summarize and synthesize the English language copper production and exchange evidence available so far from Thailand and Laos in a thorough and systematic manner Chapters by Vincent C Pigott and Thomas O Pryce examine in detail the mining and smelting of copper in several sites and the lead isotope evidence for the sourcing of artifacts found in two of the consumption sites included in the study Another chapter compiles the metal consumption evidence including results of technical studies on

prehistoric metals recovered from more than 35 sites excavated in central and northeast Thailand This compilation demonstrates important regional variation in chaînes opératoires allowing explication and synthesis of the technological traditions found in this region during prehistory The review and compilation sheds new light on the social and economic context for the adoption and development of metallurgy in this part of the world One key insight is that Thailand presents a case for a community driven bronze age where the choices of peaceful local communities not elites or centralized political entities shaped how metal technological systems were implemented in this region This fresh perspective on the role of metallurgy in ancient societies contributes to an expanded global understanding of how humans have engaged metal technologies contributing to debunking the conventional paradigm that emphasized a top down view and a standardized metallurgical sequence a paradigm that has dominated archeometallurgical studies for the last century or more Thai Archaeology Monograph Series 2C University Museum Monograph 153 *The Oxford Handbook of Early Southeast Asia* C.F.W.
