Yang, Shuxian Ye, 2024-04-04 This book is the first monograph of its kind in the academic world which comprehensively expounds the new methodology of humanities The quadruple evidence method is one which integrates quadruple evidences to open up new horizon for interpretation of ancient culture in the three dimensional manner The first layer of evidence refers to documents passed down from the past the second layer of evidence refers to local written materials the third layer of evidence includes oral legends of anthropology and folklore and etiquette in the living folk customs the fourth layer of evidence refers to those ancient objects and images either unearthed in archaeological excavations or handed down from the past The book consists of theoretical explorations and their applications in individual cases While the first part studies the academic evolution theory and methodological value of the quadruple evidence method the second part in using the method in different cases explores different historical and cultural phenomena in the history of China attempting to extend the frontier of the origin of civilization from the approach of mythological study **The Agrarian History of England and**

Wales: Volume 1, Prehistory to AD 1042 Stuart Piggott, Joan Thirsk, 2011-04-28 This volume surveys the evolution of the man made landscape in Britain over the period of some three millennia before the Roman conquest Evidences of Prehistoric Inhabitants G. Major Taber, 1900 Tropical Forests in Prehistory, History, and Modernity Patrick

Roberts, 2019-01-03 In popular discourse tropical forests are synonymous with nature and wilderness battlegrounds between apparently pristine floral faunal and human communities and the unrelenting industrial and urban powers of the modern world It is rarely publicly understood that the extent of human adaptation to and alteration of tropical forest environments extends across archaeological historical and anthropological timescales This book is the first attempt to bring together evidence for the nature of human interactions with tropical forests on a global scale from the emergence of hominins in the tropical forests of Africa to modern conservation issues Following a review of the natural history and variability of tropical forest ecosystems this book takes a tour of human and human ancestor occupation and use of tropical forest environments through time Far from being pristine primordial ecosystems this book illustrates how our species has inhabited and modified tropical forests from the earliest stages of its evolution While agricultural strategies and vast urban networks emerged in tropical forests long prior to the arrival of European colonial powers and later industrialization this should not be taken as justification for the massive deforestation and biodiversity threats imposed on tropical forest ecosystems in the 21st century Rather such a long term perspective highlights the ongoing challenges of sustainability faced by forager agricultural and

urban societies in these environments setting the stage for more integrated approaches to conservation and policy making and the protection of millennia of ecological and cultural heritage bound up in these habitats *Big Tradition and Chinese Mythological Studies* Jiansheng Hu, 2020-08-11 This book focuses on reinterpreting mythical China from the perspective of the cultural theory of big tradition It is divided into two parts the first explains the theoretical development and features of the Chinese version of big tradition identifying the differences between the Eastern and Western cultural traditions big tradition and great tradition The second part then reinterprets the core values and mythical ideas of Chinese civilization and traditional culture from the perspective of big tradition Moving beyond the small tradition of text centrism and using new methods and materials the book reveals the original meaning and the cultural coding function of big tradition during the preliterate period Drawing on integrated evidence from literature handed down from ancient times oral and intangible cultural heritage tangible culture cross cultures image culture and unearthed documents the book interprets Chinese cultural traditions and spiritual values from local archaeological experiential and survival perspectives to help readers better understand the mythical codes and genes of early Chinese culture From Genesis to Prehistory Peter

Rowley-Conwy, 2007-11 We are now familiar with the Three Age System the archaeological partitioning of the past into Stone Age Bronze Age and Iron Age This division which amounted at the time to a major scientific revolution was conceived in Denmark in the 1830s Peter Rowley Conwy investigates the reasons why the Three Age system was adopted without demur in Scandinavian archaeological circles yet was the subject of a bitter and long drawn out contest in Britain and Ireland up to the 1870s **The Cambridge History of Africa** J. D. Fage, Roland Anthony Oliver, 1975 Volume I examines African prehistory from the time of the first hominids in the Plio Pleistocene up to the spread of iron technology after c 500 BC
