Preliminary Approaches To Language Development:

Preliminary approaches to language development Kim Plunkett, 1982 *Preliminary Approaches to Language Development* Kim Plunkett, 1985 Preliminary Approaches to Language Development **The Crosslinguistic Study of Language Acquisition** Dan Isaac Slobin, 2022-03-01 Extending the tradition of this series which has become a standard reference work in language acquisition this volume contains chapters on seven more languages including a section on ergative languages Languages in this volume include Georgian Greenlandic Kiche Mayan Warlpiri Mandarin Scandinavian and Sesotho Development of Verb Inflection in First Language Acquisition Dagmar Bittner, Wolfgang U. Dressler, Marianne Kilani-Schoch, 2011-06-24 The volume deals with the emergence of verb morphology in children during their second and early third year of life from a cross linguistic perspective It covers 15 contributions each analyzing one single language based on parallel longitudinal investigations of children with parallel methodology and macrostructure in representation The main question addressed is How do children detect morphology and construct first subsystems of verbal inflection The focus lies on the transition from a premorphological phase to a protomorphological phase The main proposal consists in the concept of miniparadigms and of their relation to morpho syntactic developments in early first language acquisition The CHILDES Project Brian MacWhinney, 2014-01-09 Volume I is the first of two volumes that document the three components of the CHILDES Project It is divided into two parts which provide an introduction to the use of computational tools for studying language learning The first part is the CHAT manual which describes the conventions and principles of CHAT transcription and recommends specific methods for data collection and digitization The second part is the CLAN manual which describes the uses of the editor sonic CHAT and the various analytic commands The book will be useful for both novice and experienced users of the CHILDES tools as well as instructors and students working with transcripts of child language Volume II describes in detail all of the corpora included in the CHILDES database The conversational interactions in the corpora come from monolingual children and their caregivers and siblings as well as bilingual children older school aged children adult second language learners children with various types of language disabilities and aphasic recovering from language loss The database includes transcripts in 26 different languages **The Development of Second Language Grammars** Elaine C. Klein, Gita Martohardjono, 1999 A collection of papers reflecting the shift away from characterizing second language acquisition as either having or not having access to principles and parameters of Universal Grammar and towards theories of putative L1 influence on the L2 learner Development of Nominal Inflection in First Language Acquisition Ursula Stephany, M. D. Voëikova, 2009 This book deals with the emergence of nominal morphology from a cross linguistic perspective and is closely related to Development of Verb Inflection in First Language Acquisition ed by D Bittner W U Dressler M Kilani Schoch both methodologically and theoretically Each of the fourteen contributions studies the early development of the fundamental inflectionally expressed categories of the noun number case gender in one of the

languages belonging to different morphological types isolating fusional inflecting agglutinating root inflecting and families Germanic Romance Slavic Baltic Greek Finnic Turc Semitic Indian American The analyses are based on parallel longitudinal observations of children in their second and early third year of life as well as their input The focus lies on the transition from a pre morphological to a proto morphological stage in which grammatical oppositions and so called mini paradigms begin to develop The point at which children start to discover the morphological structure of their language and the speed with which they develop inflectional distinctions of lexical items has been found to be dependent on the morphological richness of the input language on the paradigmatic as well as the syntagmatic axis of linguistic structure The findings are interpreted within non nativist theoretical frameworks Natural Morphology Usage based theories

The Acquisition of Derivational Morphology Veronika Mattes, Sabine Sommer-Lolei, Katharina Korecky-Kröll, Wolfgang U. Dressler, 2021-11-15 This book offers the first systematic study of the early phases in the acquisition of derivational morphology from a cross linguistic and typological perspective It presents ten empirical longitudinal studies in genealogically and typologically diverse languages Indo European Finno Ugric Altaic with different degrees of derivational complexity Data collection analysis and systematic comparison between child speech and parental child directed speech are strictly parallel across the chapters In order to identify the productivity of a derivational pattern signalling the crucial developmental stage in its acquisition the concept of the mini paradigm criterion was applied Similar developmental processes can be observed in all children independent of the language they acquire but the children s courses of development also show obvious typological differences This points towards an important impact of the structural properties of the specific language on emergence use and the early course of development of derivational patterns

A Developmental-functionalist Approach To Child Language Nancy Budwig, 2013-04-15 Although there has been much empirical study within what has been referred to as functional approaches to child language there has yet to be a major attempt to compare and contrast such proposals In addition much of the work carried out within child language from a functionalist perspective has not been specific with regard to the nature of the approach adopted In attempting to fill the gap the author of this book begins with a comparison of various functionalist approaches By concentrating on one domain agentivity and control Budwig develops a set of research questions based on an examination of findings stemming from linguistics psycholinguistics and developmental psychology and also provides an in depth discussion of related methodological issues In the second part of the book she traces the development of linguistic means to refer to oneself within a developmental functionalist perspective Individual case studies as well as group analyses of six children in the early phases of acquiring English grammar are provided In the last part Budwig examines the relationship between forms and functions in development with special attention to potential generalizations about the organization and reorganization of the children s linguistic systems

Development of Modality in First Language Acquisition Ursula Stephany, Ayhan Aksu-Koç, 2021-03-08 This book deals with the development of modality from a

crosslinguistic perspective and is closely related to two earlier volumes on the development of verb and nominal inflection in first language acquisition SOLA 21 and 30 both methodologically and theoretically Each of the fourteen contributions studies the early development of the form and function of expressions of deontic and dynamic agent oriented modality or epistemic and evidential propositional modality in one of fourteen languages belonging to different morphological types and language families seven Indo European and seven non Indo European The analyses are mainly based on longitudinal observations of children in their 2nd and 3rd years of life in conversational interaction with their caregivers mostly the mothers Main issues addressed are the development of directives and modulations of information in terms of certainty and evidentiality also taking into account children s developing social pragmatic and cognitive skills One of the main findings is that agent oriented and propositional modality may develop in parallel depending on the typological characteristics of the language acquired The decisive factor is whether notions of propositional modality are grammaticized and obligatorily expressed in the language The findings are interpreted within non nativist theoretical frameworks Usage based theories Natural Morphology

Empirical Approaches to Cognitive Linguistics Milla Luodonpää-Manni,Johanna Viimaranta,2017-05-11 This collection takes a cognitive linguistic view on analyzing language and presents innovative contemporary Finnish research to the international audience The volume brings together nine chapters presenting empirical case studies that rely on various kinds of corpus data and experimental data or combine both types of empirical evidence The topics vary from semantics to grammatical description from terminological choices to language acquisition and they study language from perspectives as diverse as psycholinguistics comparative linguistics and translation studies A multi methodological approach to linguistic research is promoted in this book The idea is that language in all its diversity can best be studied by using the entire spectrum of modern quantitative and qualitative methods It will appeal to academic readers students and established researchers interested in the study of authentic linguistic material especially from the cognitive perspective *Resources in Education* ,1995-04 The Ontogenetic Development of Literal and Metaphorical Space in Language Eva-Maria Graf,2006

Nominal Compound Acquisition Wolfgang U. Dressler, F. Nihan Ketrez, Marianne

Kilani-Schoch, 2017-12-15 This book offers a systematic study of the emergence and early development of compound nouns in first language acquisition from a cross linguistic and typological perspective. The language sample is both genealogically and typologically diversified ranging from languages rich in compounds such as German Saami Estonian and Finnish to languages poor in compounds such as French. Some of them differ in compound richness according to genres of adult directed speech in contrast to child directed speech and thus also child speech like Russian Lithuanian and especially Greek. Differences in the delimitation and transition between compounds and phrases and in the distribution of subtypes of compounds in these languages involve great typological variety and thus different tasks for children acquiring them. The eleven languages investigated in the volume and the common methodology of longitudinal collection of spontaneous speech data concerning the interaction between children and their caretakers or peers supplemented by lexical typology as a new means of cross linguistic comparison of language acquisition allow new generalizations and make the volume a unique contribution.

The Acquisition of Verbs and their Grammar: Natalia Gagarina, Insa Gülzow, 2006-07-15 language specific competence within the acquisitional process. Together with the focus on acquisition of the verb and its grammar research in this domain provides a fruitful basis for discussion. The maturation model of language acquisition assumes that UG becomes the language specific grammar over time and that UG is entirely available only up until the time when the native language has been completely acquired (cf. Atkinson 1992, Wexler 1999). Constructivist models that may also be opposed to theories of UG alongside with the usage based approaches mentioned above mostly elaborate on the early acquisition of spatial relations (e.g. Bowerman and Choi 2001, Sinha et al. 1999) however two main hypotheses of this approach a holistic view of universal spatial cognition and the language specific acquisition hypothesis are beyond the main scope of this book. The book presents original contributions based on analyses of naturalistic data from eleven languages: Croatian, Dutch, English, Estonian, French, German, Hebrew, Jakarta Indonesian, Japanese, Russian and Spanish. Three of the contributions make cross linguistic comparisons.

between English and Russian English German and Spanish and German Croatian and English All papers in the volume investigate first language acquisition and one paper studies both first and second language acquisition **The Acquisition of Complex Morphology** William Forshaw,2021-10-15 Many theories of language acquisition struggle to account for the morphological complexity and diversity of the world s languages This book examines the acquisition of complex morphology of Murrinhpatha a polysynthetic language of Northern Australia It considers semi naturalistic data from five children 1 9 6 1 collected over a two year period Analysis of the Murrinhpatha data is focused on the acquisition of polysynthetic verb constructions large irregular inflectional paradigms and bipartite stem verbs which all pose interesting challenges to the learner as well as to theories of language acquisition The book argues that morphological complexity which broadly includes factors such as transparency predictability regularity richness type token frequency and productivity must become central to our understanding of morphological acquisition It seeks to understand how acquisition is impacted by differences in morphological systems and by the ways in which children and their interlocutors use these systems *Surveillance of language development in pre-school children* Johannes Fellingner,Daniel Holzinger,David Saldaña,2022-12-16 Language Processing and Second Language Development Manfred Pienemann,1998-01-01 Aims to provide a systematic perspective on some central psychological mechanisms underlying the spontaneous production of interlanguage IL speech The text develops a framework that represents a theory of processability of grammatical structures referred to as Processability Theory
