Preliminary Overview of the Economies of Latin America and the Caribbean 1999 United Nations. Economic Commission for Latin America and the Caribbean, 1999 Abstract In 1999 Latin America was once again influenced by the adverse international economic environment which had a decisive impact on the countries economic policies and performance As a consequence of the continuing decline in the prices of non fuel commodities together with unstable and deteriorating terms and conditions for external financing the net transfer of resources for the region as a whole was negative for the first time since 1990 and the previous trend towards a widening deficit in the current account of the balance of payments became untenable The corresponding correction was associated with a downturn in domestic demand and imports that translated

into the virtual stagnation of the region's gross domestic product. The region also witnessed a further deterioration in the employment situation. Nonetheless, inflation held steady at around 10% for the region as a whole despite more flexible foreign exchange policies and the resulting devaluation of many countries' currencies. The South American countries were the hardest hit by external problems and intraregional trade, mainly of manufactures, fell sharply. In contrast, Mexico and the Central American and Caribbean countries were able to take advantage of the burgeoning United States market to boost their exports and their levels of economic activity, thereby counteracting the detrimental effects of the international financial crisis. As the year proceeded, the growth of the world economy, the progressive normalization of capital flows, improving commodity prices, and the adoption of macroeconomic policies that were more conducive to economic reactivation combined to produce the first glimmers of an upswing in economic activity, which is expected to take firm hold in the year 2000.

Latin America and Global Capitalism William I. Robinson, 2008-11-24 2009 Best Book International Political Economy Group of the British International Studies Association. This ambitious volume chronicles and analyzes from a critical globalization perspective the social, economic, and political changes sweeping across Latin America from the 1970s through the present day. Sociologist William I. Robinson summarizes his theory of globalization and discusses how Latin America's political economy has changed as the states integrate into the new global production and financial system, focusing specifically on the rise of nontraditional agricultural exports, the explosion of maquiladoras, transnational tourism, and the export of labor and the import of remittances. He follows with an overview of the clash among global capitalist forces: neoliberalism and the new left in Latin America, looking closely at the challenges and dilemmas resistance movements face and their prospects for success. Through three case studies—the struggles of the region's indigenous peoples, the immigrants' rights movement in the United States, and the Bolivarian Revolution in Venezuela—Robinson documents and explains the causes of regional socio-political tensions, provides a theoretical framework for understanding the present turbulence, and suggests possible outcomes to the conflicts. Based on years of fieldwork and empirical research, this study elucidates the tensions that globalization has created and shows why Latin America is a battleground for those seeking to shape the twenty-first century's world order.

2005 Latin America and the Caribbean Selected Economic and Social Data David Colin, 2005 Social Policy in a Development Context T. Mkandawire, 2004-11-10. Drawing upon both conceptual and empirical evidence, this volume argues the case for the centrality of social policy in development, focusing particularly on the message that social policy needs to be closely intertwined with economic policy. It is argued that social policy can provide the crucial link between economic development, poverty eradication, and equity. This volume is a significant contribution to thinking about social policy in a development context.

Latin America and the Caribbean, 2003 **Market Liberalizations and Emigration from Latin America** Jon Jonakin, 2017-10-31. *Market Liberalizations and Emigration From Latin America* provides a comprehensive analysis of the impact of the era of liberalization in Latin America, focusing in particular on labor markets and emigration from the region.

Starting in 1980 liberalization in Latin America was expected to improve market functioning efficiency and welfare. Instead it yielded slower growth, unexpectedly high levels of unemployment and income inequality, flat or falling wages, an increase in non-tradeable service sector and informal activity, and finally waves of emigration from Mexico, Central America, and Ecuador among other countries. This book provides a heterodox narrative explanation of why the orthodox economic model that underwrote the standard trickle-down account served more to obscure and obfuscate than to explain and clarify the state of affairs. The book investigates the impact of the global-scale liberalizations of markets for goods and physical and financial capital and the mere national-scale liberalization of regional labor markets, arguing that these asymmetric liberalizations together resulted in labor market failure and contributed in turn to the subsequent undocumented migrant flow. The ultimate effect of the skewed scale of market liberalizations in Latin America disproportionately benefited capital at the expense of labor. Market Liberalizations and Emigration From Latin America will be of interest to researchers of economics and development in Latin America.

From Rebellion to Reform in Bolivia Jeffery R. Webber, 2011. Evo Morales rode to power on a wave of popular mobilizations against the neoliberal policies enforced by his predecessors. Yet many of his economic policies bore striking resemblance to the status quo he was meant to displace. Based in part on dozens of interviews with leading Bolivian activists, Jeffery R. Webber examines the contradictions of Morales' first term in office.

The Politics of Empire Alan Freeman, Boris Kagarlitsky, 2004-09-20. Bringing together nine leading writers and activists from around the world, this book explores the origins of a new age of Empire. Writers including Walden Bello, Jayati Ghosh, Kate Hudson, Boris Kagarlitsky, and Alan Freeman offer a wealth of factual evidence showing that globalisation has driven apart peoples, classes, and nations, shaping and reshaping key regions of the world. Challenging the idea that it is inevitable, they argue that its economic contradictions have thrown the world order that sustained it into crisis. Globalisation's opponents are shaping a new intellectual tradition. For the first time, the book brings together the critiques thrown up by resistance to globalisation, to war, and to imperialism. Free from ideology and dogma, showing how the peace and anti-globalisation movements can join forces and face the coming period of world history.

OECD Development Pathways Multi-dimensional Review of El Salvador Strategic Priorities for Robust, Inclusive and Sustainable Development OECD, 2023-04-18. El Salvador has made significant development progress in the past 30 years. The end of the civil war in 1992 marked the establishment of a liberal democracy and an open export-led development model which led to a reduction in poverty and inequality. However, with economic growth averaging a modest 2.4% in the years before the COVID-19 pandemic and productivity growth of 0.1% over the past decade, the post-war model has not generated the economic momentum or the jobs that the country needs.

Emerging Market Economies Grzegorz W. Kolodko, 2018-04-27. This title was first published in 2003. Emerging Market Economies: Globalization and Development is the result of a comprehensive international research project coordinated within

the TIGER Transformation Integration and Globalization Economic Research It deals with economic social and political implications of globalization for the development of emerging market economies and is authored by a host of international scholars from the USA Chile Tanzania UK Italy Hungary Poland Romania China and Japan Kolodko et al examine the fundamental issues of the influences of globalization on the markets for capital goods and labour and for the growth and development in emerging markets including post communist countries The study includes a number of comprehensive and compatible works which deal especially with the chances for and mechanism of catching up on these emerging markets

The World Economy Angus Maddison,2007 The United States and Peru Cynthia McClintock,Fabian Vallas,2018-10-24 The early 1990s marked a critical turning point in the relationship between the United States and Peru Prior to the election of Alberto Fujimori in 1990 the relationship between governments had been contentious Fujimori however sought to work together with the United States regarding issues such as security threats free market reform and narcotics control Yet even with this new spirit of cooperation the two governments still clashed over international standards of democracy and human rights at a time when most Latin American countries were much more democratic This work traces the relationship between the two countries from 1990 2000 examining political and military issues including drug trafficking guerrillas human rights violations and the US role in the 1995 war between Peru and Ecuador Impact of the Andean Trade Preference Act, 9th Report 2002, Inv. 332-352 , Globalization, Universities and Issues of Sustainable Human Development Jean Larson Pyle,Robert Forrant,2002-01-01 This volume raises an important question Given the fast changing global economy and the challenges it presents what is the role for the university as an institution promoting sustainable human development The editors begin by outlining the changes associated with the recent wave of globalization particularly transformations in the relative power of institutions internationally They analyze the constraints universities face in industrialized and developing countries in promoting sustainable human development
