Quantitative Methods An Active Learning Approach:

Quantitative Methods Graham Hackett, David Caunt, 1995-01-09 An introduction to quantitative methods delivering the knowledge and skills required to process utilize and manipulate numerical information of the type and style found in the business environment The practical application of quantitative methods is emphasized An additional unit on basic mathematics is included which is suitable for students enrolling on business studies programs without formal mathematical qualifications Contents include foundation mathematics and business mathematics data presentation linear programming regression and correlation analysis probability and probability distribution *Child Development: An Active Learning Approach* Laura E. Levine, Joyce Munsch, 2010-09-16 Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students few textbooks currently exist that actually do this

Handbook of Teaching and Learning Social Research Methods Melanie Nind, 2023-09-06 This comprehensive Handbook illustrates the wide range of approaches to teaching and learning social research methods in the classroom online in the field and in informal contexts Bringing together contributors from varied disciplines and nations it represents a landmark in the development of pedagogical culture for social research methods ECRM 2019 18th European Conference on Research

Methods in Business and Management Prof. Anthony Stacey, 2019-06-20 **Handbook of Big Data Research Methods** Shahriar Akter, Samuel Fosso Wamba, 2023-06-01 This state of the art Handbook provides an overview of the role of big data analytics in various areas of business and commerce including accounting finance marketing human resources operations management fashion retailing information systems and social media It provides innovative ways of overcoming the challenges of big data research and proposes new directions for further research using descriptive diagnostic predictive and prescriptive analytics

Active Learning Dana E. Wright, 2015-04-10 While many educators acknowledge the challenges of a curriculum shaped by test preparation implementing meaningful new teaching strategies can be difficult Active Learning presents an examination of innovative interactive teaching strategies that were successful in engaging urban students who struggled with classroom learning Drawing on rich ethnographic data the book proposes participatory action research as a viable approach to teaching and learning that supports the development of multiple literacies in writing reading research and oral communication As Wright argues in connecting learning to authentic purposes and real world consequences participatory action research can serve as a model for meaningful urban school reform After an introduction to the history and demographics of the working class West Coast neighborhood in which the described PAR project took place the book discusses the pedagogy of praxis method and the project's successful development of student voice sociopolitical analysis capacities leadership skills empowerment and agency Topics addressed include an analysis and discussion of the youth driven PAR process the reactions of student researchers and the challenges for adults in maintaining youth and adult partnerships A thought provoking response to current educational challenges Active Learning offers both timely implications

for educational reform and recommendations to improve school policies and practices

International Handbook of Research Methods And Statistics (Volume 4) Urfat Anjem Mir, Sonam Joldan, Vinay Kumar, Sonia Saini, The International Handbook of Research in Statistics Education provides a comprehensive global overview of the latest research trends and practices in the teaching and learning of statistics Edited by Dani Ben Zvi Katie Makar and Joan Garfield this handbook brings together leading scholars to explore foundational theories innovative methodologies and emerging challenges in statistics education Covering topics such as statistical reasoning learning trajectories teacher development curriculum design and the role of technology the book serves as a critical resource for researchers educators curriculum developers and policymakers Rich with evidence based insights and international perspectives it offers both theoretical depth and practical applications making it an essential guide for advancing the field of statistics education

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Operations Management Research and Cellular Manufacturing Systems: Innovative Methods and Approaches Modrák, Vladimír, Pandian, R. Sudhakara, 2011-10-31 This book presents advancements in the field of operations management focusing specifically on topics related to layout design for

manufacturing environments Provided by publisher
