Robust Reality George Englebretsen, 2013-05-02 Contemporary analytic philosophy can generally be characterized by the following tendencies commitment to first order predicate logic as the only viable formal logic rejection of correspondence theories of truth a view of existence as something expressed by the existential quantifier a metaphysics that doesn't give the world as a whole its due This book seeks to offer an alternative analytic theory one that provides a unified account of what there is how we speak about it the underlying logic of our language how the truth of what we say is determined and the central role of the real world in all of this The result is a robust account of reality The inspiration for many of the ideas that constitute this overall theory comes from such sources as Aristotle Leibniz Ryle and Sommers

The Projected and Prophetic: Humanity in Cyberculture, Cyberspace, and Science Fiction Jordan J. Copeland, 2020-03-31 This volume was first published by Inter Disciplinary Press in 2011 The papers collected in this volume document the exchange and development of ideas that comprised the 5th Global Conference on Visions of Humanity in Cyberculture Cyberspace and Science Fiction hosted at Mansfield College Oxford United Kingdom in July 2010 As in the past the conference was driven by questions related to how cyberculture cyberspace and science fiction can provide new insights into the nature of what it is to be human and the understanding of what it means for human beings to live in communities In addition to these recurring themes there is just as importantly a disposition that is shared by those participating in this volume The authors as well the writers thinkers and filmmakers they consider in their essays demonstrate an intrepid and

inquisitive approach that tests age old questions within the rapidly expanding but still vaguely defined spaces that new technologies have afforded us Moreover in many ways the conference and present volume reflect their subject which has always been situated self consciously and comfortably between the receding boundaries that have traditionally served both to delineate various academic disciplines and to distinguish real scholarship from popular discourse Thus as evidenced in the chapters of this volume the conference benefited from the participation of delegates who represented a variety of fields methodologies and perspectives **Augmented Images** Lars C. Grabbe,Patrick Rupert-Kruse,Norbert M.
