Real World Diaries:

Docufictions Gary D. Rhodes, John Parris Springer, 2014-10-01 Through most of the 20th century the distinction between the fictional narrative film and the documentary was vigorously maintained. The documentary tradition developed side by side with but in the shadow of the more commercially successful feature film. In the latter part of the century however the two forms merged on occasion and mockumentaries fictional works in a documentary format and docudramas reality based works in a fictional format became part of the film and television landscape. The 18 essays here examine the relationships between narrative fiction films and documentary filmmaking focusing on how each influenced the other and how the two were merged in such diverse films and shows as *Citizen Kane*, *M A S H*, *This Is Spinal Tap* and *Destination Moon*. Topics include the docudrama in early cinema, the industrial film as faux documentary, the fear evoked in 1950s science fiction films, the selling of reality in mockumentaries and reality television and documentary forms. The essays provide a foundation for significant rethinking of film history and criticism offering the first significant discussion of two emerging and increasingly important genres. Instructors considering this book for use in a course may request an examination copy here [Voyeur Nation](#) Clay Calvert, 2009-04-21 From 24 hour a day girl cam sites on the World Wide Web to trash talk television shows like *Jerry Springer* and reality television programs like *Cops* we've become a world of voyeurs. We like to watch others as their intimate moments, private facts, secrets and dirty laundry are revealed. *Voyeur Nation* traces the evolution and forces driving what the author calls the voyeurism value. Calvert argues that although spectatorship and sensationalism are far from new phenomena today a confluence of factors legal, social, political and technological pushes voyeurism to the forefront of our image based world. The First Amendment increasingly is called on to safeguard our right via new technologies and recording devices to peer into the innermost details of others' lives without fear of legal repercussion. But Calvert argues that the voyeurism value contradicts the value of discourse in democracy and First Amendment theory since voyeurism by its very nature involves merely watching without interacting or participating. It privileges watching and viewing media images over participating and interacting in democracy. [Form and Function in the Diary Novel](#) Trevor Field, 1989-06-18 A study of novels written in the form of diaries. Some 75 fictional diarists are followed with examples ranging from light hearted works to those of Nobel prize winners like Sartre and Golding which the author uses to illustrate the versatility of this literary form. **ePro** Brian Tiplady, 2016-05-13 Patient self reported data has become increasingly important in today's clinical trials. Trials in some disease indications rely upon patient recorded diary data as the primary endpoint to demonstrate drug efficacy including for example indications such as insomnia, migraine and pain. In addition improvements in quality of life measured using patient questionnaires can now be included as claims on drug labelling. Traditionally these data have been collected using paper questionnaires and diaries issued to subjects. Regulators and the industry have become increasingly aware of the limitations of recording patient reported outcomes data on paper including data quality and integrity issues. As a result there is a

growing interest in collection of patient reported outcomes data using electronic means ePRO Solutions include handheld PDAs Interactive Voice Response IVR systems and other site based hardware such as touchscreen PCs Recently there has been much open debate with the regulators around the use of ePRO in clinical drug submissions US and European agencies have approved new drugs that have included ePRO data in the submission dossier but there are many questions around the adoption of the technology that concern the community These include How should instruments developed on paper be adapted for electronic use and what degree of validation should be done between paper and electronic forms How can researchers ensure they are complying with regulatory requirements including the PRO guidance published by FDA in 2009 when using ePRO solutions Can fewer patients be exposed in a clinical trial as a result of improved data quality obtained using electronic diaries What type of solution should be used for certain patient populations and protocols and how can ePRO solutions be designed optimally to increase patient acceptability and compliance Bill Byrom and Brian Tiplady's ePro addresses all these issues reviews the new FDA guidance and provides a very contemporary view on this important subject

The Art of Confession Christopher Grobe, 2017-11-07 The Art of Confession tells the history of this cultural shift and of the movement it created in American art confessionalism Like realism or romanticism confessionalism began in one art form but soon pervaded them all poetry and comedy in the 1950s and 60s performance art in the 70s theater in the 80s television in the 90s and online video and social media in the 2000s Everywhere confessionalism went it stood against autobiography the art of the closed book Instead of just publishing these artists performed with around and against the text of their lives

Spy, 1997-04 Smart Funny Fearless It's pretty safe to say that Spy was the most influential magazine of the 1980s It might have remade New York's cultural landscape it definitely changed the whole tone of magazine journalism It was cruel brilliant beautifully written and perfectly designed and feared by all There's no magazine I know of that's so continually referenced held up as a benchmark and whose demise is so lamented Dave Eggers It's a piece of garbage Donald Trump
