Reality Readings In Philosophy:

Reality Carl Avren Levenson, Jonathan Westphal, 1994-01-01 Reality brings together philosophical and literary works representing the many ways metaphysical scientific analytic phenomenological literary in which philosophers and others have reflected on questions about reality

First Philosophy II: Knowledge and Reality - Second Edition Andrew Bailey, 2011-07-08 First Philosophy Knowledge and Reality brings together classic and ground breaking readings on epistemology and the philosophy of science Andrew Bailey's highly regarded introductory anthology has been revised and updated in this new edition The comprehensive introductory material for each chapter and selection remains and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added New readings include Edmund Gettier on justified true belief Wesley Salmon on induction and Helen Longino on feminist science

The Broadview Introduction to Philosophy Volume I: Knowledge and Reality Andrew Bailey, 2019-06-18 This volume of The Broadview Introduction to Philosophy offers a thoughtful selection of readings in epistemology metaphysics and the philosophy of religion Substantial selections from important historical texts are provided including the entirety of Descartes's Meditations as are a number of contemporary readings on each topic Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms

Reality in Focus Paul K. Moser, 1990

Phenomenology and the Physical Reality of Consciousness Arthur Melnick, 2011-08-31 The predominant positive view among philosophers and scientists alike is that consciousness is something realized in brain activity This view however largely fails to capture what consciousness is like according to how it shows itself to conscious beings What this work proposes instead is that consciousness is a phenomenon that exists in and throughout the body Apart from whether or not it involves intentionality and apart from whether or not it involves awareness of the self consciousness is self intimating self revealing self disclosing Self disclosure is the definitive phenomenological character of consciousness in all its forms Taking this stance as a point of departure the book presents a specific account of what bodily field phenomenon consciousness is In this way the current stalemate in philosophy over the question of the physical reality of consciousness is broken Series A

Reality and Rationality Wesley C. Salmon, 2005-06-09 This volume of articles most published some new is a follow up to the late Wesley C Salmon's widely read collection Causality And Explanation OUP 1998 It contains both published and unpublished articles and focuses on two related areas of inquiry First is science a rational enterprise Secondly does science yield objective information about our world even the aspects that we cannot observe directly Salmon's own take is that objective knowledge of the world is possible and his work in these articles centers around proving that this can be so Salmon's influential standing in the field ensures that this volume will be of interest to both undergraduates and professional

philosophers primarily in the philosophy of science

Manifest Reality Lucy Allais, 2015-09-03 At the heart of Immanuel Kant's critical philosophy is an epistemological and metaphysical position he calls transcendental idealism the aim of this book is to understand this position Despite the centrality of transcendental idealism in Kant's thinking in over two hundred years since the publication of the first Critique there is still no agreement on how to interpret the position or even on whether and in what sense it is a metaphysical position Lucy Allais argue that Kant's distinction between things in themselves and things as they appear to us has both epistemological and metaphysical components He is committed to a genuine idealism about things as they appear to us but this is not a phenomenalist idealism He is committed to the claim that there is an aspect of reality that grounds mind dependent spatio temporal objects and which we cannot cognize but he does not assert the existence of distinct non spatio temporal objects A central part of Allais's reading involves paying detailed attention to Kant's notion of intuition and its role in cognition She understands Kantian intuitions as representations that give us acquaintance with the objects of thought Kant's idealism can be understood as limiting empirical reality to that with which we can have acquaintance He thinks that this empirical reality is mind dependent in the sense that it is not experience transcendent rather than holding that it exists literally in our minds Reading intuition in this way enables us to make sense of Kant's central argument for his idealism in the Transcendental Aesthetic and to see why he takes the complete idealist position to be established there This shows that reading a central part of his argument in the Transcendental Deduction as epistemological is compatible with a metaphysical idealist reading of transcendental idealism

Language and Reality from a Naturalistic Perspective Andrea Bianchi, 2020-10-19 This book celebrates the many important contributions to philosophy by one of the leading philosophers in the analytic field Michael Devitt It collects seventeen original essays by renowned philosophers from all over the world They all develop themes from Devitt's work thus discussing many fundamental issues in philosophy of linguistics theory of reference theory of meaning methodology and metaphysics In a long final chapter Devitt himself replies to the contributors In so doing he further elaborates his views on various of these issues for example defending his claim in opposition to Chomskyan orthodoxy that languages are external rather than internal his well known causal theory of reference his shocking idea that meanings can be causal non descriptive modes of presentation his methodological naturalism his commitment to scientific realism and his version of biological essentialism The volume will appeal to all scholars and students interested in contemporary theoretical analytic philosophy and will be a must read for any serious researcher in philosophy of language It provides a deep insight into the work of one of the most important living philosophers and will help readers to better understand language and reality from a naturalistic perspective

Jonathan Edwards's Vision of Reality John J. Bombaro, 2011-10-19 Since the publication of Sang Hyun Lee's revolutionary commentary The Philosophical Theology of Jonathan Edwards scholars have considered the possibilities of understanding Jonathan Edwards's thought in terms of dispositional laws forces and habits While some scholars reject the notion of a dispositional

ontology in Edwards others have taken the concept of disposition in his thought beyond the usage the Northampton minister ever indicated especially with respect to soteriological considerations The preacher of Sinners in the Hands of an Angry God is made to be an inclusivist if not a crypto universalist Jonathan Edwards's Vision of Reality substantiates that Edwards in an effort to combat deistic and materialistic Enlightenment paradigms employs dispositions in his philosophy but that his radical theocentrism and Calvinistic particularism established its boundaries within his apologetical reconsideration of spatiotemporal and metaphysical reality Within his spiritual vision of reality Edwards leaves no stone unturned history and even the reprobate find inherent value and a positive functional role not only in God's program of self glorification but as manifestations of divine being the damned are deformities in God The logic of Edwards's theocentric vision of reality pushes his ideas to the limits of acceptable Reformed orthodoxy and sometimes beyond those limits

Film, Philosophy, and Reality Nathan Andersen, 2018-12-21 Film Philosophy and Reality Ancient Greece to Godard is an original contribution to film philosophy that shows how thinking about movies can lead us into a richer appreciation and understanding of both reality and the nature of human experience Focused on the question of the relationship between how things seem to us and how they really are it is at once an introduction to philosophy through film and an introduction to film through philosophy The book is divided into three parts The first is an introduction to philosophy and film designed for the reader with little background in one or the other subject The second examines the philosophical importance of the distinction between appearance and reality and shows that reflection upon this distinction is naturally provoked by the experience of watching movies The final part takes a close and careful look at the style and techniques of Jean Luc Godard's groundbreaking film Breathless in order to illustrate how such themes can be explored cinematically The book addresses topics such as Film what it is and how to understand it The methods and concerns of philosophy The nature of cinematic appearances The history of metaphysics The relationship between cinema and life The philosophical relevance of film techniques With a glossary of key thinkers terms and concepts as well as sections on suggested films and further reading this textbook will appeal to lecturers and students in undergraduate philosophy and film courses and in courses focused on Philosophy of Film Philosophy and Film or Film Philosophy
