

Locke on Reasoning

- In demonstrative reasoning, each link in the inferential chain is “intuitively” certain.
 - “reasoning concerning relations of ideas” [Hume]
- In probable reasoning, some links in the inferential chain are merely probable.
 - “moral reasoning”, “reasoning concerning matter of fact” [Hume]: “factual inference” for short
- For Locke, both types of reasoning involve rational *perception* of the links (IV xvii 2).

Reasoning In Evaluation Inferential Links And Leaps:

Reasoning in Evaluation Deborah M. Fournier, 1995 Evaluators are in the business of reasoning their way toward legitimate conclusions that clients and other stakeholder groups can use In everyday practice evaluators collect and combine evidence to draw conclusions about something or someone Reasoning is the basis for what evaluators do and what they tell their clients to do But is the reasoning sound Evaluative conclusions are often sources of controversy and the inferences drawn from evidence always have potential loopholes for error In what ways can the conclusions resulting from evaluations be trusted How can evaluators reliably combine evidence from multiple sources into a final judgment about the merit or worth of something How and in what ways can evaluative conclusions be justified in an objective way similar to empirical conclusions Obtaining answers to these perennial questions facing evaluators in every evaluation is the field's greatest unmet challenge To stimulate debate and encourage more scholarship in this area the authors in this volume of *New Directions for Evaluation* grapple with some of the thorny problems of how to better understand the reasoning process that is used to establish evaluative conclusions The reader will leave this discussion thinking more clearly and critically about logical practice appreciating the central role of reasoning in the successful practice of evaluation and pondering the various avenues by which to contribute to future developments BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved [The Program Evaluation Standards](#) Donald B. Clinical Data-Mining Irwin Epstein, 2010 Clinical Data Mining CDM involves the conceptualization extraction analysis and interpretation of available clinical data for practice knowledge building clinical decision making and practitioner reflection Depending upon the type of data mined CDM can be qualitative or quantitative it

is generally retrospective but may be meaningfully combined with original data collection Any research method that relies on the contents of case records or information systems data inevitably has limitations but with proper safeguards these can be minimized Among CDM s strengths however are that it is unobtrusive inexpensive presents little risk to research subjects and is ethically compatible with practitioner value commitments When conducted by practitioners CDM yields conceptual as well as data driven insight into their own practice and program generated questions This pocket guide from a seasoned practice based researcher covers all the basics of conducting practitioner initiated CDM studies or CDM doctoral dissertations drawing extensively on published CDM studies and completed CDM dissertations from multiple social work settings in the United States Australia Israel Hong Kong and the United Kingdom In addition it describes consulting principles for researchers interested in forging collaborative university agency CDM partnerships making it a practical tool for novice practitioner researchers and veteran academic researchers alike As such this book is an exceptional guide both for professionals conducting practice based research as well as for social work faculty seeking an evidence informed approach to practice research integration

Mapping Environmental Sustainability Sue Oreszczyn, Andy Lane, 2017-09-06 While there is growing interest in participatory research to address issues around environmental sustainability the focus of analysis tends to be on the results or products of the research rather than the processes involved Addressing this gap the authors draw on their experience of specific mapping techniques based on different systemic concepts and theories that have helped facilitate explore and capture different understandings of the relationships perspectives and boundaries within situations involving environmental sustainability The development of visual mapping techniques is explained and practical case studies describe their application in environmental sustainability projects from working with farmers and their networks to using visual mapping with indigenous communities and managing coastal environments Each case study provides a real world project example from researchers with extensive experience of using these techniques to research different aspects of environmental sustainability over several decades
