Reasons Of Ones Own:

Natural Law and Practical Rationality Mark C. Murphy, 2001-06-11 Natural law theory has been undergoing a revival especially in political philosophy and jurisprudence Yet most fundamentally natural law theory is not a political theory but a moral theory or more accurately a theory of practical rationality According to the natural law account of practical rationality the basic reasons for actions are basic goods that are grounded in the nature of human beings Practical rationality aims to identify and characterize reasons for action and to explain how choice between actions worth performing can be appropriately governed by rational standards These standards are justified by reference to features of the human goods that are the fundamental reasons for action This book is a defence of a contemporary natural law theory of practical rationality demonstrating its inherent plausibility and engaging systematically with rival egoist consequentialist Kantian and virtue accounts

Reality, Reason, and Rights Douglas B. Rasmussen, Aeon J. Skoble, Douglas J. Den Uyl, 2011-01-01 Tibor R Machan one of the most prolific and wide ranging philosophers of our time has been known internationally for decades through his public speaking opinion columns and of course his scholarly writing This collection of essays seeks to explore Machan's philosophical ideas by considering some of the basic issues with which he has been concerned throughout his long and highly productive career The essays range from those concerned with the nature of reality and knowledge to those dealing with the nature of the political legal order Topics such as the character of human nature free choice and responsibility the justification of individual rights and the place of justice in the contemporary welfare state among other basic issues are discussed in these essays Because Machan himself dealt with questions of central importance the essays should appeal to a wide range of interests and disciplines in philosophy and related fields But the essays are also written by people accomplished in their own right and thus seek not only to comment on Machan but to make their own contribution to enduring philosophical issues The volume should be of value to both students and faculty alike

Mimesis and Reason Gregg Daniel Miller, 2011-09-23 Complicating the standard interpretation of Habermas as a proceduralist Mimesis and Reason uncovers the role that mimesis or imitation plays as a genuinely political force in communicative action Through a penetrating examination of Habermas's

use of themes and concepts from Plato George Herbert Mead and Walter Benjamin Gregg Daniel Miller reconstructs Habermas's theory to reveal a new postmetaphysical articulation of reason that lays the groundwork for new directions in political theory

Being Apart from Reasons Cláudio Jr. Michelon, 2006-03-09 Being Apart from Reasons deals with the question of how we should go about using reasons to decide what to do More particularly the book presents objections to the most common response given by contemporary legal and political theorists to the moral complexity of decision making in modern societies namely the attempt to release public agents from their argumentative burden by insulating a particular set of reasons from the general pool of reasons and assigning the former systematic priority over all other reasons That strategy is apparent both in Rawls claim that reasons concerning the right are systematically prior to reasons concerning the good and in Raz's claim that pre-emptive reasons are systematically prior to first order reasons The same strategy is also instantiated by certain arguments for the procedural value of law such as Jeremy Waldron's In the book each of those arguments for the insulation of reasons is objected to in order to defend the thesis the reasoning by public agents must always be as comprehensive as possible The remaining chapters object to those arguments mentioned above which aim at justifying the exclusion of certain reasons from public agents decision making

Emotions and Reasons Patricia S. Greenspan, 2014-02-25 In Emotions and Reasons Patricia Greenspan offers an evaluative theory of emotion that assigns emotion a role of its own in the justification of action She analyzes emotions as states of object directed affect with evaluative propositional content possibly falling short of belief and held in mind by generalized comfort or discomfort

Self, Reason, and Freedom Andrea Christofidou, 2013-01-03 Freedom and its internal relation to reason is fundamental to Descartes philosophy in general and to his Meditations on First Philosophy in particular Without freedom his entire enquiry would not get off the ground and without understanding the role of freedom in his work we could not understand what motivates key parts of his metaphysics Yet not only is freedom a relatively overlooked element but its internal relation to reason has gone unnoticed by most studies of his philosophy Self Reason and Freedom A New Light on Descartes Metaphysics by defending freedom's internal relation to reason sheds new light on Descartes metaphysics and restores the often dismissed Fourth Meditation to the core of his metaphysics as he conceived it Implicit in that relation is a rejection of any authority external to reason Andrea Christofidou shows how this lends strength and explanatory force to Descartes enquiry and reveals his conception of the unity of the self and of its place in the world Self Reason and Freedom A New Light on Descartes Metaphysics is essential reading for students and scholars of Descartes and anyone studying seventeenth century philosophy

Karl Jaspers' Theory of Irrationality Daniel Adsett, 2024-12-16 Defending the view that Karl Jaspers concept of irrationality *Widervernunft* is better able to account for pathological patterns of individual and collective thinking Karl Jaspers Theory of Irrationality From Delusions to Worldviews argues that irrationality is incorrigibility a blockage of reason as the will to communication Highlighting the importance of freedom and creativity at the heart of reason Vernunft Daniel Adsett analyzes examples of delusional thought through a Jaspersian lens He shows that irrationality arises when we hold to certain attitudes with an incorrigible conviction and refuse to genuinely consider the possibility that we might need to revise or change our beliefs In presenting these arguments Adsett
