Rebirth Reform And Resilience Universities In Transition 1300 1700:

Rebirth, Reform, and Resilience James M. Kittelson, Pamela J. Transue, 1984 *A History of the University in Europe* Hilde de Ridder-Symoens, Walter Rüegg, 1992 *A History of the University in Europe* covers the development of the university in Europe East and West from its origins to the present day No other up to date comprehensive history of this type exists its originality lies in focusing on a number of major themes viewed from a European perspective and in its interdisciplinary collaborative and transnational character Volume 1 covering the Middle Ages places the medieval European universities in their social and political context After explaining the number and types of universities from their origins in the twelfth century to around 1500 it examines the inner workings as an institution and paints a general picture of medieval student life Volume 2 attempts to situate the universities in their social and political context throughout the three centuries spanning the period 1500 to 1800 Volume 3 shows that by focusing on the freedom of scientific research teaching and study the medieval university structure was modernized and enabled discoveries to become a professional bureaucratically regulated activity of the university This opened the way for the victorious march of the natural sciences and led to student movements resulting in the university being ultimately cast in the role of a citadel of political struggle in a world wide fight for freedom Publisher

Intellectual Traditions at the Medieval University (2 vol. set) Russell Friedman, 2012-10-12 This book traces the rise and decline of two rival intellectual traditions in later medieval trinitarian theology one of them predominantly Franciscan the other predominantly Dominican Disagreeing about the way to understand the identification in John's Gospel of the second person of the Trinity the Son with the Word the two traditions clashed over the issues of concepts and concept formation the category of relation counterfactual logic and the use of authority Considering more than seventy theologians from the period the book presents an overview of the debate while also including detailed studies of the trinitarian views of such thinkers as Thomas Aquinas Henry of Ghent John Duns Scotus Peter Auriol William Ockham Walter Chatton and Gregory of Rimini

Humanism and Protestantism in Early Modern English Education Ian Green, 2016-05-13 This volume is the first attempt to assess the impact of both humanism and Protestantism on the education offered to a wide range of adolescents in the hundreds of grammar schools operating in England between the Reformation and the Enlightenment By placing that education in the context of Lutheran Calvinist and Jesuit education abroad it offers an overview of the uses to which Latin and Greek were put in English schools and identifies the strategies devised by clergy and laity in England for coping with the tensions between classical studies and Protestant doctrine It also offers a reassessment of the role of the godly in English education and demonstrates the many ways in which a classical education came to be combined with close support for the English Crown and established church One of the major sources used is the school textbooks which were incorporated into the English Stock set up by leading members of the Stationers Company of London and reproduced in hundreds of thousands of copies during the seventeenth and eighteenth centuries Although the core of

classical education remained essentially the same for two centuries there was a growing gulf between the methods by which classics were taught in elite institutions such as Winchester and Westminster and in the many town and country grammar schools in which translations or bilingual versions of many classical texts were given to weaker students The success of these new translations probably encouraged editors and publishers to offer those adults who had received little or no classical education new versions of works by Aesop Cicero Ovid Virgil Seneca and Caesar This fascination with ancient Greece and Rome left its mark not only on the lifestyle and literary tastes of the educated elite but also reinforced the strongly moralistic outlook of many of the English laity who equated virtue and good works with pleasing God and meriting salvation

The Aristotelian Tradition in Early Modern Protestantism Manfred Svensson, 2024 Aristotle's moral and political thought formed the backbone of education in practical philosophy for centuries during the classical and medieval periods It has often been presumed however that with the advent of the Protestant Reformation this tradition was broken Countering this widespread view Manfred Svensson discusses dozens of commentaries on Aristotle's Ethics and Politics that emerged from Protestant universities and academies throughout the 16th and 17th centuries showing that early modern Protestants never lost their connection to Aristotle He offers a broad contextualisation of these works and in depth discussion of their key ethical and political concepts

Scholarly Self-Fashioning and Community in the Early Modern University Richard Kirwan, 2016-04-01 A greater fluidity in social relations and hierarchies was experienced across Europe in the early modern period a consequence of the major political and religious upheavals of the sixteenth and seventeenth centuries At the same time the universities of Europe became increasingly orientated towards serving the territorial state guided by a humanistic approach to learning which stressed its social and political utility It was in these contexts that the notion of the scholar as a distinct social category gained a foothold and the status of the scholarly group as a social elite was firmly established University scholars demonstrated a great energy when characterizing themselves socially as learned men This book investigates the significance and implications of academic self-fashioning throughout Europe in the early modern period It describes a general and growing deliberation in the fashioning of individual communal and categorical academic identity in this period It explores the reasons for this growing self-consciousness among scholars and the effects of its expression social and political desired and real
