Advances in Pain Research and Therapy, 1987 Vol 1 consists of the Proceedings of the 1st World Congress on Pain

Contemporary Issues in Chronic Pain Management Winston C.V. Parris, 2012-12-06 PROFESSOR SIR KENNETH L STUART Pain control has become one of medicine's most rapidly growing disciplines and I welcome the opportunity to write this foreword to a book that I am sure will make its own unique contribution to advancing this discipline My pleasure in writing it is heightened by my pride in the fact that its editor was at one time an undergraduate student of mine at the University of the West Indies in Jamaica One of the uncertainties teachers always face is that they can never predict how their charges will turn out This uncertainty has been happily resolved Dr Parris professional career has been marked by the same dedication and commitment that characterized his undergraduate days and that clearly has been brought to the preparation of this scholarly and practical work Pain relief has been until recently a comparatively neglected field Its neglect was determined not so much by lack of professional awareness of its importance but mainly because so little could be done about it in the past

Textbook of Palliative Medicine and Supportive Care Eduardo Bruera, Irene Higginson, Charles F. von Gunten, Tatsuya Morita, 2015-01-15 the thoroughness of the text has to be admired It is an excellent starting point for students of palliative care which makes an important contribution to any library

British Journal of Hospital Medicine covers a plethora of topics ranging from the development of palliative medicine in different countries to clinical topics and bioethics and **Current Catalog** National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965-70 Gastrointestinal Oncology James L. Abbruzzese, 2004 In 74 chapters Gastrointestinal Oncology brings together a diverse group of specialists to provide the most authoritative up to date and encyclopedic volume currently available on the subject The first part of this text introduces a series of concepts and topics that are important to gastrointestinal malignancies in general These topics include epidemiologic principles prevention screening familial GI cancers developmental and molecular biology pathobiology general therapeutic principles emerging therapies and palliative care The second part of the book covers each of the specific cancers affecting the human gastrointestinal tract These chapters are introduced by state of the art discussions outlining our current understanding of the pathobiology and molecular biology relevant to each cancer Subsequent sections describe the multidisciplinary management of specific clinical situations By organizing the treatment related chapters around clinical scenarios the reader will readily find the information necessary to effectively manage the complex clinical situations encountered by patients with gastrointestinal malignancies Cancer Pain Eduardo D. Bruera, Russell K. Portenoy, 2003-06-23 Nearly one in three people will be diagnosed with cancer and many of these patients will suffer from related cancer pain Cancer associated pain is widely feared by cancer patients but knowledge about the causes and management of cancer pain has increased dramatically in recent years and many new treatment options are available This comprehensive book discusses the unique characteristics of cancer pain including its pathophysiology clinical assessment diagnosis pharmacological management and nonpharmacological treatment The internationally recognized authors are leaders in cancer pain research and they apply their first hand knowledge in summarizing the principal issues in the clinical management of cancer pain This state of the art book cohesively addresses the full range of disciplines regularly involved in cancer pain management including pharmacology communication studies and psychology Cancer Pain is a scholarly but accessible text that will be an essential resource for physicians nurses and medical students who treat patients suffering from cancer pain Pain and Touch Lawrence Kruger, 1996-09-30 An explosion of advances in the area of tactile perception and pain led to the development of this comprehensive state of the art text on basic research and clinical practice Equal parts psychology and neuroscience Pain and Touch covers peripheral cutaneous tactile information processing sensory mapping tactile exploratory behavior neurophysiology of nociception and nociceptors in pain research clinical scaling methods for psychophysics of pain and pain control pathology and therapeutics A Comprehensive Curriculum for Trauma Nursing Elizabeth W.
