Recent Progress In Medicinal Plants Vol 10 Phytotherapeutics:

Phytohormones: A Window to Metabolism, Signaling and Biotechnological Applications Lam-Son Phan Tran, Sikander Pal, 2014-04-01 Abiotic and biotic stresses adversely affect plant growth and productivity The phytohormones regulate key physiological events under normal and stressful conditions for plant development Accumulative research efforts have discovered important roles of phytohormones and their interactions in regulation of plant adaptation to numerous stressors Intensive molecular studies have elucidated various plant hormonal pathways each of which consist of many signaling components that link a specific hormone perception to the regulation of downstream genes Signal transduction pathways of auxin abscisic acid cytokinins gibberellins and ethylene have been thoroughly investigated More recently emerging signaling pathways of brassinosteroids jasmonates salicylic acid and strigolactones offer an exciting gateway for understanding their multiple roles in plant physiological processes At the molecular level phytohormonal crosstalks can be antagonistic or synergistic or additive in actions Additionally the signal transduction components of one hormonal pathway may interplay with the signaling components of other hormonal pathways Together these and other research findings have revolutionized the concept of phytohormonal studies in plants Importantly genetic engineering now enables plant biologists to manipulate the signaling pathways of plant hormones for development of crop varieties with improved yield and stress tolerance This book written by internationally recognized scholars from various countries represents the state of the art understanding of plant hormones biology signal transduction and implications Aimed at a wide range of readers including researchers students teachers and many others who have interests in this flourishing research field every section is concluded with biotechnological strategies to modulate hormone contents or signal transduction pathways and crosstalk that enable us to develop crops in a sustainable manner Given the important physiological implications of plant hormones in stressful environments our book is finalized with chapters on phytohormonal crosstalks under abiotic and biotic stresses Medicinal Plants - Recent Advances in Research and Development Hsin-Sheng Tsay, Lie-Fen Shyur, Dinesh Chandra Agrawal, Yang-Chang Wu, Sheng-Yang Wang, 2016-10-25 Since ancient times plants have been used as a prime natural source of alternative medicines and have played an important role in our lives The old tradition of medicinal plant application has turned into a highly profitable business in the global market resulting in the release of a large number of herbal products People have tried to find different sources of medicines to alleviate pain and cure different illnesses Due to severe constraints of synthetic drugs and the increasing contraindications of their usage there is a growing interest world over in the usage of natural products based on medicinal herbs hence there is an ever expanding market of herbs and herbal based medicinal preparations all over the world This has culminated into an exponential increase in number of research groups in different geographical locations and generation of volume of research data in the field in a short span of time The path breaking advancement in research methods and interdisciplinary approaches is giving birth to newer perspectives Therefore it

becomes imperative to keep pace with the advancement in research and development in the field of medicinal herbs There are a large number of researchers in different parts of the world working on various aspects of medicinal plants and herbal medicines The idea is to bring their recent research work into light in the form of a book The proposed book contains chapters by the eminent researchers in different countries and working with different disciplines of medicinal plants Articles pertain to different disciplines such as 1 Resources and conservation of medicinal plants 2 Biosynthesis and metabolic engineering of medicinal plants 3 Tissue culture propagation and bioreactor technology of medicinal plants 4 Phytochemical research on medicinal plants 5 Herbal medicines and plant derived agents in cancer prevention and therapy 6 Herbal medicines and plant derived agents in metabolic syndrome management 7 Herbal medicines and plant derived agents in modulation of immune related disorders 8 Herbal medicines and hepatotoxicity The book will prove itself an asset for the researchers professionals and also students in the area of medicinal plants and mechanism of their action **International**

John A. Parrotta,2024-10-02 South Asia a region of outstanding biological diversity is home to approximately 2.1 billion people whose rich cultural traditions include sophisticated knowledge of the properties and uses of thousands of native and introduced plant species Plant based drugs integral to the traditional medical systems of India and neighboring countries play a central role in health care throughout the region and beyond as regional and global demand for therapeutically valuable plants continues to grow However the ongoing transformation and degradation of forests and other natural ecosystems in this region due to rapid environmental and socioeconomic changes poses serious challenges for the conservation and sustainable utilization of its medicinal plant wealth Efforts to conserve the region s rich biodiversity and

associated traditional knowledge require up to date information on the status and trends of these resources and their importance for health care and livelihoods *Healing Plants of South Asia A Handbook of the Medicinal Flora of the Indian Subcontinent* helps to address this need The work s introduction provides overviews of South Asia s diverse systems of traditional medicine as well as the region s biogeography ecosystem and plant species diversity and associated conservation challenges Subsequent chapters focus on nearly 2 000 species of plants most commonly used in traditional medicine within the region In chapters devoted to ferns and lycophytes including 59 species conifers 20 species and flowering plants 1849 species the information provided draws upon a wide variety of authoritative published sources as well as reliable online databases Entries for each species include currently accepted scientific names and common synonyms vernacular names in the major regional languages a complete botanical description information on the species ecology and conservation status traditional therapeutic uses in Ayurveda Unani Siddha Tibetan medicine and more localized folk medical systems and key references The majority of these species are also beautifully illustrated with photos and or botanical drawings *Healing Plants of South Asia A Handbook of the Medicinal Flora of the Indian Subcontinent* will be of value to students scientists and professionals in a number of fields including pharmacology pharmaceutics food chemistry and nutrition natural products chemistry ethnobotany and ethnomedicine It should also appeal to conservationists community development practitioners industry and policy makers among a host of those involved in the world of medicinal plants and traditional medicine in South Asia

Phytomedicine Rouf Ahmad Bhat,Khalid Rehman Hakeem,Moonisa Aslam Dervash,2021-02-20 *Phytomedicine A Treasure of Pharmacologically Active Products from Plants* aims to present updated knowledge of plant based medicines in terms of their research and development production and utilization from the viewpoint of sustainability and by using the latest technologies The book explores different phytometabolites on a mass scale coupled with the efficacy performance and applicability on target organisms to treat curable and fatal diseases Readers will find a coherent package of phytotherapeutic information regarding inclusive assortment of research based scientific amplitude of metabolites from the plant world encompassing various action plans Information is presented sequentially regarding phytochemistry biological activity and the serviceable aspects of bioactive compounds The book also addresses various advancements and achievements of novel drugs from plants using molecular and enzymatic activities and various technological tools in an ecofriendly fashion Discusses phytotherapeutic properties for a wide range of medical conditions including anti pyretic anti infective anti malarial Anti AIDS anti diabetic anti cancerous immune modulatory applications Includes a discussion of synergistic effects of formulations and antagonistic drug interactions Addresses advancements and achievements of novel plant based drugs using molecular enzymatic activities and various technological tools in an eco friendly fashion

Phytotechnology Wanderley Pereira Oliveira,2021-12-30 Herbal products have traditionally been used in several industrial sectors and have gained a notable reputation in recent years due to the current trend in society which seeks natural healthier and more sustainable products

The processing of these products however is multiplex but important for the production of a high quality standardised product Phytotechnology A Sustainable Platform for the Development of Herbal Products highlights the complex multidisciplinary process of phytopharmaceutical technology used to create herbal remedies Organised into four parts various experts in the field clearly and objectively address the fundamental and technological concepts involved in the manufacturing of high quality herbal products Additional Features Emphasises how herbal products have traditionally been used in several industrial sectors including pharmaceutical science food cosmetics chemical engineering and agroindustry Provides a much needed update of the current information regarding phytopharmaceutical technology and focuses on industrial applications Written using a multidisciplinary approach to include all subjects involved in the processing of herbal products The information presented is valuable reference material for professionals of different specialties who wish to enter this fascinating and innovative area

Herbal Medicine Phytochemistry Sylvester Chibueze Izah, Matthew Chidozie Ogwu, Muhammad Akram, 2024-07-09 This book offers a comprehensive perspective of herbal medicine phytochemistry and explores the application of plant extracts as bioactive compounds in disease prevention and treatment in modern or traditional medicine The book starts with an introduction to the history and value of herbal medicine followed by 3 parts covering the main phytochemical components and metabolites in herbal medicine different uses and practices in herbal medicine including a region wise analysis of methods and practices and an overview of regulations and policies for herbal medicinal practitioners and the advances and challenges in quality assessment of herbal medicine Plants generally have the tendency to bioaccumulate trace metals from the environment and they are easily contaminated by microorganisms from water sources and poor hygiene practices of the herbalist Quality assessment and assurance is thus a pertinent challenge in herbal medicine practice i e in remedy formulation and application and this book offers an authoritative perspective on this topic covering aspects such as quality control strategies preparation techniques chemical quantification in phytomedicine and the efficacy and safety of herbal remedies Moreover in this book readers will find valuable insights into the latest trends and developments in the field and a critical review of the application of medicinal plants to treat cardiovascular digestive respiratory neurological and reproductive diseases Particular attention is given to the advances and trends in the field and readers will learn about the latest biotechnological approaches the use of nanotechnology in herbal medicine metabolomic analysis of medicinal plants big data application in herbal medicine and the value of herbal medicine towards sustainability Given its breadth this book is aimed at researchers academics practitioners and professionals working in the fields of natural life health clinical and biomedical sciences and interested in herbal remedies pharmacology pharmacognosy human nutrition and dietetics plant biology and biotechnology microbiology

New Avenues in Drug Discovery and Bioactive Natural Products Raja Chakraborty, Saikat Sen, 2023-08-01 *New Avenues in Drug Discovery and Bioactive Natural Products* is the second volume of the Natural Medicine book series It is devoted to current research in drug discovery from natural sources

The volume features 13 chapters that cover modern analytical and scientific approaches. The book starts with chapters on advanced analytical and research techniques such as genomic mining, quality control of herbal drugs, DNA fingerprinting, high throughput screening, molecular docking and extraction techniques. The contributors provide a summary of challenges for researchers and commercial applications where possible. The book also features chapters dedicated to specific medicinal agents that target a disease: glycosides, SARS CoV2 spike protein inhibitors and andrographolides. The collection of important research topics in natural product chemistry aims to help the scholars and researchers in the scientific community that are involved in the extraction and development of new medicines.

Medicinal and Aromatic Plants Tariq Aftab, Khalid Rehman Hakeem, 2021-03-27

Before the concept of history began, humans undoubtedly acquired life benefits by discovering medicinal and aromatic plants (MAPs) that were food and medicine. Today, a variety of available herbs and spices are used and enjoyed throughout the world and continue to promote good health. The international market is also quite welcoming for MAPs and essential oils. The increasing environment and nature-conscious buyers encourage producers to produce high quality essential oils. These consumer choices lead to growing preference for organic and herbal based products in the world market. As the benefits of medicinal and aromatic plants are recognized, these plants will have a special role for humans in the future. Until last century, the production of botanicals relies to a large degree on wild collection. However, the increasing commercial collection, largely unmonitored trade and habitat loss lead to an incomparably growing pressure on plant populations in the wild. Therefore, medicinal and aromatic plants are of high priority for conservation. Given the above, we bring forth a comprehensive volume *Medicinal and Aromatic Plants: Healthcare and Industrial Applications*, highlighting the various healthcare, industrial and pharmaceutical applications that are being used on these immensely important MAPs and its future prospects. This collection of chapters from the different areas dealing with MAPs caters to the need of all those who are working or have interest in the above topic.

Biodiversity and Traditional Knowledge Sarah A Laird, 2010-09-23

Biodiversity research and prospecting are long standing activities taking place in a new legal and ethical environment. Following entry into force of the Convention on Biological Diversity in 1993 and other recent policy developments, expectations and obligations for research and prospecting partnerships have changed. However, to date, there are few guides to integrating these concepts with practice. This book offers practical guidance on how to arrive at equitable biodiversity research and prospecting partnerships. Drawing on experience and lessons learned from around the world, it provides case studies, analysis and recommendations in a range of areas that together form a new framework for creating equity in these partnerships. They include researcher codes of ethics, institutional policies, community research agreements, the design of more effective commercial partnerships and biodiversity prospecting contracts, the drafting and implementation of national access and benefit sharing laws and institutional tools for the distribution of financial benefits. As part of the People and Plants initiative to enhance the role of communities in efforts to conserve biodiversity and use natural resources sustainably, *Biodiversity and*
