Recent Advances In Lower Carboniferous Geology Geological Society Special Publication 107:

Recent Advances in Lower Carboniferous Geology Peter Strogon, Ian D. Somerville, Gareth Ll Jones, 1996 Rocks of Lower Carboniferous age are widely developed across Europe Apart from their intrinsic geological interest they are hosts to major Zn Pb Cu Ba deposits in Ireland and Au FeS₂ deposits in the Iberian Pyrite Belt Further the Upper Palaeozoic rocks of Europe are increasingly becoming the target of oil and gas exploration The wealth of data on Lower Carboniferous rocks while not guaranteeing success will be an invaluable tool for exploration This book brings together in one volume advances over the last decade in several specialist subdisciplines of geology It contains papers on carbonate and clastic sedimentology palaeontology palaeoecology stratigraphy and biostratigraphy The Geology of Ireland Charles Hepworth Holland, Ian Sanders, 2022-07-18 The Geology of Ireland is about the island of Ireland as a physical whole and includes chapters on marine geology and the history of geology in Ireland The text is intended for professional geologists and students of geology

Devonian Climate, Sea Level and Evolutionary Events R. T. Becker, 1st, C. E. Brett, P. Königshof, 2nd, 2016-10-20 The geological and palaeontological records of climate change and evolutionary events reflect Earth's widely fluctuating climate systems Past climates hold the clues to understanding future developments In this context research on linked climate biodiversity and sea level fluctuations of the Devonian contributes to the general knowledge of deep time climate dynamics A fruitful co operation between the International Geoscience Programme IGCP 596 and the International Subcommission on Devonian Stratigraphy SDS addressed the complex succession of climate linked Devonian global events of varying magnitude The primary goal of IGCP 596 was to assess mid Palaeozoic climate changes and their impact on marine and terrestrial biodiversity using an interdisciplinary approach The focus of SDS includes a revision of the eustatic sea level curve and the integration of refined chrono and biostratigraphy with modern chemo magneto cyclo event and sequence stratigraphy This enabled the much improved dating and correlation of abiotic perturbations evolutionary changes organism and ecosystem ranges Results by 37 authors are presented in 14 chapters which cover the entire Devonian **The Geometry and**

Petrogenesis of Dolomite Hydrocarbon Reservoirs Colin J. R. Braithwaite, Giancarlo Rizzi, Gillian Darke, Geological Society of London, 2004 The wide distribution of dolomite rocks in North American Middle and Far Eastern hydrocarbon reservoirs is reason enough for their intensive study In this volume dolomite enthusiasts review progress and define the current boundaries of dolomite research related particularly to the importance of these rocks as reservoirs **Fractures, Fluid Flow and Mineralization** Ken McCaffrey, Lidia Lonergan, Jamie Wilkinson, 1999 Hydrothermal mineralization is usually structurally controlled so it is important to understand the role of faulting and fracturing in enhancing rock permeability and facilitating fluid flow and mass transfer This is the main theme of this interdisciplinary volume and the papers included are intended to provide an overview of current ideas at the interfaces of structural geology fluid flow and mineralization research **Microfacies of Carbonate Rocks** Erik Flügel, 2013-11-11 This unparalleled reference

synthesizes the methods used in microfacies analysis and details the potential of microfacies in evaluating depositional environments and diagenetic history and in particular the application of microfacies data in the study of carbonate hydrocarbon reservoirs and the provenance of archaeological materials Nearly 230 instructive plates 30 in color showing thin section photographs with detailed explanations form a central part of the content Helpful teaching learning aids include detailed captions for hundreds of microphotographs boxed summaries of technical terms many case studies guidelines for the determination and evaluation of microfacies criteria for enclosed CD with 14000 references self testing exercises for recognition and characterization skills and more

Resolving the Late Paleozoic Ice Age in Time and Space

Christopher R. Fielding, Tracy D. Frank, John L. Isbell, 2008-01-01 This volume summarizes new developments in understanding the longest lived icehouse period in Phanerozoic Earth history the late Paleozoic ice age Resolving the Late Paleozoic Ice Age in Time and Space provides summaries of existing and new data from the various Gondwanan continental relics and also reviews stratigraphic successions from the paleotropical and temperate regions of Laurussia that preserve an indirect record of glaciation It addresses the extent to which records of glaciation indicate protracted long term climatic austerity as opposed to fluctuating more dynamic climate and provides new constraints on the timing of glaciation Additionally it tackles questions of synchronicity of glaciation across the various Gondwanan continental relics and timing relationships between near field and far field records at greater levels of resolution than has been possible previously Results point toward a dynamic icehouse regime that is comparable to the Cenozoic icehouse and away from traditional interpretations of the late Paleozoic ice age as a single protracted event that involved stable long lived ice centers Publisher's website
