Recent Advances In Psychology And Aging:

Recent Advances in Psychology and Aging P. Costa, I.C. Siegler, 2003-12-10 Recent Events in the Psychology of Aging documents the successful integration of aging into the mainstream of psychology. Leading psychologists present overviews of the key issues and research findings on mainstream topics. These include cognitive neuroscience, visual attention, learning, memory, and cognition, as well as personality and happiness. The intersection of aging content with mainstream psychology is also prominent in the areas of emotions, personality, and social psychology, as seen in the chapters on subjective well-being, emotional development, self-esteem, and personality trajectories. The seven chapters of this book offer information on such topics as the seven sins of memory, categorizing the common breakdowns of memory in everyday life, and the special breakdown of sins that increase with aging, problems with attention and learning, and offers answers to questions such as: do emotions get blunted with age? do older people focus more on positive feelings? and the age-old question of whether older people are happier than younger people. This is given in the chapter on the evolving concept of subjective well-being and the multifaceted nature of happiness. Questions about what occurs to one's self-esteem and personality are also masterfully discussed, and the answers may be surprising. The concluding seventh chapter provides a cultural lens on the biopsychosocial study of aging.

The Handbook of Aging and Cognition Fergus I.M. Craik, Timothy A. Salthouse, 2011-03-15 Cognitive aging is a flourishing area of research. A significant amount of new data, a number of new theoretical notions, and many new research issues have been generated in the past ten years. This new edition reviews new findings and theories, enables the reader to assess where the field is today, and evaluates its points of growth. The chapters are organized to run from reviews of current work on neuroimaging, neuropsychology, genetics, and the concept of brain reserve, through the mainstream topics of attention, memory, knowledge, and language, to a consideration of individual differences and of cognitive aging in a lifespan context. This edition continues to feature the broad range of its predecessors while also providing critical assessments of current theories and findings.

Social Structures and Aging Individuals K. Warner Schaie, Ronald P. Abeles, 2008-07-02 A useful reference book. Readers will find themselves returning to chapters again and again. *PsycCritiques*. This is the 20th and final volume in the Societal Impact on Aging series. It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process. The editors therefore invited major organizers of and contributors to the 19 earlier volumes to review both the accomplishments and omissions of their efforts, discuss some timely new topics, and provide guidelines for future research and theoretical explanations. The book is divided into five broad topics: health and wellbeing, including the role of religion, personality and cognition, the impact of changes in technology and the work place, issues of socio-cultural change and historical context, and the familial and societal contexts of aging.

Social-Emotional Curriculum With Gifted and Talented Students Joyce Van Tassel-Baska, Tracy L.

Cross, F. Richard Olenchak, 2021-09-03 A gifted education Legacy Award winner *Social Emotional Curriculum With Gifted and Talented Students* provides a thorough introduction to methods for developing social emotional curricula for use with gifted and talented learners in the school setting. Including overviews of strategies that work for implementing social emotional strategies in the everyday curricula, this book is part of the Critical Issues in Equity and Excellence series, a joint publication project of the National Association for Gifted Children and Prufrock Press. It combines research and experience from leading scholars in the field of the affective needs of gifted students in a convenient guide for teachers, administrators, and gifted education program directors. The book covers theories to guide affective curricula, the needs of minority students, models to develop social emotional curricula, tips for counseling gifted students, and strategies to promote the social emotional needs of gifted students along with discussions of suicide prevention among this population, the use of bibliotherapy and discussion groups, and the teacher counselor connection in affective curricula. This handy guide to developing social emotional curricula for gifted students is a necessity for anyone serving and working with this population. Educational Resource

Encyclopedia of Health and Aging Kyriakos S. Markides, 2007-04-13 The *Encyclopedia of Aging and Health* is both a comprehensive reference of best practices across gerontology-related fields and a philosophical work that inspires its readers to embrace a loftier and more global view of aging beyond disability and medications.
