Reading for History in the Damascus Document Maxine L. Grossman, 2018-12-24 Scholars tend to view the Damascus Document as a historical source but a reading of the text in light of contemporary audience oriented literary criticism finds its emphasis in the ideological construction of history and communal identity rather than in the preservation of a historical record An introduction to contemporary literary criticism is followed by a series of thematic readings focusing on historical narrative priestly imagery and gender in the covenant community Each theme is examined in terms of its potential for multiple sometimes contradictory interpretations and for its place in the larger sectarian discourse This study offers an alternative approach to the historiography of ancient Jewish sectarianism acknowledging the presence of competing claims to shared traditions and the potential for changes in textual interpretation over time or among diverse communities

Theories of Reading Karin Littau, 2006-12-04 Bringing insights from book history to bear on literary history and theory this book points to a split between literary study that regards reading as a reducibly mental activity and a tradition reaching back to antiquity which assumed that reading was not only about sense making but also about sensation

Nicholas Entrikin, Doug Richardson, 2012-03-15 The past decade has witnessed a remarkable resurgence in the intellectual interplay between geography and the humanities in both academic and public circles The metaphors and concepts of geography now permeate literature philosophy and the arts Concepts such as space place landscape mapping and territory have become pervasive as conceptual frameworks and core metaphors in recent publications by humanities scholars and well known writers *Envisioning Landscapes Making Worlds* contains over twenty five contributions from leading scholars who have engaged this vital intellectual project from various perspectives both inside and outside of the field of geography The book is divided into four sections representing different modes of examining the depth and complexity of human meaning invested in maps attached to landscapes and embedded in the spaces and places of modern life The topics covered range widely and include interpretations of space place and landscape in literature and the visual arts philosophical reflections on geographical knowledge cultural imagination in scientific exploration and travel accounts and expanded geographical understanding through digital and participatory methodologies The clashing and

blending of cultures caused by globalization and the new technologies that profoundly alter human environmental experience suggest new geographical narratives and representations that are explored here by a multidisciplinary group of authors This book is essential reading for students scholars and interested general readers seeking to understand the new synergies and creative interplay emerging from this broad intellectual engagement with meaning and geographic experience *Shelley's German Afterlives* S. Schmid, 2007-04-16 Schmid shows how reception processes work across linguistic national and cultural boundaries taking the English Romantic poet Shelley's German reception as a case study It also highlights Anglo German literary and cultural relations of the nineteenth and twentieth centuries and supplies a theoretical framework for further analysis
