Reification Or The Anxiety:

Reification Timothy Bewes, 2002-12-17 Reification is the process by which human experience and action is transformed into a sort of object separated from human reality and was identified by Karl Marx as being a natural outgrowth of capitalist accumulation. The concept has recently fallen into analytical disrepute partly because the concept of reification is itself reifying, argues Bewes. Brown U. He revisits concepts of reification in the works of Marx, Adorno, Fanon, Lukacs and others seeking to resolve theoretical problems thrown up by the idea. The theory presented here is an attempt to resolve the theory of reification with its obsolescence. Annotation copyrighted by Book News Inc. Portland, OR

The Global Political Economy of Intellectual Property Rights, 2nd ed Christopher May, 2015-04-10 The first edition established itself as one of the leading books to situate the issue of intellectual property within the discipline of International Political Economy (IPE). Since its publication, intellectual property has continued to rise up the global agenda, reflecting expanding interest in the area among policy makers and advocacy groups linked to the increasingly fraught politics of the global governance of IPRs. Significantly revised and updated to take account of developments within the World Trade Organization and the World Intellectual Property Organization, this edition incorporates the author's recent research on IPRs. It retains the theoretical and analytical elements of the first edition whilst offering students and researchers a detailed analysis of how intellectual property is politically constructed and how it is linked to the economics of knowledge and information in the contemporary global political economy. Rapidly developing issues addressed in the work include arguments around the implementation of the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS), the WIPO Development agenda and the resistance to socialization programmes, the AIDS crisis and the pharmaceutical industry, Digital Rights Management. This book will be of interest to students and researchers of international political economy, international relations and intellectual property law.

The Carol J. Adams Reader Carol J. Adams, 2016-10-06 The Carol J. Adams Reader gathers together Adams's foundational and recent articles in the fields of critical studies, animal studies, media studies, vegan studies, ecofeminism and feminism as well as relevant interviews and conversations in which Adams identifies key concepts and new developments in her decades-long work. This volume, a companion to *The Sexual Politics of Meat* (Bloomsbury Revelations), offers insight into a variety of urgent issues for our contemporary world: Why do batterers harm animals? What is the relationship between genocide and attitudes toward other animals? How do activism and theory feed each other? How do race, gender and species categories interact in strengthening oppressive attitudes? In clear language, Adams identifies the often hidden aspects of cultural presumptions. The essays and conversations found here capture the decades-long energy and vision that continue to shape new ways of thinking about and responding to oppression.

The Politics of Recognition in the Age of Digital Spaces Benjamin JJ Carpenter, 2023-09-15 This book provides a philosophical analysis of the notion of selfhood that underlies identity politics. It offers a unique theory of the self that combines previous scholarly work on recognition and the phenomenology of space. The politics of identity occupy the centre of a contested terrain. Marginalised and oppressed peoples continue to seek the transformation of our shared social world and our political institutions required for their lives to be liveable. Public criticism and academic treatments of identity politics often take a disparaging view that treats it as subordinate to more general political questions about justice and the organisation of society and its institutions. This book argues that these polemics ignore the numerous ways in which all politics is concerned with matters of selfhood and identity. Through a rereading of Hegel's account of recognition as an ongoing and dynamic process that constitutes the self, it presents selves and the categories of identity that qualify these selves as fundamentally conditioned by the environments in which they appear before themselves and others. It also argues that we do the work of identity in public spaces, particularly digital spaces, and that these spaces shape what identities we can assume and what those identities mean. Contemporary social media technologies facilitate the production of particular forms of selfhood through the combined logics of the interface, the profile, and the post. *The Politics of Recognition in the Age of Digital Spaces* will be of interest to scholars and advanced students working in a wide range of disciplines including political philosophy, phenomenology, philosophy of technology, sociology, political theory, and critical theory. It will also appeal to anyone with an interest in contemporary identity politics, whether as a matter of study or lived experience.

The Cultural Pragmatics of Danger Carsten Levisen, Zhengdao Ye, 2024-08-15 This book addresses the problems and challenges of studying the discourse of danger cross linguistically and cross culturally and proposes the cultural pragmatics of danger as a new field of inquiry. Detailed case studies of several linguacultures include Arabic, Chinese, Danish, English, German, Japanese, and Spanish. Focusing on global and local contexts surrounding living in dangerous times, this book showcases how the new model of cultural pragmatics can be used to illuminate cultural meanings in discourse. Unlike the universalist approaches to pragmatics, cultural pragmatics focuses on understanding the linguacultural logics of discourse, and in the case of danger, the multiple cultural logics around which the themes and domains of danger revolve. The approach makes use of natural semantic metalanguage (NSM) as its principal analytical tool, and concepts such as cultural keywords and cultural scripts figure prominently as bearers of culture-specific meanings. The book will be of interest to students of pragmatics and discourse studies, researchers in cultural and cognitive semantics, anthropological linguistics, global humanities, political rhetoric, and environmental studies, as well as linguists working in applied areas such as risk and disaster studies, crisis and emergency communication.

The Habermas

Handbook Hauke Brunkhorst, Regina Kreide, Cristina Lafont, 2017-10-24 Jürgen Habermas is one of the most influential philosophers of our time. His diagnoses of contemporary society and concepts such as the public sphere, communicative rationality, and cosmopolitanism have influenced virtually all academic disciplines, spurred political debates, and shaped intellectual life in Germany and beyond for more than fifty years. In *The Habermas Handbook*, leading Habermas scholars elucidate his thought, providing essential insight into his key concepts, the breadth of his work, and his influence across politics, law, the social sciences, and public life. This volume offers a comprehensive overview and an in-depth analysis of Habermas's work in its entirety. After examining his intellectual biography, it goes on to illuminate the social and intellectual context of Habermasian thought, such as the Frankfurt School, speech act theory, and contending theories of democracy. The Handbook provides an extensive account of Habermas's texts, ranging from his dissertation on Schelling to his most recent writing about Europe. It illustrates the development of his thought and its frequently controversial reception, while elaborating the central ideas of his work. The book also provides a glossary of key terms and concepts, making the complexity of Habermas's thought accessible to a broad readership. Reading the Difficulties Thomas Fink, Judith Halden-Sullivan, 2014-02-28 Definitions of what constitutes innovative poetry are innumerable and are offered from every quarter. Some critics and poets argue that innovative poetry concerns free association. John Ashbery, others that experimental poetry is a re-staging of language. Bruce Andrews, or a syntactic and cognitive break with the past. Ron Silliman and Lyn Hejinian. The tenets of new poetry abound. But what of the new reading that such poetry demands? The essays in *Reading the Difficulties* offer case studies in and strategies for reading innovative poetry. They allow readers to interact with verse that deliberately removes many of the comfortable cues to comprehension: poetry that is frequently non-narrative, non-representational, and indeterminate in subject, theme, or message. Book jacket *Fictions of Finance at the End of an American Century* Richard Godden, 2023 Addressing the emergence and decline of US Fordism, this volume examines how an economy determines the language of those who live among its imperatives. It studies how the complexities of words and their histories derive from and register the organizing contradictions of an industrial economy and of its failure. **The Social Science Jargon Buster** Zina O'Leary, 2007-09-17 Are you confused by academic jargon? This book successfully addresses the central task for any teacher of social theory: how to make the material accessible without making it simplistic and banal. Reading Capitalist Realism Leigh Claire La Berge, 2014-04-01 As the world has been reshaped since the 1970s by economic globalization neoliberalism and financialization writers and artists have addressed the problem of representing the economy with a new sense of political urgency Anxieties over who controls capitalism have thus been translated into demands upon literature art and mass media to develop strategies of representation that can account for capitalism's power Reading Capitalist Realism presents some of the latest and most sophisticated approaches to the question of the relation between capitalism and narrative form partly by questioning how the realism of austerity privatization and wealth protection relate to the realism of narrative and cultural production Even as critics have sought to locate a new aesthetic mode that might consider and move beyond theorizations of the postmodern this volume contends that narrative realism demands renewed scrutiny for its ability to represent capitalism's latest scenes of enclosure and indebtedness Ranging across fiction nonfiction television and film the essays collected here explore to what extent realism is equipped to comprehend and historicize our contemporary economic moment and what might be the influence or complicity of the literary in shaping the global politics of lowered expectations Including essays on writers such as Mohsin Hamid Lorrie Moore Jess Walter J M Coetzee James Kelman Ali Smith Russell Banks William Vollmann and William Gibson as well as examinations of Hollywood film productions and The Wire television series Reading Capitalist Realism calls attention to a resurgence of realisms across narrative genres and questions realism's ability to interrogate the crisis driven logic of political and economic common sense

Speech, Print and Decorum in Britain, 1600--1750 Elspeth Jajdelska, 2016-03-10 Filling an important gap in the history of print and reading Elspeth Jajdelska offers a new account of the changing relationship between speech rank and writing from 1600 to 1750 Jajdelska draws on anthropological findings to shed light on the different ways that speech was understood to relate to writing across the period bringing together status and speech literary and verbal decorum readership the material text and performance Jajdelska's ambitious array of sources includes letters diaries paratexts and genres from cookery books to philosophical discourses She looks at authors ranging from John Donne to Jonathan Swift alongside the writings of anonymous merchants apothecaries and romance authors Jajdelska argues that Renaissance readers were likely to approach written and printed documents less as utterances in their own right and more as representations of past speech or as scripts for future speech In the latter part of the seventeenth century however some readers were treating books as proxies for the author's speech rather than as representations of it These adjustments in the way speech and print were understood had implications for changes in decorum as the inhibitions placed on lower ranking authors in the Renaissance gave way to increasingly open social networks at the start of the

eighteenth century As a result authors from the lower ranks could now publish on topics formerly reserved for the more privileged While this apparently egalitarian development did not result in imagined communities that transcended class readers of all ranks did encounter new models of reading and writing and were empowered to engage legitimately in the gentlemanly criticism that had once been the reserve of the cultural elites Shortlisted for the European Society for the Study of English ESSE book prize 2018

Misrecognitions Ben Parker,2024-03-15 Misrecognitions mounts a vigorous defense of the labyrinthine plotting of Victorian novels notorious for their implausible concluding revelations and coincidences Critics have long decried Victorian recognition scenes the reunions and retroactive discoveries of identity that too conveniently bring the story to a close as regrettable contrivances Ben Parker counters this view by showing how these recognition scenes offer a critique of the social and economic misrecognitions at work in nineteenth century capitalism Through a meticulous analysis of novels by Charles Dickens Anthony Trollope and Henry James as well as Arthur Conan Doyle s Sherlock Holmes stories Misrecognitions tracks how the Victorian novel translates the financialized abstractions of capital into dramas of buried secrets and disguised relations Drawing on Karl Marx s account of commodity fetishism and reification Parker contends that by configuring capital as an enigma to be unveiled Victorian recognition scenes dramatize the inversions of agency and temporality that are repressed in capitalist production In plotting capital as an agent of opacity and misdirection Victorian novels and their characteristic dialectic of illusion and illumination reveal the plot hole in capitalism itself
