Encyclopedia of Chinese History Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China. Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.

Archaeological Investigations of the Maldives in the Medieval Islamic Period Anne Haour, Annalisa Christie, 2021-12-30 This book presents pioneering research on the Indian Ocean archipelago of the Maldives in the medieval period. Primarily archaeological, the book has an interdisciplinary slant, examining the material culture, history and environment of the islands. Featuring contributions by leading archaeologists and material culture researchers, the book is the first systematic archaeological monograph devoted to the Maldives. Offering an archaeological account of this island nation from the beginnings of the Islamic period, it complements and nuances the picture presented by external historical data which identify the Maldives as a key player in global networks. The book describes excavations and surveys at a medieval site on the island of Kinolhas. It offers a comprehensive analysis of finds of pottery, glass and cowries, relating them to regional assemblages to add valuable new data to an under-researched field. The artefacts suggest links with India, Sri Lanka, the Middle East, Arabia, central Asia, southeast Asia and China, offering tangible evidence of wider connections. The research also evidences diet, crafts and funerary practices. The rigorous presentation of the primary material is framed by chapters setting the context, conceptual approaches and historical interpretation, placing the Maldives within broader dynamics of Islamic and Indian Ocean history and opening the research results to a wide readership. The book is aimed at students and researchers interested in the archaeology and history of the Indian Ocean, Islamic studies, island and coastal communities, maritime

networks and the medieval period with special relevance for the Global Middle Ages It will appeal to art historians archaeologists museologists and heritage and material culture studies researchers with related interests *The Arts of China 900-1620* William Watson,2000-01-01 This beautiful book is the second in a major three volume series that will survey China s immense wealth of art architecture and artefacts from prehistoric times to the twentieth century It covers the most prolific and broad ranging period of Chinese art history from the Song Dynasty with its spectacular landscape paintings to the Ming Dynasty with its lovely pottery William Watson considers architecture painting sculpture and the decorative arts in equal balance He follows styles and motifs as they are developed in each medium from one province to another and discusses materials and techniques as well as the iconography and function of every art form He also explores relationships between one medium and another tracing for example the influence of Buddhist iconography on sculptural traditions and on the architecture of temples and towers and showing how ceramic ornament affected the development of ornament in other media

The Archaeology of Early Colonial Manila Ellen Hsieh,2025-01-14 A view into the diverse culture of the Philippines in the sixteenth and seventeenth centuries Although Manila capital city of the Philippines played a critical role in economic and cultural exchanges between the East and the West during the sixteenth and seventeenth centuries little is known about what life was like for its residents during this time In this book Ellen Hsieh uses archaeological historical and ethnographic resources to document the ways Manila was transformed by the arrival of Spanish colonists in 1571 and how the city in turn shaped the modern world Manila was uniquely positioned as a crossroads in the networks of Southeast Asia East Asia and Iberia resulting in a hybridized culture where colonial Spanish Indigenous Tagalog and overseas Chinese groups exchanged goods and ideas In *The Archaeology of Early Colonial Manila* Hsieh analyzes material goods such as ceramics from Intramuros the Spanish walled city and Parian the Chinese quarter and illustrations from the Boxer Codex a Spanish manuscript featuring images of people in the Philippines and surrounding areas to illuminate the diversity of Manila society and to unravel the intricate power dynamics among these ethnic groups Bridging the gap in research between pre Spanish and late colonial periods and amplifying the voices of non elite diasporic and colonized communities often overlooked in historical documents Hsieh provides an important focus on Manila s contributions to world history during a period of intense globalization

Luxury in Global Perspective Karin Hofmeester, Bernd-Stefan Grewe, 2016-11-28 Global history is predicated on connections and exchange how connections between far flung people places and objects are forged through a variety of exchanges As world history has matured as a field its practitioners have found the movement of commodities between peoples places and time a fruitful vehicle for research and teaching Studies of bulk items like salt spices coffee and other globally traded commodities abound but few scholars have examined the role of luxury goods from a global perspective This anthology charts the many different contexts in which luxury objects have been used across the globe ranging from the social practices linked to these objects to their production exchange and consumption as well as how these practices varied over time and space and how different societies attributed diverse meanings to the same objects Using luxury goods as a conduit *Luxury in Global Perspective* enriches our understanding of global history *The Bulletin of the Oriental Ceramic Society of Hong Kong* Oriental Ceramic Society of Hong Kong, 1994 *Embodied Dependencies and Freedoms* Julia A.B.

Hegewald, 2023-03-20 Have you ever thought about dependencies in Asian art and architecture Most people would probably assume that the arts are free and that creativity and ingenuity function outside of such reliances However the 13 chapters provided by specialists in the fields of Asian art and architecture in this volume show that those active in the visual arts and the built environment operate in an area of strict relations of often extreme dependences Material artefacts and edifices are dependent on the climate in which they have been created on the availability of resources for their production on social and religious traditions which may be oral or written down and on donors patrons and the art market Furthermore gender and labour dependencies play a role in the creation of the arts as well Despite these strong and in most instances asymmetrical dependencies artists have at all times found freedoms in expressing their own imagination vision and originality This shows that dependencies and freedoms are not necessarily strictly separated binary opposites but that at least in the area of the history of art and architecture in Asia the two are interconnected in what are often complex and multifaceted layers
