Rhythm Only - Book 1 - Eighths and Sixteenths - Assorted Meters Nathan Petitpas, This collection presents the user with a series of increasingly difficult rhythms on a single

pitch The rhythmic material in this series is organized into 10 difficulty levels Each difficulty level contains four exercises in each of the following time signatures 2 4 3 4 4 4 6 8 9 8 and 12 8 This gives exercises in 2 3 and 4 beats per bar in both simple and compound meters The first two exercises of each time signature have no ties while the remaining two exercises in each time signature include ties In Book 1 of this series you ll find difficulty levels 1 to 5 while Book 2 completes the set with levels 6 to 10 To curate the difficulty levels I looked at all of the possible ways we can use eighth notes and sixteenth notes to subdivide a single beat without the use of tuplets The lowest difficulty level is comprised of the easiest of these one beat rhythmic groupings Subsequent difficulty levels include more challenging groupings while continuing to use the easier ones from previous chapters In this way the difficulty levels are cumulative level 1 uses only the easiest groupings but by level 9 all of the possible rhythmic groupings have been introduced Level 10 increases the density of challenging groupings by omitting the easier ones The introductory page of each chapter introduces the rhythmic groupings that will be added or omitted in that chapter On some occasions rhythmic groupings are respelled however these new spellings are not formally introduced at the beginning of the chapter The exercises in this collection are intentionally random and difficult to internalize In keeping the rhythmic material as unpredictable as possible the door is left open for the materials to be used in many ways It also forces the user to process every rhythm as its own event without relying on pattern recognition for help Some suggestions for how to use this book include Practice sight reading The goal in practising sight reading is not to learn the material but to develop the skill of reading new material When practising sight reading I encourage you to cycle through exercises quickly rather than mastering each one Use a metronome The most important thing you can do with this material is learn how to read these rhythms and play them in time Advanced metronome work Placing the metronome click on non strong beats forces you to take responsibility for the time in a different way and trains you to hear how your rhythm relates to each subdivision of the beat For example instead of putting the metronome click on each quarter note in 4 4 play the exercise with the metronome giving the second eighth note of each beat or the last sixteenth note or beats 2 and 4 or every third sixteenth note Be creative with this one the possibilities are limitless Develop independence between hands by playing a repeating pattern in one hand while reading an exercise in the other Expand on this by adding patterns in hands and feet while reading a rhythm with a remaining limb This is a great exercise for drummers and percussionists but any instrumentalist could benefit from coordination practice Use these rhythms to practice scales Instead of playing scales in straight sixteenth notes try playing them in the rhythms given in these exercises Write in sticking patterns dynamics accents phrase marks or other articulations for you or your students to practice If you re not happy with the ties I included feel free to add some of your own Combine the above exercises in any way that you think will be beneficial to your practice As with any of the Dots and Beams books the uses for this particular collection are limited only by the imagination of the musician using it I encourage anybody using this book to find as many uses for these exercises as possible
