Peace and Resistance in Youth Cultures Siobhan McEvoy-Levy,2017-12-21 This book offers a rationale for and ways of reading popular culture for peace It argues that we can improve peacebuilding theory and practice

through examining popular culture's youth revolutionaries and their outcomes from their digital and plastic renderings to their living embodiments in local struggles for justice. The study combines insights from post structural post colonial feminist youth studies and peace and conflict studies theories to analyze the literary themes political uses and cultural impacts of two hit book series Harry Potter and The Hunger Games tracing how these works have been transformed into visible political practices including social justice advocacy and government propaganda in the War on Terror. Pop culture production and consumption help maintain global hierarchies of inequality and structural violence but can also connect people across divisions through fandom participation. Including chapters on fan activism fan fiction Guantanamo Bay detention center youth as a discursive construct in IR and the merchandizing and tourism opportunities connected with The Hunger Games the book argues that through taking youth oriented pop culture seriously we can better understand the local global and transnational spaces discourses and the relations of power within which meanings and practices of peace are known negotiated encoded and obstructed.

Black Space Adilifu Nama, 2010-01-01 Winner Rollins Book Award Southwest Texas Popular Culture Association American Culture Association 2008 Science fiction film offers its viewers many pleasures not least of which is the possibility of imagining other worlds in which very different forms of society exist. Not surprisingly however these alternative worlds often become spaces in which filmmakers and film audiences can explore issues of concern in our own society. Through an analysis of over thirty canonic science fiction SF films including Logan's Run Star Wars Blade Runner Back to the Future Gattaca and Minority Report Black Space offers a thorough going investigation of how SF film since the 1950s has dealt with the issue of race and specifically with the representation of blackness. Setting his study against the backdrop of America's ongoing racial struggles and complex socioeconomic histories Adilifu Nama pursues a number of themes in Black Space. They include the structured absence token presence of blacks in SF film racial contamination and racial paranoia the traumatized black body as the ultimate signifier of difference alienness and otherness the use of class and economic issues to subsume race as an issue the racially subversive pleasures and allegories encoded in some mainstream SF films and the ways in which independent and extra filmic productions are subverting the SF genre of Hollywood filmmaking. The first book length study of African American representation in science fiction film Black Space demonstrates that SF cinema has become an important field of racial analysis a site where definitions of race can be contested and post civil rights race relations re imagined.
